1 Safety Precaution

1.1. General Guidelines

1. IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by  in the Schematic Diagrams, Circuit Board Layout, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent X-RADIATION, shock fire, or other hazards. Do not modify the original design without permission of manufacturer.

2. An Isolation Transformer should always be used during the servicing of AC Adaptor whose chassis is not isolated from the AC power line. Use a transformer of adequate power rating as this protects the technician from accidents resulting in personal injury from electrical shocks. It will also protect AC Adaptor from being damaged by accidental shorting that may occur during servicing.
3. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
4. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
5. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

1.1.1. Leakage current cold check

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
2. Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be between $1M\Omega$ and $5.2M\Omega$. When the exposed metal does not have a return path to the chassis, the reading must be infinity.

1.1.2. Leakage current hot check (See Figure 1)

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect **A** to exposed metallic part on the set. And connect **B** to a good earth ground, as shown in Figure 1.
3. Use an AC voltmeter, with $1 k\Omega/V$ or more sensitivity, to measure the potential across the resistor.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
6. The potential at any point should not exceed 0.75 V RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed $1/2$ mA. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

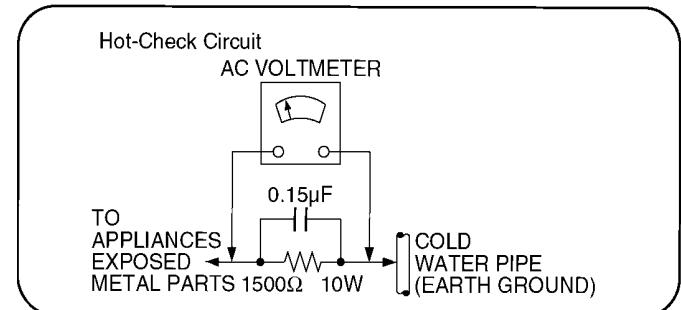

Figure 1

2 Warning

2.1. Caution for AC Cord (VJA0940 type)

2.1.1. Information for your safety

IMPORTANT

Your attention is drawn to the fact that recording of pre-recorded tapes or discs or other published or broadcast material may infringe copyright laws.

WARNING

To reduce the risk of fire or shock hazard, do not expose this equipment to rain or moisture.

CAUTION

To reduce the risk of fire or shock hazard and annoying interference, use the recommended accessories only.

FOR YOUR SAFETY

DO NOT REMOVE THE OUTER COVER

To prevent electric shock, do not remove the cover. No user serviceable parts inside. Refer servicing to qualified service personnel.

2.1.2. Caution for AC mains lead

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three-pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5 amperes and it is approved by ASTA or BSI to BS1362

Check for the ASRA mark or the BSI mark on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover, the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local Panasonic Dealer.

If the fitted moulded plug is unsuitable for the socket outlet in your home then the fuse should be removed and the plug cut off and disposed of safely.

There is a danger of severe electrical shock if the cut off plug is inserted into any 13-ampere socket.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt, please consult a qualified electrician.

2.1.2.1. Important

The wires in this mains lead are coloured in accordance with the following code:

Blue	Neutral
Brown	Live

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.

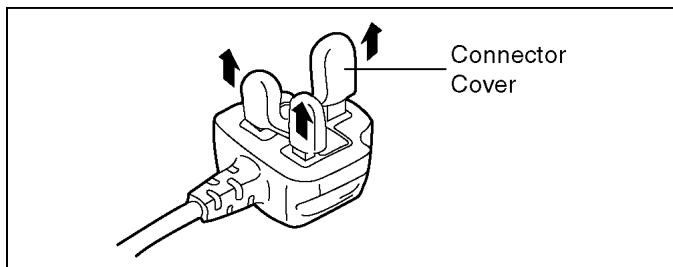

The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

Under no circumstances should either of these wires be connected to the earth terminal of the three pin plug, marked with the letter E or the Earth Symbol.

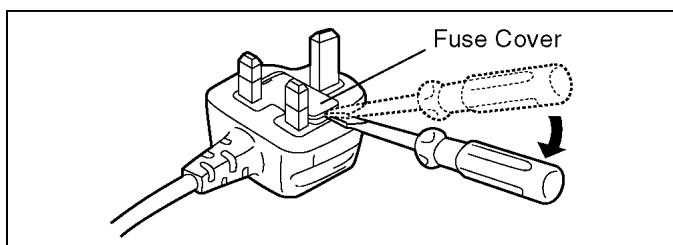

2.1.2.2. Before use

remove the Connector Cover as follows.

