# 1 Safety Precaution

## 1.1. General Guidelines

### 1. IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by (!) in the Schematic Diagrams, Circuit Board Layout, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent X-RADIATION, shock fire, or other hazards. Do not modify the original design without permission of manufacturer.

2. An Isolation Transformer should always be used during the servicing of AC Adaptor whose chassis is not isolated from the AC power line. Use a transformer of adequate power rating as this protects the technician from accidents resulting in personal injury from electrical shocks. It will also protect AC Adaptor from being damaged by accidental shorting that may occur during servicing.
3. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
4. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
5. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

### 1.1.1. Leakage current cold check

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
2. Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be between  $1M\Omega$  and  $5.2M\Omega$ . When the exposed metal does not have a return path to the chassis, the reading must be infinity.

### 1.1.2. Leakage current hot check (See Figure 1)

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect "A" to exposed metallic part on the set. And connect "B" to a good earth ground, as shown in Figure 1.
3. Use an AC voltmeter, with  $1 k\Omega/V$  or more sensitivity, to measure the potential across the resistor.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
6. The potential at any point should not exceed 0.75 V RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 mA. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

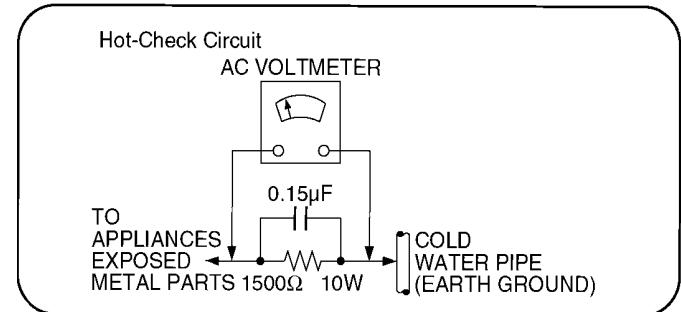

Figure 1

## 2 Warning

### 2.1. Caution for AC Cord (VJA0940 type)

#### 2.1.1. Information for your safety

##### IMPORTANT

Your attention is drawn to the fact that recording of pre-recorded tapes or discs or other published or broadcast material may infringe copyright laws.

##### WARNING

To reduce the risk of fire or shock hazard, do not expose this equipment to rain or moisture.

##### CAUTION

To reduce the risk of fire or shock hazard and annoying interference, use the recommended accessories only.

##### FOR YOUR SAFETY

###### DO NOT REMOVE THE OUTER COVER

To prevent electric shock, do not remove the cover. No user serviceable parts inside. Refer servicing to qualified service personnel.

#### 2.1.2. Caution for AC mains lead

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three-pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5 amperes and it is approved by ASTA or BSI to BS1362

Check for the ASRA mark or the BSI mark on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover, the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local Panasonic Dealer.

If the fitted moulded plug is unsuitable for the socket outlet in your home then the fuse should be removed and the plug cut off and disposed of safely.

There is a danger of severe electrical shock if the cut off plug is inserted into any 13-ampere socket.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt, please consult a qualified electrician.

#### 2.1.2.1. Important

The wires in this mains lead are coloured in accordance with the following code:

Blue	Neutral
Brown	Live

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.

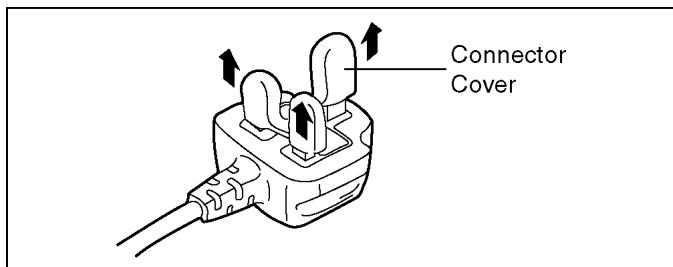

The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

Under no circumstances should either of these wires be connected to the earth terminal of the three pin plug, marked with the letter E or the Earth Symbol.

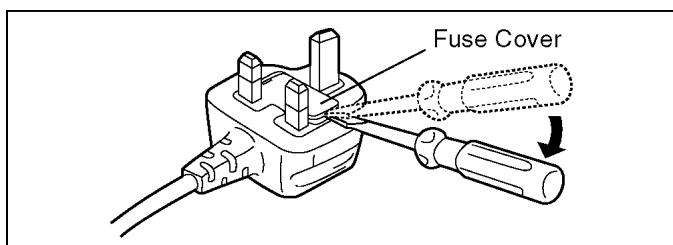

#### 2.1.2.2. Before use

remove the Connector Cover as follows.

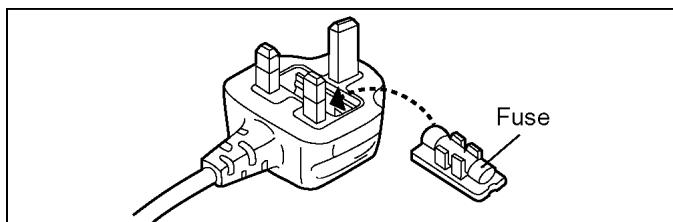

#### 2.1.2.3. How to replace the Fuse

1. Remove the Fuse Cover with a screwdriver.

2. Replace the fuse and attach the Fuse cover.

## **2.2. Prevention of Electro Static Discharge (ESD) to Electrostatically Sensitive (ES) Devices**

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by electro static discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an antistatic solder removal device. Some solder removal devices not classified as "antistatic (ESD protected)" can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

**CAUTION:**

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

### **IMPORTANT SAFETY NOTICE**

There are special components used in this equipment which are important for safety.

These parts are marked by  in the schematic diagrams, Exploded Views and replacement parts list. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

## **2.3. Handling the Lead-free Solder**

### **2.3.1. About lead free solder (PbF)**

**Distinction of PbF P.C.B.:**

PCBs (manufactured) using lead free solder will have a PbF printing on the P.C.B..

**CAUTION:**

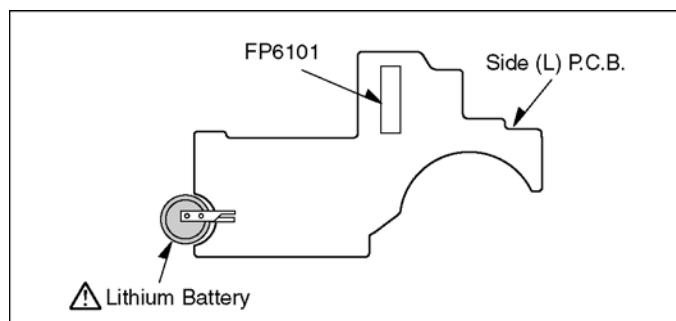

- Pb free solder has a higher melting point than standard solder;  
Typically the melting point is 50 °F - 70 °F (30 °C - 40 °C) higher.  
Please use a soldering iron with temperature control and adjust it to 700 °F±20 °F (370 °C± 10 °C).  
In case of using high temperature soldering iron, please be careful not to heat too long.
- Pb free solder will tend to splash when heated too high (about 1100 °F/600 °C).
- All products with the printed circuit board with PbF stamp or printing must be serviced with lead free solder.  
When soldering or unsoldering, completely remove all of the solder from the pins or solder area,  
and be sure to heat the soldering points with the lead free solder until it melts sufficiently.

**Recommendations**

Recommended lead free solder composition is Sn96.5 Ag3.0 Cu0.5.

## 2.4. How to Replace the Lithium Battery (PROCEDURE)

1. Remove the Side (L) P.C.B.. (Refer to Disassembly Procedures.)
2. Unsolder the Lithium Battery "ML-621S/F9D" and then replace the new one. (See Figure B1.)
3. Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.

### CAUTION

The battery used in this device may present a risk of fire or chemical burn if mistreated.  
Do not recharge, disassemble, heat above 100°C (212°F), or incinerate.  
Replace battery with Panasonic part number ML-621S/F9D only.  
Use of another battery may present a risk of fire or explosion.  
Dispose of used battery promptly.  
Keep away from children.  
Do not disassemble and do not dispose of in fire.

Fig. B1

#### Note:

The lithium battery is a critical component. (Type No.: ML-621S/F9D)  
It must never be subjected to excessive heat or discharge.  
It must therefore only be fitted in equipment designed specifically for its use.  
Replacement batteries must be of the same type and manufacture.  
They must be fitted in the same manner and location as the original battery, with the correct polarity contacts observed.  
Do not attempt to re-charge the old battery or re-use it for any other purpose.  
It should be disposed of in waste products destined for burial rather than incineration.

### CAUTION

Danger of explosion if battery is incorrectly replaced.  
Replace only with the same or equivalent type recommended by the equipment manufacturer.  
Discard used batteries according to manufacturer's instructions.

### PRECAUTION

Le fait de remplacer incorrectement la pile peut présenter des risques d'explosion.  
Remplacer la pile uniquement par une pile identique ou de type équivalent recommandée par le fabricant. Se débarrasser des piles usagées conformément aux instructions du fabricant.

### VORSICHT

Bei einer falsch eingesetzten Batterie besteht Explosionsgefahr. Nur mit einer vom Hersteller empfohlenen Batterie vom gleichen Typ ersetzen.  
Verbrauchte Batterien beim Fachhändler oder einer Sammelstelle für Sonderstoffe abliefern.

### VARNING

Explosionsfara vid felaktigt batteribyte.  
Använd samma batterityp eller en ekvivalent typ som rekommenderas av apparattillverkaren.  
Kassera använt batteri enligt fabrikantens instruktion.