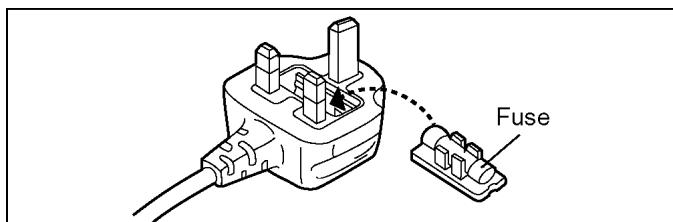

2.1.2.3. How to replace the Fuse

1. Remove the Fuse Cover with a screwdriver.

2. Replace the fuse and attach the Fuse cover.

2.2. Prevention of Electro Static Discharge (ESD) to Electrostatically Sensitive (ES) Devices

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor chip components. The following techniques should be used to help reduce the incidence of component damage caused by electro static discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an antistatic solder removal device. Some solder removal devices not classified as antistatic (ESD protected) can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

CAUTION:

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety.

These parts are marked by  in the schematic diagrams, Exploded Views and replacement parts list. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

2.3. Handling the Lead-free Solder

2.3.1. General description about Lead Free Solder (PbF)

The lead free solder has been used in the mounting process of all electrical components on the printed circuit boards used for this equipment in considering the globally environmental conservation.

The normal solder is the alloy of tin (Sn) and lead (Pb). On the other hand, the lead free solder is the alloy mainly consists of tin (Sn), silver (Ag) and Copper (Cu), and the melting point of the lead free solder is higher approx.30 degrees C (86 °F) more than that of the normal solder.

Definition of PCB Lead Free Solder being used

The letter of PbF is printed either foil side or components side on the PCB using the lead free solder. (See right figure)	PbF
--	------------

Service caution for repair work using Lead Free Solder (PbF)

- The lead free solder has to be used when repairing the equipment for which the lead free solder is used.
- (Definition: The letter of **PbF** is printed on the PCB using the lead free solder.)
- To put lead free solder, it should be well molten and mixed with the original lead free solder.
- Remove the remaining lead free solder on the PCB cleanly for soldering of the new IC.
- Since the melting point of the lead free solder is higher than that of the normal lead solder, it takes the longer time to melt the lead free solder.
- Use the soldering iron (more than 70W) equipped with the temperature control after setting the temperature at 350 ± 30 degrees C (662 ± 86 °F).

Recommended Lead Free Solder (Service Parts Route.)

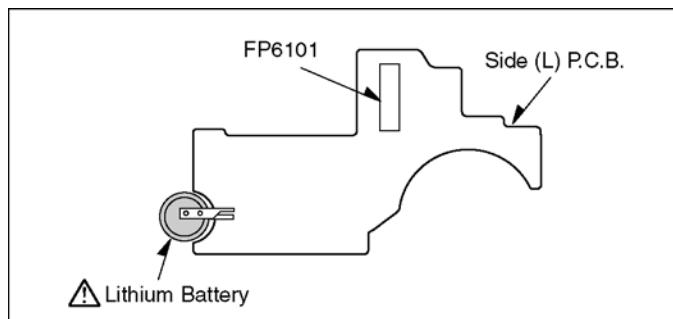

- The following 3 types of lead free solder are available through the service parts route.
RFKZ03D01K-----(0.3mm 100g Reel)
RFKZ06D01K-----(0.6mm 100g Reel)
RFKZ10D01K-----(1.0mm 100g Reel)

Note

* Ingredient: tin (Sn) 96.5%, silver (Ag) 3.0%, Copper (Cu) 0.5%, Cobalt (Co) / Germanium (Ge) 0.1 to 0.3%

2.4. How to Replace the Lithium Battery (PROCEDURE)

1. Remove the Side (L) P.C.B.. (Refer to Disassembly Procedures.)
2. Unsolder the Lithium Battery [ML-621S/F9D](#) and then replace the new one. (See Figure B1.)
3. Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.

CAUTION

The battery used in this device may present a risk of fire or chemical burn if mistreated.
Do not recharge, disassemble, heat above 100°C (212°F), or incinerate.
Replace battery with Panasonic part number ML-621S/F9D only.
Use of another battery may present a risk of fire or explosion.
Dispose of used battery promptly.
Keep away from children.
Do not disassemble and do not dispose of in fire.