### ADVARSEL!

Lithiumbatteri-Eksplorationsfare ved fejlagtig håndtering.  
Udskiftning må kun ske med batteri af samme fabrikat og type.  
Levér det brugte batteri tilbage til leverandøren.

### VAROITUS

Paristo voi räjähtää, jos se on virheellisesti asennettu.  
Vaihda paristo ainoastaan laitevalmistajan suosittelemaan tyyppiin.  
Hävitä käytetty paristo valmistajan ohjeiden mukaisesti.

# 3 Service Navigation

## 3.1. Service Information

This service manual contains technical information which will allow service personnel's to understand and service this model.

Please place orders using the parts list and not the drawing reference numbers.

If the circuit is changed or modified, this information will be followed by supplement service manual to be filed with original service manual.

### Note 1:

These movie camera uses AC Adaptor VSK0644.

### Note 2:

1) This service manual does not contain the following information, because of the impossibility of servicing at component level.

1. Schematic Diagram, Block Diagram and P.C.B. layout of Main P.C.B./Sub P.C.B.
2. Parts List for individual parts of Main P.C.B./Sub P.C.B.

2) The following category are recycle module part. Please send them to Central Repair Center.

\*Main P.C.B.

(VEP03G87B: NV-GS300EG/E/EB/EP, VEP03G87C: NV-GS300EE/GC/GN/SG, VEP03G87D: NV-GS308GK,  
VEP03G87F: NV-GS300GD, VEP03G87G: NV-GS300GT, VEP03G87H: NV-GS280EG/E/EB/EP,  
VEP03G87S: NV-GS300PL, VEP03G87T: NV-GS300GCT)

\*Sub P.C.B.

(VEP23645B: NV-GS300EG/E/EB/EP/EE/GC/GN/SG/GCT, GS280EG/E/EB/EP, GS308GK,  
VEP23645C: NV-GS300PL/GD/GT)

When a part replacement is required for repairing each Main P.C.B. and/or Sub P.C.B., replace the assembly parts.  
(Main P.C.B. and/or Sub P.C.B.)

The following circuits are contained in Main P.C.B.

1. Main Connection Circuit
2. AVIO Circuit
3. Video Circuit
4. Power Circuit
5. Control Circuit

The following circuit is contained in Sub P.C.B..

1. Sub Connection Circuit
2. Camera Circuit
3. Lens Drive Circuit

## 3.2. Service Caution

### 3.2.1. How to Discharge the Capacitor on the Front P.C.B.

Remove the Front P.C.B.. (Refer to Disassembly Procedures.)

#### CAUTION

**Be sure to discharge the capacitor on Front  
P.C.B. before disassembling.**

#### CAUTION

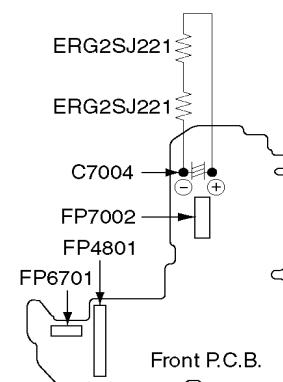

**Be careful of the high voltage circuit on Front  
P.C.B. when servicing.**

Method:

1. Prepare the 2 Resistors (ERG2SJ221:220 ohm/2w)  
for discharge.

Note:

- Above 2 Resistors may be substituted with equivalent type.
2. Make short circuit using 2 Resistors between C7004(+) and C7004(-) for 3 seconds as follows.
3. After discharging, confirm that the capacitor voltage is sufficiently lowered using a voltmeter

### 3.2.2. EEPROM data for spare parts of the Main P.C.B.

When the Main P.C.B. is replaced, the fixed and average data must be changed by Tatsujin kit according to the Movie Camera's suffix.

Then, confirm and/or adjust the VTR and Camera section one by one.

# 4 Specifications

## Digital Video Camera / Recoder

ITEM	SPECIFICATION	ITEM	SPECIFICATION
POWER	Source: DC 7.9 / 7.2 V Consumption: Recording 3.6 W (When using Viewfinder) 3.9 W (When using LCD Monitor)	STANDARD ILLUMINATION	1,400 lx
		MINIMUM REQUIRED ILLUMINATION	1 lx (Colour Night View Mode)
RECORDING FORMAT	Mini DV (Consumer-use Digital Video SD Format)	USB	Card reader/writer function, USB 2.0 compliant (Hi-Speed) No copyright protection support Pict Bridge-Compliant
TAPE USED	6.35 mm digital video tape		DV Output Terminal (IEEE1394, 4-pin) (NV-GS280 Series) DV Input/Output Terminal (IEEE1394, 4-pin) (NV-GS300 Series, GS308GK)
RECORDING / PLAYBACK TIME	SP mode: 80 min. with DVM80 LP mode: 120 min. with DVM80	DIGITAL INTERFACE

CARD MEMORY FUNCTIONS	Recording Media: SD Memory Card Still Picture Recording File Format: JPEG (Design rule for Camera File system, based on Exif 2.2 standard), DPOF corresponding Still Image Size: Mega-pixel Recording; 2048 × 1512 (3.1 million pixels, 4:3 Mode) 2048 × 1112 (2.4 million pixels, 16:9 Mode) 1600 × 1200 (2.0 million pixels, 4:3 Mode) 1280 × 960 (1.0 million pixels, 4:3 Mode) VGA Recording; 640 × 360 (16:9 Mode) 640 × 480 (4:3 Mode)		

Weight and dimensions are approximate values.

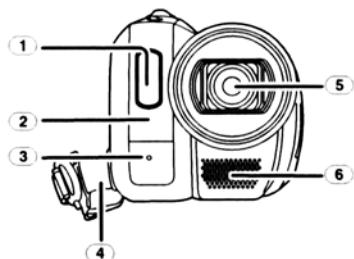

Specifications may change without prior notice.

# 5 Location of Controls and Components

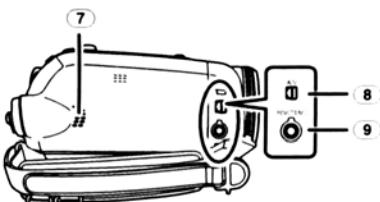

Followings are the Location of Controls and Components for NV-GS300EP, NV-GS280EP as a sample.  
For other models, refer to each Operatin Instructions.

## Parts identification and handling

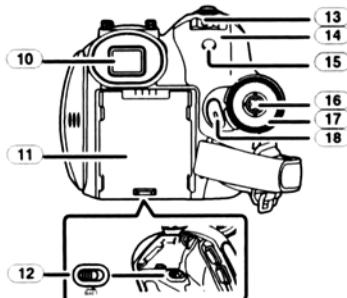

### ■ Camera

- ① Built-in video flash
- ② White balance sensor
- ③ Remote control sensor
- ④ Recording lamp
- ⑤ Grip belt  
(One-touch free style grip belt)
- ⑥ Lens (LEICA DICOMAR)
- ⑦ Microphone (built-in, stereo)

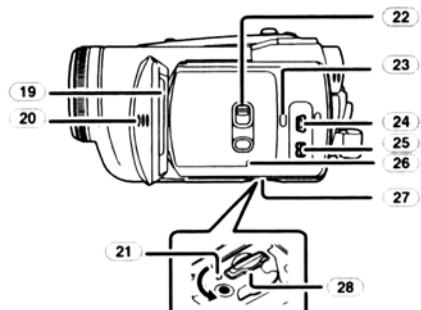

- ⑦ Speaker
- ⑧ Audio-video/S-Video output terminal [A/V]
  - Use the supplied Multi cable only, otherwise audio may not be played back normally.
- ⑨ Microphone terminal [MIC]
  - A compatible plug-in powered microphone can be used as an external microphone.
  - When the movie camera is connected with AC Adaptor, sometimes noise may be heard depending on microphone type. In that case, please switch to battery for power supply and noise will stop.

### ⑩ Viewfinder

Due to limitations in LCD production technology, there may be some tiny bright or dark spots on the Viewfinder screen. However, this is not a malfunction and does not affect the recorded picture.

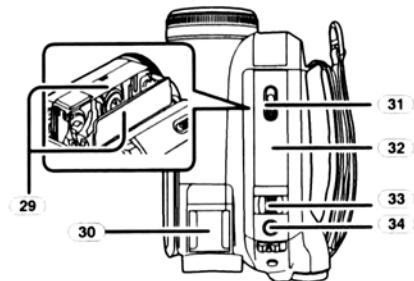

- ⑪ Battery holder
- ⑫ Battery release lever [BATT]
- ⑬ Power switch [OFF/ON]
- ⑭ Status lamp
- ⑮ Menu button [MENU]
- ⑯ Joystick
- ⑰ Mode dial
- ⑱ Recording start/stop button

**19 LCD monitor**

Due to limitations in LCD production technology, there may be some tiny bright or dark spots on the LCD monitor screen. However, this is not a malfunction and does not affect the recorded picture.

- 20 LCD monitor open part [OPEN]
- 21 Card access lamp
- 22 Mode select switch [AUTO/MANUAL/FOCUS]
- 23 Power LCD button [POWER LCD]
- 24 USB terminal [ $\downarrow$ ]
- 25 (NV-GS300)  
DV input/output terminal [DV]  
(NV-GS280)
- 26 DV output terminal [DV]
- 27 Reset button [RESET]
- 28 Card slot
- 29 Card slot cover

**29 Cassette holder**

**30 Accessory shoe**

•Accessories, such as a stereo microphone (VW-VMS2E; optional), are attached here.

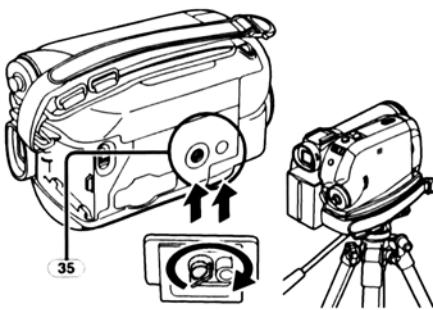

**31 Cassette eject lever [OPEN/EJECT]**

**32 Cassette cover**

**33 Zoom lever [W/T]**

Volume lever [ $-$ /VOL+]

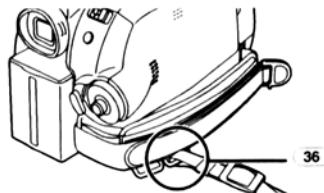

**34 Photoshot button [PHOTO SHOT]**

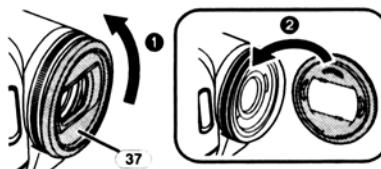

**35 Tripod receptacle**

This is a hole for attaching the camera to optional tripod/VW-CT45E. (Please carefully read the operating instructions for how to attach the tripod to the camera.)

- You cannot open the card slot cover when the tripod is used. Insert the card first and then attach the tripod.

**36 Shoulder strap fixture**

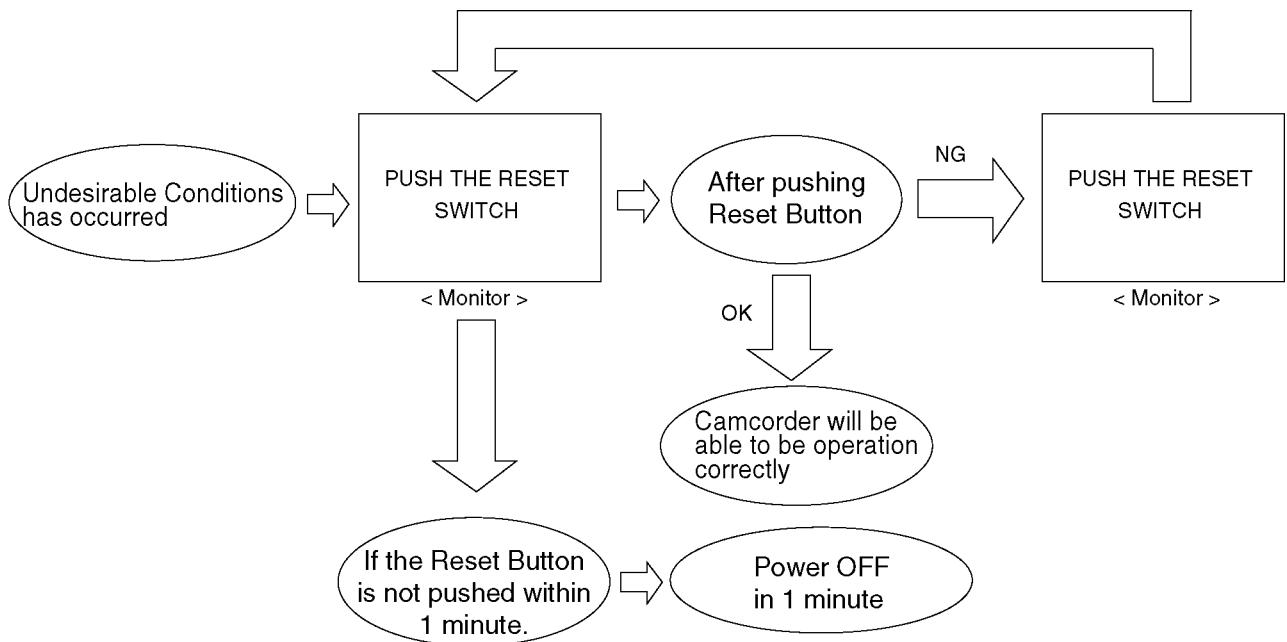

**37 Lens hood**

In order to remove the lens hood, rotate it counterclockwise ①. In order to fit it, put it into slot ②, and then rotate it clockwise.

# 6 Service Mode

## 6.1. Error Display

"PUSH THE RESET SWITCH" is displayed automatically on the EVF or the LCD Monitor when an undesirable condition has occurred.

**Note:**

When "PUSH THE RESET SWITCH" is displayed repeatedly, required.

Check the Error Code which is listed in the Service Menu.

## 6.2. Service Menu

When abnormal detection contents are confirmed a When I do the following operation automatic diagnosis cord is displayed.

### 1. Preparation

Remove the card and tape from this machine.

### 2. Service menu is displayed. (see Fig. S1)

Pushed [PHOTO SHOT] button and [JOYSTICK LEFT  $\blacktriangleleft$ ] button and [AUTO/MANUAL/FOCUS switch to FOCUS] button simultaneously for 3 seconds.

### 3. Operating automatic diagnosis cord is displayed.

Item [3] is selected with the [JOYSTICK UP or DOWN  $\blacktriangle/\blacktriangledown$ ] button.

[NO] is selected with the [JOYSTICK RIGHT  $\blacktriangleright$ ] button.

[YES] is selected with the [JOYSTICK UP or DOWN  $\blacktriangle/\blacktriangledown$ ] button.

Press the [JOYSTICK CENTER] button.

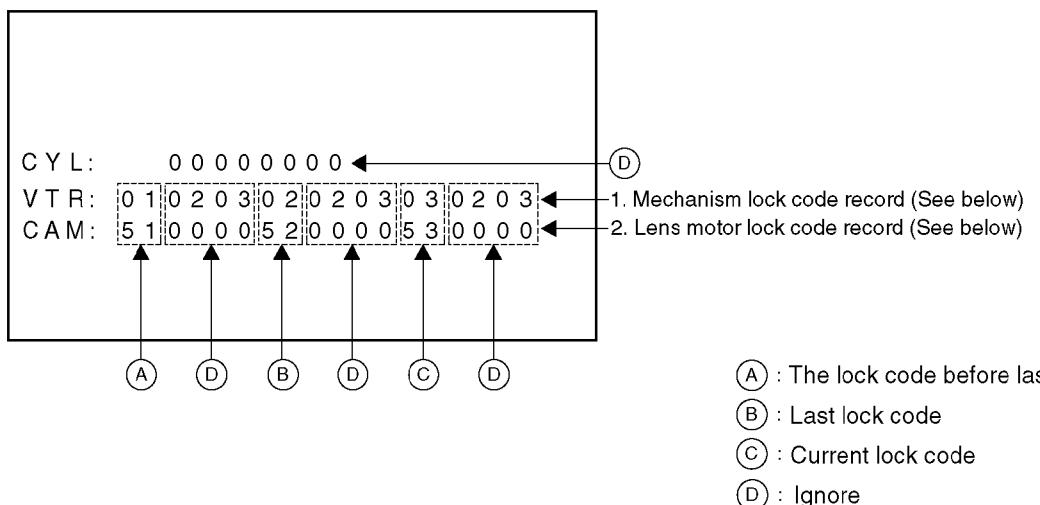

672C00	010C	22
1	NO	
2	NO	
3	NO	
4	NO	
5	NO	
SETUP	ENTER	EXIT
ITEM		MENU

Fig. S1

### NOTE:

Do not operate items Except for 3 in the Service Menu.

Self diagnosis cord contents are as follows.

Display contents (self diagnosis cord contents)

Mechanism & Lens motor lock code	
DISPLAY	CONDITION
01	T-REEL LOCK
02	S-REEL LOCK
03	UNLOADING LOCK
04	LOADING LOCK
05	CYLINDER
51	ZOOM MOTOR LOCK
52	FOCUS MOTOR LOCK

Turn off the power supply after confirmation.

Please do the error cord backup record the clear after repair completion.

#### **CLEAR METHOD**

If the Card and Tape inserted, take out it before Service Mode operation.

Making the mode dial of This Machine a tape recording mode, push [JOYSTICK LEFT ] button and [AUTO/MANUAL/FOCUS] switch to FOCUS] button and [RECORDING START/STOP] button simultaneously for 3 seconds.

# 7 Service Fixture & Tools

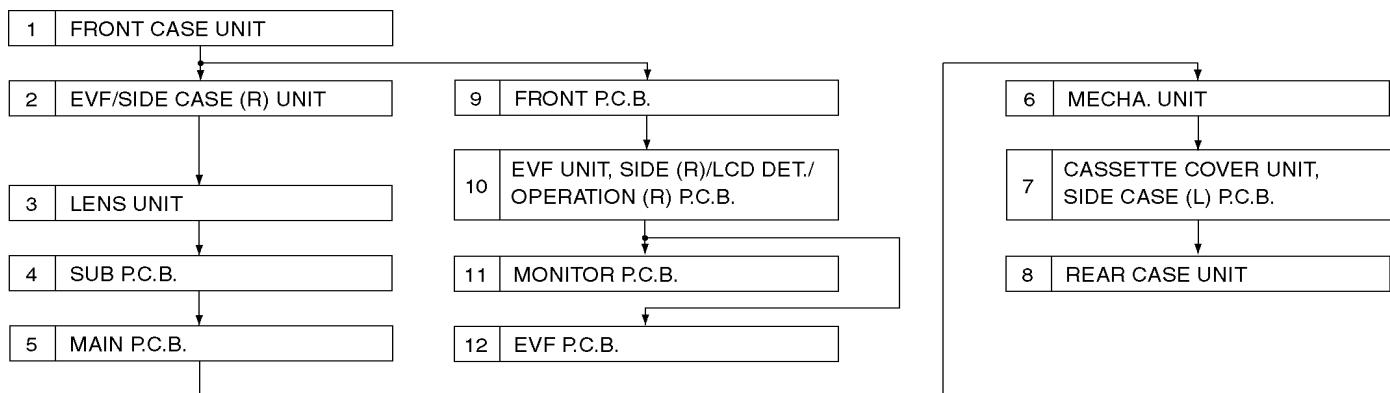

## 7.1. Service Tools and Equipment

Parts Name	Parts No.	Q'ty	Remarks
DV Camcorder	---	1	The Camcorder being adjusted.
Personnel Computer	---	1	With Tatsujin Software.
AC Adaptor	---	1	The AC Adaptor for DV Camcorder.
DC output Cable	---	1	The AC Adaptor for DV Camcorder.
Step Up Ring	VFK1164TAR37	1	For Collimator 37mm

## **8.5. Disassembly Procedures of Camera Lens Unit**

The following flowchart describes order or steps for removing the Camera lens unit and certain printed circuit boards in order to make access to the item needing service.

To reassemble the unit follow the steps in reverse order.

Note 1: Each Ref. numbers are equivalent to number of Fig.L2 and Parts List.

Fig. L1

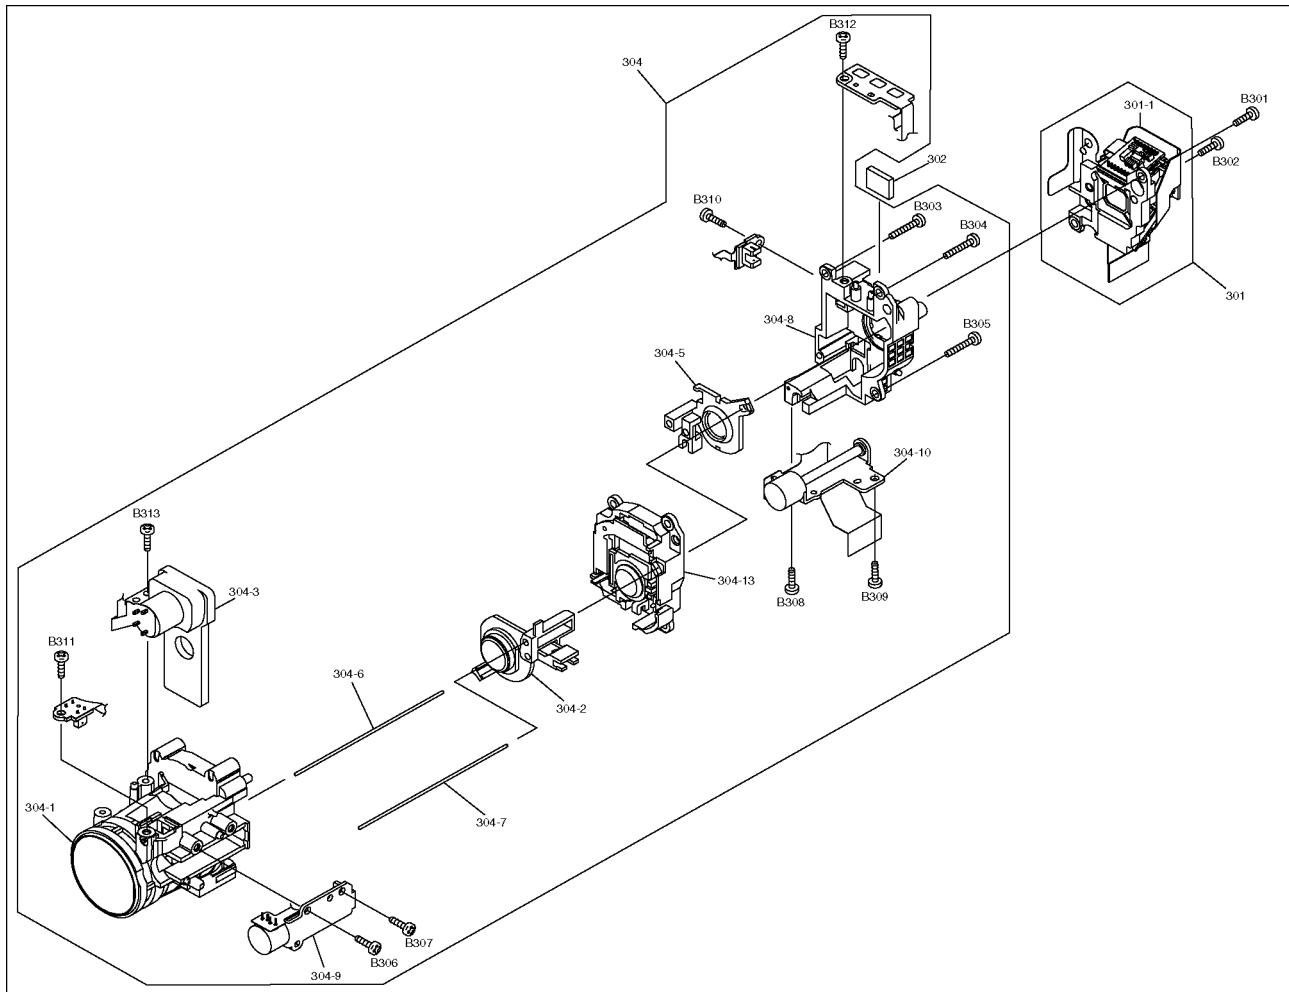

Fig. L2

# 9 Measurements and Adjustments

## 9.1. Service Positions

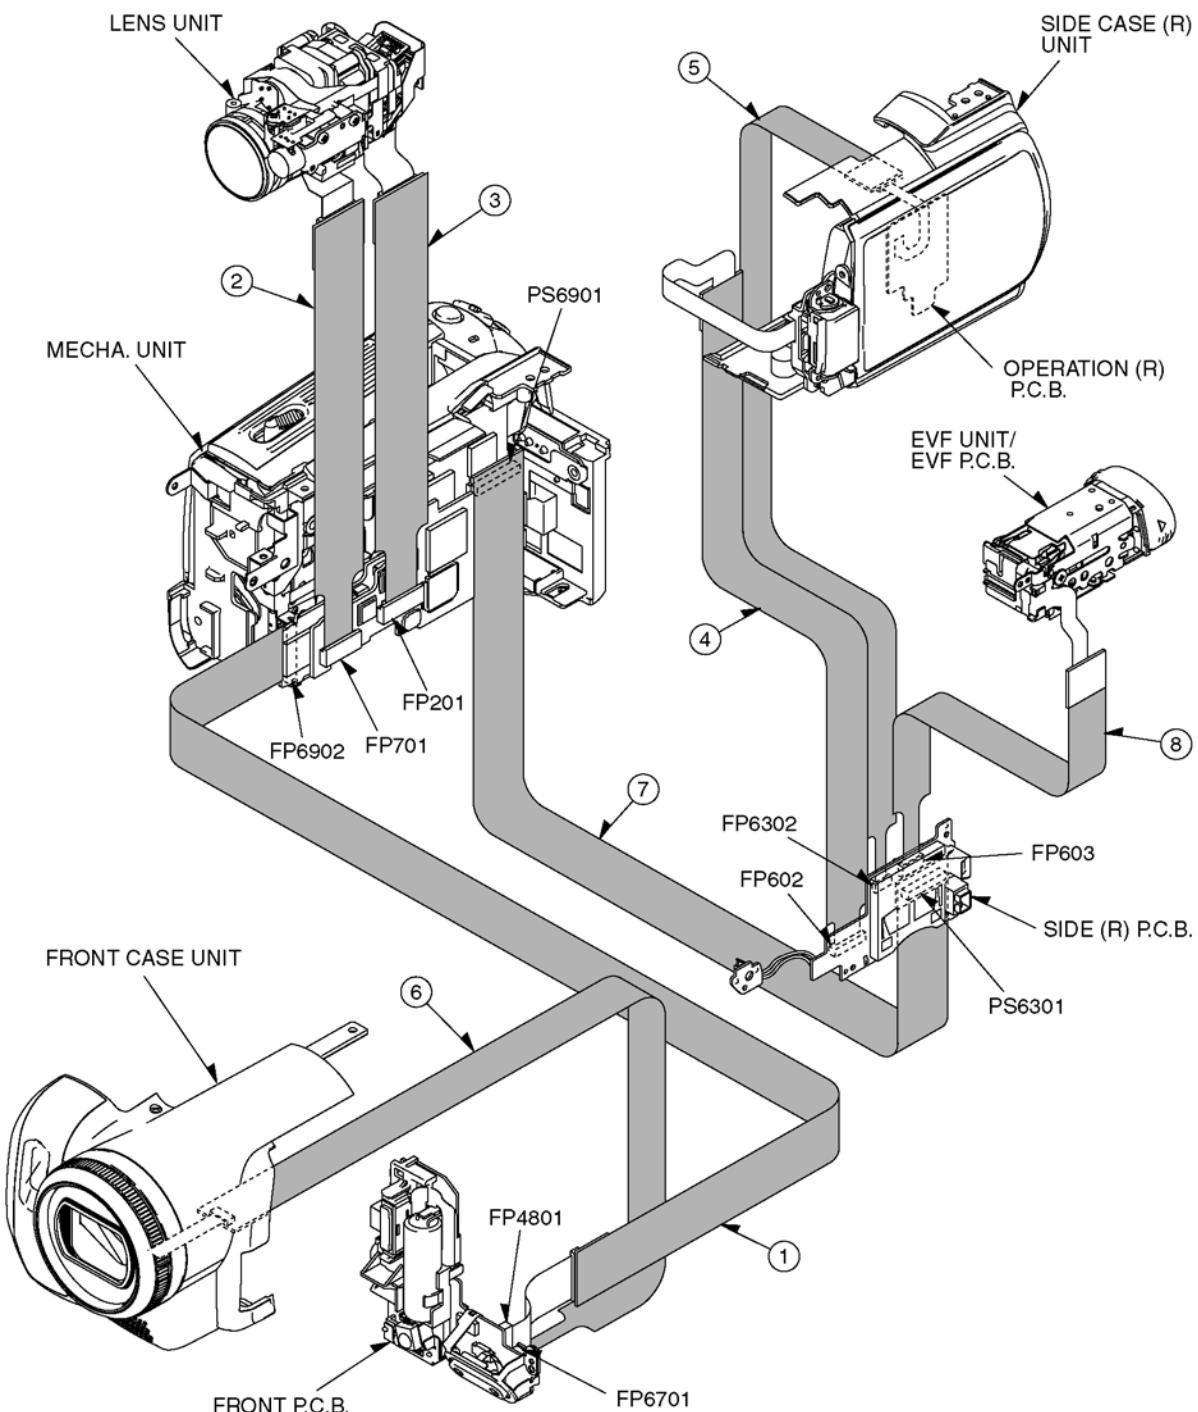

### 9.1.1. List of the extension cables

Use the following extension cables when checking or adjusting individual circuit boards except module Parts.  
(Main P.C.B. and Sub P.C.B.)

Ref.	Part No.	Pin	Part Name	Connection		Q'ty	Remarks
(1)	VFK1575C4520	45	Flat Cable	FP6902 (Main)	- FP4801 (Front)	1	as NV-GS400
(2)	VFK1575C3320	33	Flat Cable	FP701 (Sub)	- Lens Unit	1	as NV-GS200
(3)	VFK1459	39	Flat Cable	FP201 (Sub)	- Prism Unit	1	as NV-DS7
(4)	VFK1716	25	Flat Cable	FP602 (Side R)	- FP902 (Monitor)	1	as NV-GX5
(5)	VFK1465	5	Flat Cable	FP6302 (Side R)	- Operation (R) Unit	1	as NV-GS50
(6)	VFK1440	10	Flat Cable	FP6701 (Front)	- Barrier Motor Unit	1	as NV-DS7
(7)	VFK1993	60	Flat Cable	PS6901 (Main)	- PS6301 (Side R)	1	NEW
(8)	VFK1442	21	Flat Cable	FP603 (Side R)	- FP801 (EVF)	1	as NV-DS7

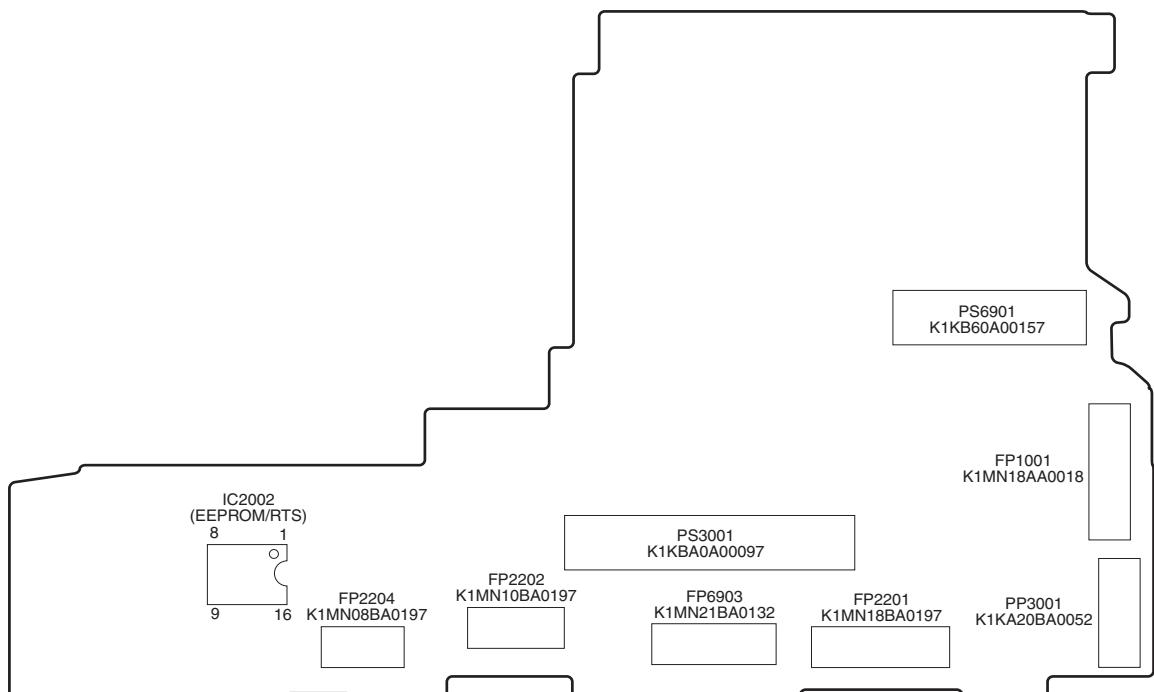

## 9.1.2. Checking and repairing individual circuit boards except module parts (Main P.C.B. and Sub P.C.B.)

How to use extension cables.

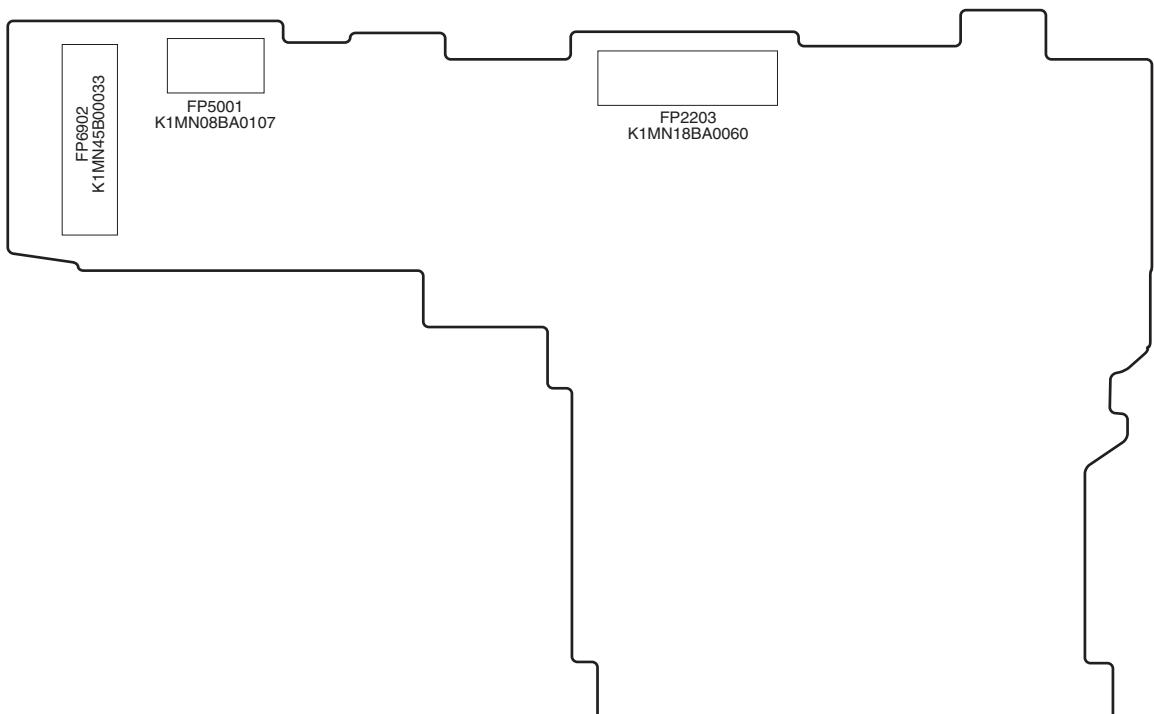

## 9.2. Location for Connectors of the Main P.C.B. & Sub P.C.B.

### 9.2.1. Main P.C.B.

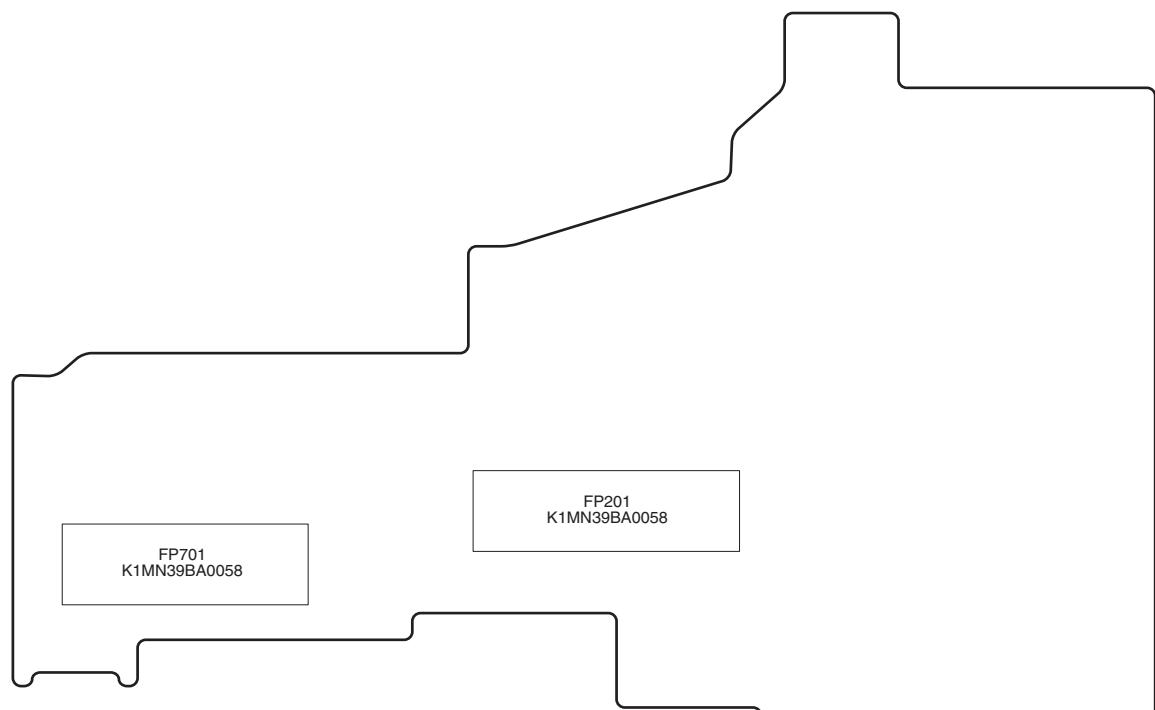

(COMPONENT SIDE)

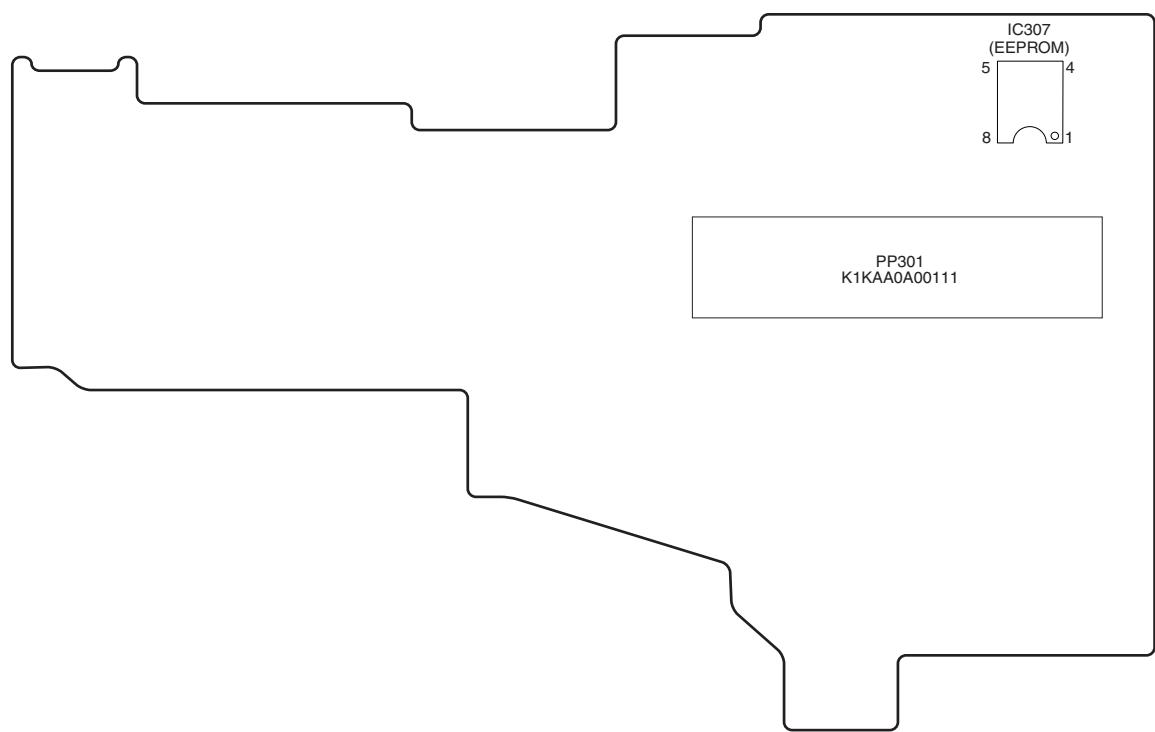

(FOIL SIDE)

## 9.2.2. Sub P.C.B.

(COMPONENT SIDE)

(FOIL SIDE)

## 9.3. Electrical Adjustment Procedures

### 9.3.1. Computer assisted adjustment system <TATSUJIN> adjustment

This unit employs the computer assisted system named; "TATSUJIN PC-Adjustment" for Electrical adjustment.

It is required to install a USB driver for service which can be download only from TSN-WEB.

### 9.3.2. Set-up manual for DV-Camcorder.

Pay attention, because the adjustment method is different from this machine.

1. Save the software

Install the effective model's TATSUJIN Software to PC: Personal Computer.

2. Set-Up

a. It need the connection between the PC and this unit with USB cable.

b. Connect the PC and DV Camcoder as shown in Fig. E1 and E2.

c. The adjustment instruction is available at "Software download" on the "Support Information from NWBG-PAVC" web-site in "TSN System", together with maintenance software.

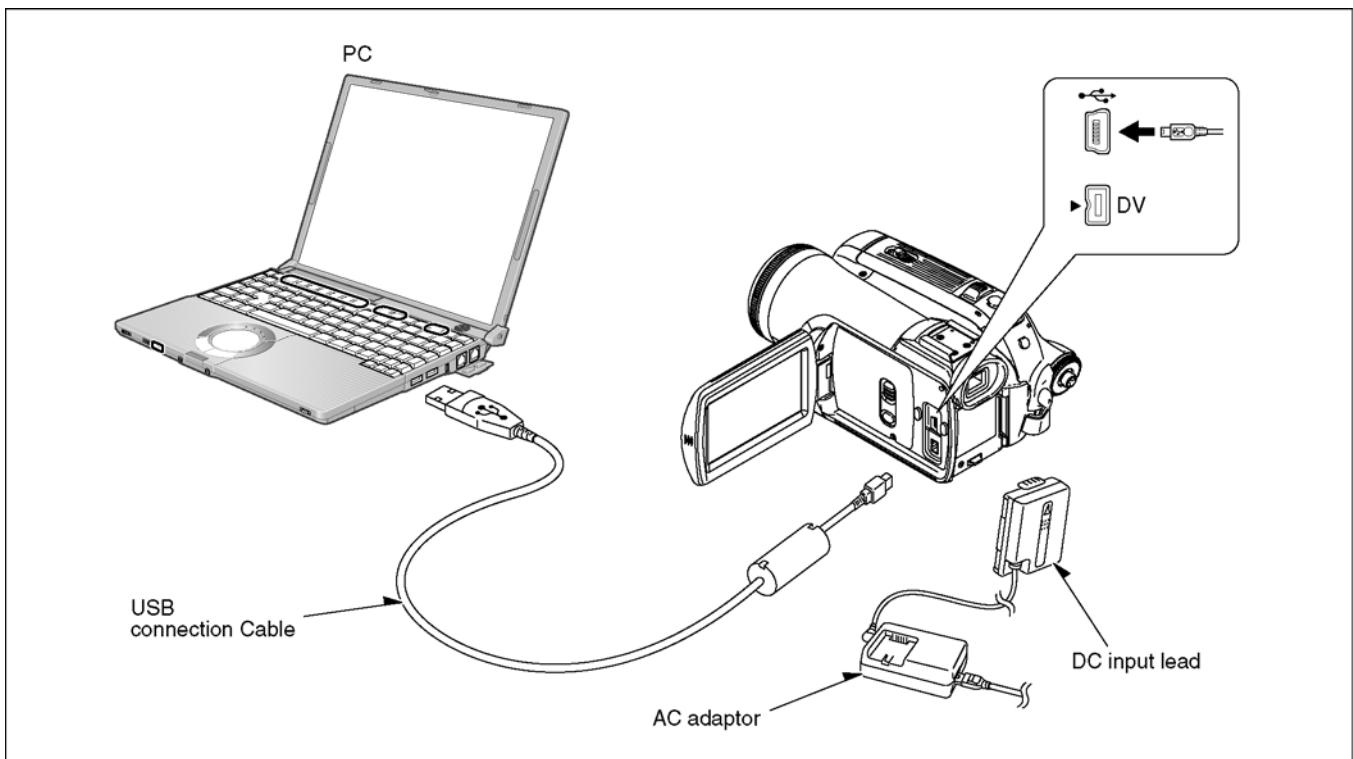

Fig. E1

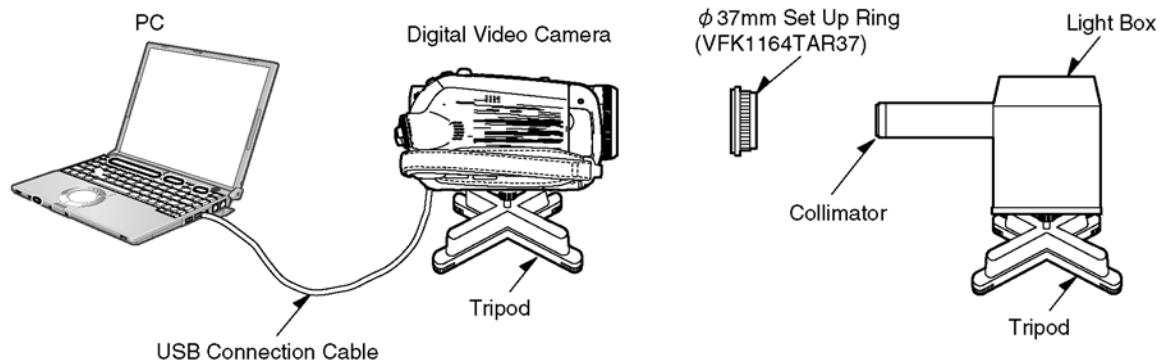

Fig. E2 Rough image of set-up connection

Ref	Name	Parts No.	Q'ty	Remarks
1	DV Camcorder	---	1	The Camcorder being adjusted.
2	Personnel Computer	---	1	With Tatsujin Software.
3	AC Adaptor	---	1	The AC Adaptor for DV Camcorder.
4	DC Output Cable	---	1	The AC Adaptor for DV Camcorder.
5	Step Up Ring	VFK1164TAR37	1	For Collimator 37mm
6	TATSUJIN PC-Adjustment Program	VF0D2003AV30	1	

### 9.3.3. Set up PC-EVR adjustment program

1. Turn on the PC and install the TATSUJIN Adjustment Program into the PC.
2. TATSUJIN PC-Adjustment Program start in the following procedure.  
PC Menu : [Start] → [Program] → [win Tatsujin] → [DV Movie] → [NV-GS300 Series]

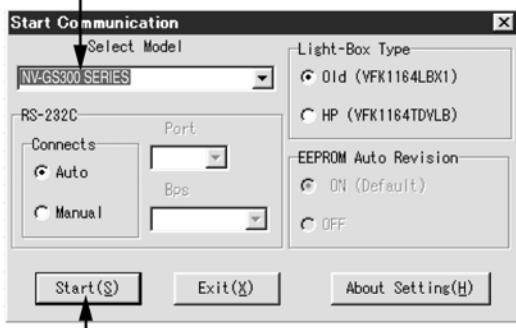

Fig. E3-1

The main menu display will be displayed.

3. Select the desired model.
4. Turn on the camcorder. Then, click "Start."

① Select the desired model.

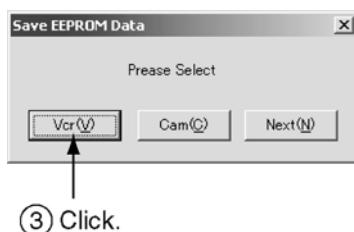

② Click to start.

Fig. E3-2

5. The communication is complete, and the dialog will appear.

Then, click "VCR (V)" or Cam (C)" to save the EEPROM data,

③ Click.

Fig. E3-3

6. Saving for EEPROM data is complete, menu will appear. To perform each adjustment, display the adjustment menu by selecting the desired menu from "Camera Adjust," "Video Adjust," "LCD Adjust" or "EVF Adjust" and select each adjustment item.

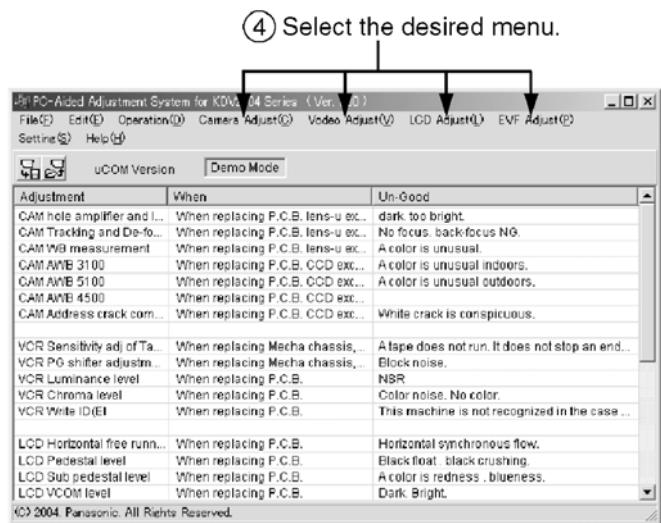

Fig. E3-4

Note:

The adjustment data is stored to the EEPROM IC after each adjustment.

7. After adjustment, to end the software, select "Exit" in File menu or close the window.

⑤ Select "Exit" or close the window.

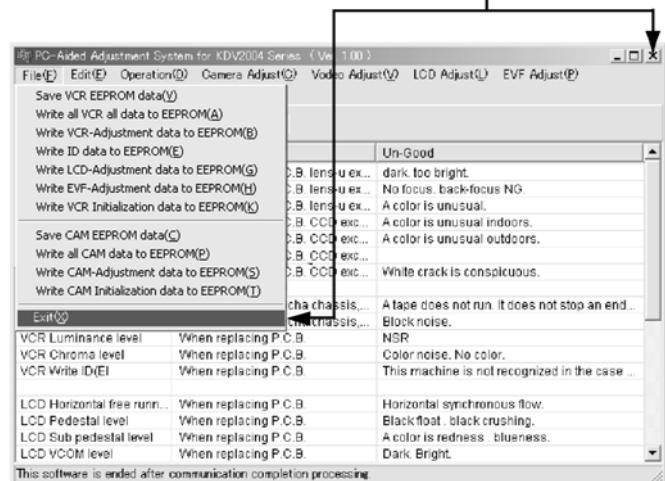

Fig. E3-5

### 9.3.4. Initial guideline

The table below shows which adjustments are necessary according to the unit parts and individual parts to be replaced. Make sure to perform these adjustments shown below as necessary.

Adjustment Item		Replacement Parts											
		Sub P.C.B.	Main P.C.B.	IC307 (EEPROM)	IC2006 (EEPROM)	Lens Unit	Prism Unit	Iris Unit	4th Lens Frame Unit	Cylinder Unit	Main Chassis Unit	LCD Panel	EVF P.C.B.
Camera	CAM hole amplifier / Iris PWM	○	○	○	○	○	○	○	○	○	○	○	
	CAM Tracking and De-focus	○	○	○	○	○	○	○	○	○	○	○	
	CAM Revision CCD scratch	○	○	○	○	○	○	○	○	○	○	○	
	CAM ALC adjustment	○	○	○	○	○	○	○	○	○	○	○	
	CAM AWB adjustment	○	○	○	○	○	○	○	○	○	○	○	
Video	VCR Sensitivity ADJ. of Tape sensors	○	○	○	○	○	○	○	○	○	○	○

## 9.4. Mechanical Adjustment Procedures

### 9.4.1. Adjustment item

Item	Adjustment at the time of the part exchange		
	Half finished goods mechanism	Cylinder	Remarks
Linearity adjustment & BER value confirmation	○	○	

### 9.4.2. Adjustment procedures

Pay attention, because the adjustment method is different from this machine.

#### I Linearity adjustment & BER value confirmation

1. Remove the mechanism adjustment cover of this machine as shown in Fig. D1.
2. Remove the front case unit. (Refer to Disassembly Procedures.)
3. The envelope detection special tool board (VFK1641) is connected to this machine as shown in Fig. D2 and D3.

##### Note:

Be careful not to damage when the Passive Probe is connected to the connection terminal of Main P.C.B..  
It exists the possibility of the damage.

4. The envelope detection special tool board is connected to oscilloscope as shown in Fig. D2 and D3.  
Connect the AV Jack of this machine and the oscilloscope by using the Multi cable.
5. The post is adjusted with the post driver(VFK1899) so that recycles the normal tape which recorded NTSC signal and the detection wave-link become a flat as shown in Fig. D4.  
\*At the time of the cylinder unit exchange unnecessary.
6. The post is adjusted with the post driver so that recycles a alignment tape(VFM3110EDS) and the detection wave-link become a flat once again.
7. Recycling the tape that video-taped it with this machine after adjustment, the BER value is confirmed with the item of the BER confirmation of expert soft inside.

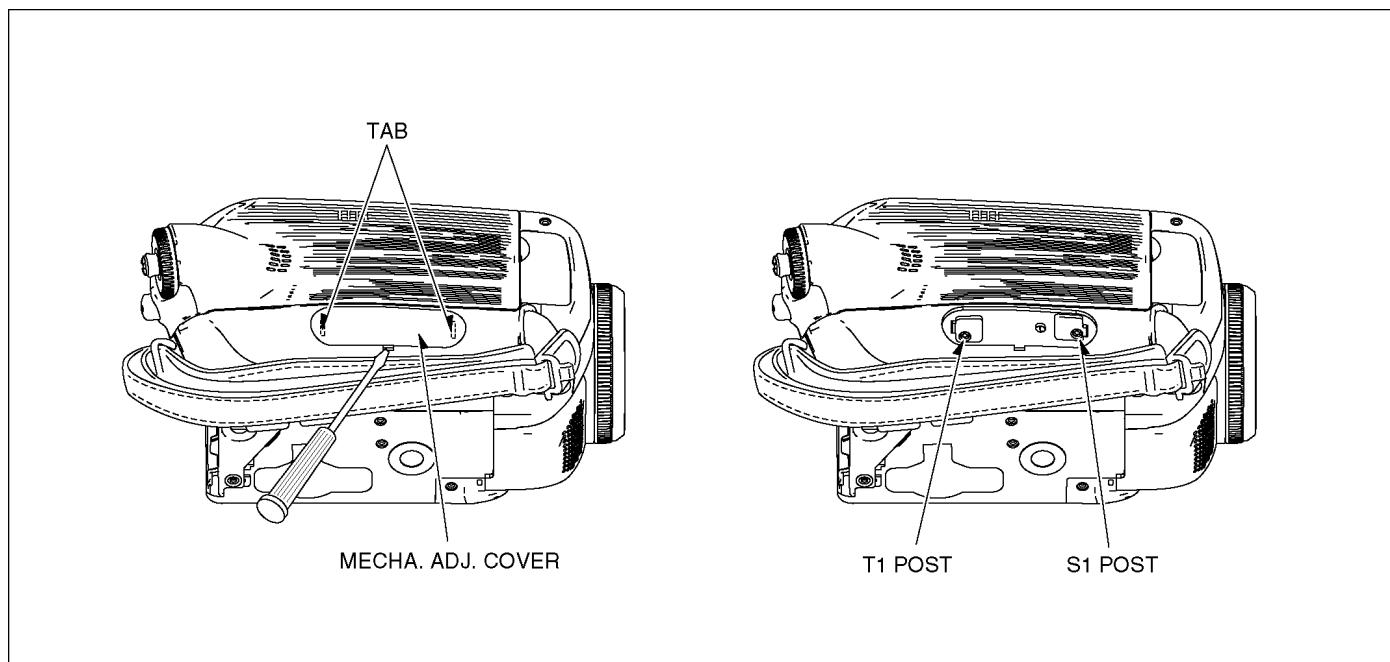

Fig. D1

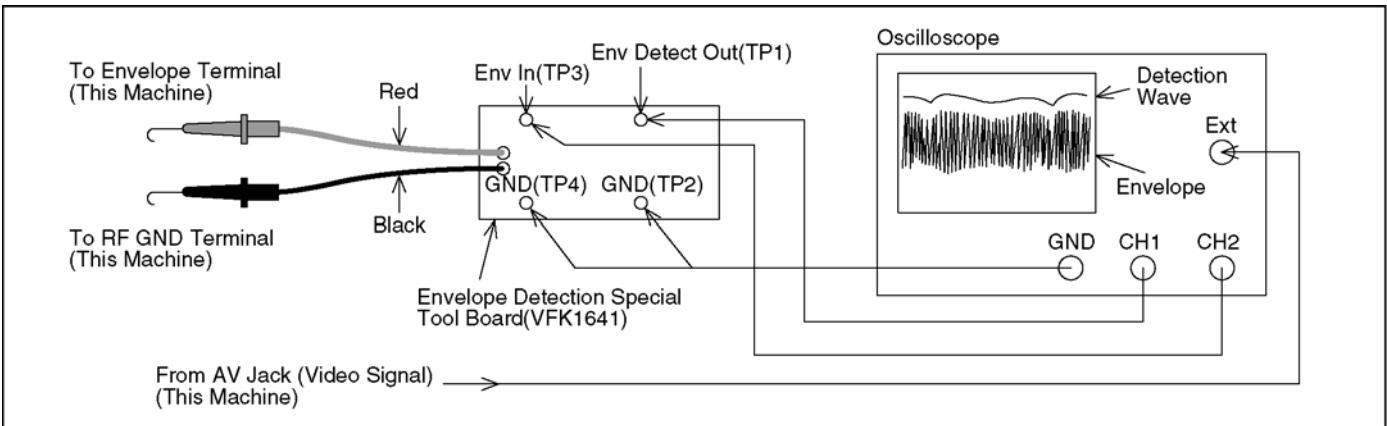

Fig. D2

**Note:**

Be careful not to damage when the Passive Probe is connected to the connection terminal of the Main P.C.B.. It exists the possibility of the damage.

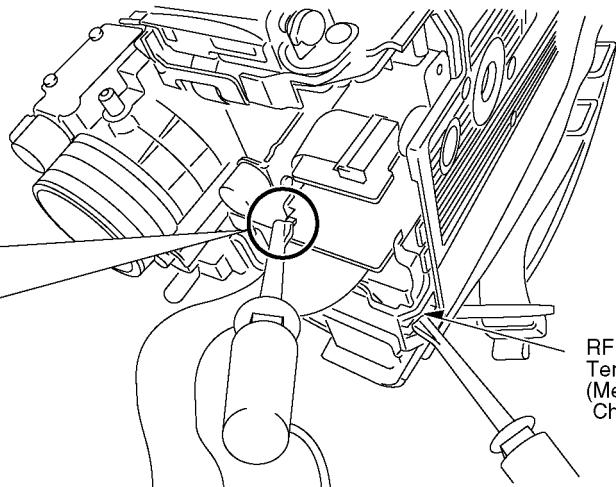

Fig. D3

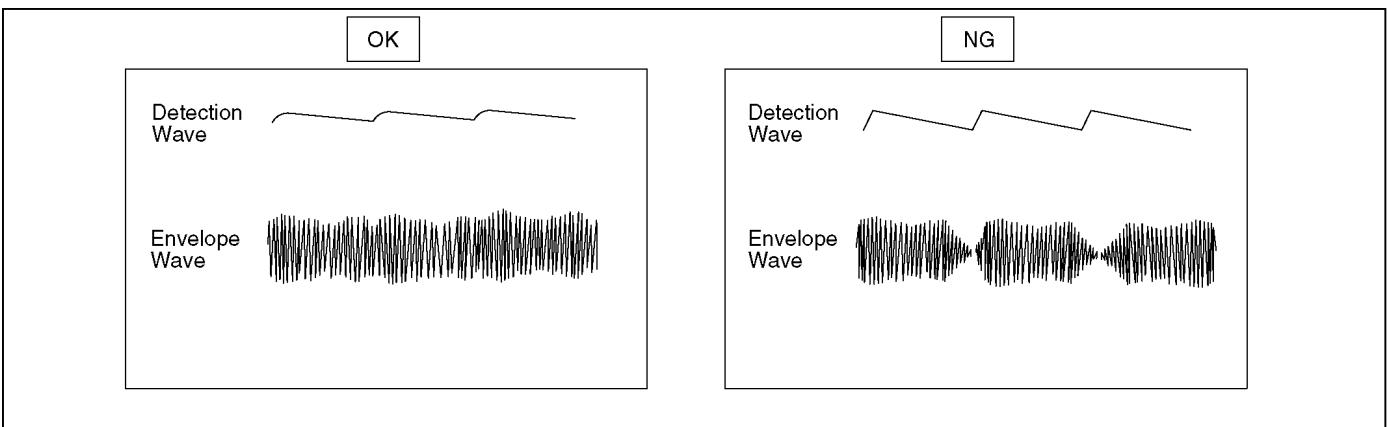

Fig. D4

# **10 Maintenace**

## **10.1. Cleaning Lens, Viewfinder and LCD Panel**

Do not touch the surface of lens, Viewfinder and LCD Panel with your hand.

When cleaning the lens, use air-Blower to blow off the dust.

When cleaning the LCD Panel, dampen the lens cleaning paper with lens cleaner, and the gently wipe the their surface.

**Note:**

A lens cleaning paper and lens cleaner are available at local camera shops and market place.

# Service Manual

### S1. About Indication of The Schematic Diagram

#### S1.1. Important Safety Notice

COMPONENTS IDENTIFIED WITH THE MARK  HAVE THE SPECIAL CHARACTERISTICS FOR SAFETY. WHEN REPLACING ANY OF THESE COMPONENTS USE ONLY THE SAME TYPE.

- 1.Although reference number of the parts is indicated on the P.C.B. drawing and/or schematic diagrams, it is NOT mounted on the P.C.B. when it is displayed with "\$" mark.
- 2.It is only the "Test Round" and no terminal (Pin) is available on the P.C.B. when the TP (Test Point) indicated as "●" mark.
- 3.The voltage being indicated on the schematic diagram is measured in "Standard-Playback" mode when there is no specify mode is mentioned.
- 4.Although the voltage and waveform available on here is measured with standard frame, it may be differ from actual measurement due to modification of circuit and so on.
- 5.The voltage being indicated here may be include observational-error (deviation) due to internal-resistance and/or reactance of equipment. Therefore, handle the value indicated on here as reference.
- 6.Use the parts number indicated on the Replacement Parts List .
- 7.Indication on Schematic diagrams:

## S2. Voltage and Waveform Chart

Note) Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

## S6. Replacement Parts List

- Note:
- 1.\* Be sure to make your orders of replacement parts according to this list.
  2. **IMPORTANT SAFETY NOTICE**  
Components identified with the mark  have the special characteristics for safety.  
When replacing any of these components, use only the same type.
  3. Unless otherwise specified,  
All resistors are in OHMS, K=1,000 OHMS. All capacitors are in MICRO-FARADS (uf), P=uuF.
  4. The marking (RTL) indicates the retention time is limited for this item. After the discontinuation of this assembly in production, it will no longer be available.

**E.S.D. standards for Electrostatically Sensitive Devices, refer to “PREVENTION OF ELECTROSTATIC DISCHARGE (ESD) TO ELECTROSTATICALLY SENSITIVE (ES) DEVICES” section.**