Fig. B1

Note:

The lithium battery is a critical component. (Type No.: ML-621S/F9D)
It must never be subjected to excessive heat or discharge.
It must therefore only be fitted in equipment designed specifically for its use.
Replacement batteries must be of the same type and manufacture.
They must be fitted in the same manner and location as the original battery, with the correct polarity contacts observed.
Do not attempt to re-charge the old battery or re-use it for any other purpose.
It should be disposed of in waste products destined for burial rather than incineration.

CAUTION

Danger of explosion if battery is incorrectly replaced.
Replace only with the same or equivalent type recommended by the equipment manufacturer.
Discard used batteries according to manufacturer's instructions.

PRECAUTION

Le fait de remplacer incorrectement la pile peut présenter des risques d'explosion.
Remplacer la pile uniquement par une pile identique ou de type équivalent recommandée par le fabricant. Se débarrasser des piles usagées conformément aux instructions du fabricant.

VORSICHT

Bei einer falsch eingesetzten Batterie besteht Explosionsgefahr. Nur mit einer vom Hersteller empfohlenen Batterie vom gleichen Typ ersetzen.
Verbrauchte Batterien beim Fachhändler oder einer Sammelstelle für Sonderstoffe abliefern.

VARNING

Explosionsfara vid felaktigt batteribyte.
Använd samma batterityp eller en ekvivalent typ som rekommenderas av apparattillverkaren.
Kassera använt batteri enligt fabrikantens instruktion.

ADVARSEL!

Lithiumbatteri-Eksplorationsfare ved fejlagtig håndtering.
Udskiftning må kun ske med batteri af samme fabrikat og type.
Levér det brugte batteri tilbage til leverandøren.

VAROITUS

Paristo voi räjähtää, jos se on virheellisesti asennettu.
Vaihda paristo ainoastaan laitevalmistajan suosittelemaan tyypin.
Hävitä käytetty paristo valmistajan ohjeiden mukaisesti.

3 Service Navigation

3.1. Service Information

This service manual contains technical information which will allow service personnel's to understand and service this model.

Please place orders using the parts list and not the drawing reference numbers.

If the circuit is changed or modified, this information will be followed by supplement service manual to be filed with original service manual.

Note 1:

These movie camera uses AC Adaptor VSK0644.

Note 2:

1) This service manual does not contain the following information, because of the impossibility of servicing at component level.

1. Schematic Diagram, Block Diagram and P.C.B. layout of Main P.C.B./Sub P.C.B.

2. Parts List for individual parts of Main P.C.B./Sub P.C.B.

2) The following category are recycle module part. Please send them to Central Repair Center.

*Main P.C.B.

(VEP03G87K: NV-GS500EG/E/EB/EP, VEP03G87L: NV-GS500EE/GC/GN/SG, VEP03G87M: NV-GS508GK,
VEP03G87Q: NV-GS500GT, VEP03G87R: NV-GS500PL, VEP03G87U: NV-GS500GCT)

*Sub P.C.B.

(VEP23646B: NV-GS500EG/E/EB/EP/EE/GC/GN/SG/GCT, GS508GK, VEP23646C: NV-GS500PL/GT)

When a part replacement is required for repairing each Main P.C.B. and/or Sub P.C.B., replace the assembly parts.
(Main P.C.B. and/or Sub P.C.B.)

The following circuits are contained in Main P.C.B.

1. Main Connection Circuit
2. AVIO Circuit
3. Video Circuit
4. Power Circuit
5. Control Circuit

The following circuit is contained in Sub P.C.B..

1. Sub Connection Circuit
2. Camera Circuit
3. Lens Drive Circuit

3.2. Service Caution

3.2.1. How to Discharge the Capacitor on the Front P.C.B.

Remove the Front P.C.B.. (Refer to Disassembly Procedures.)

CAUTION

Be sure to discharge the capacitor on Front P.C.B. before disassembling.

CAUTION

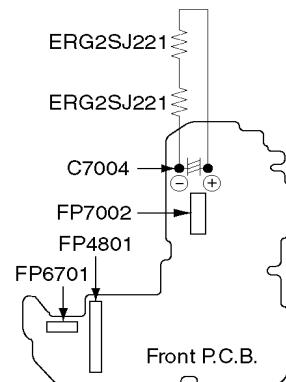

Be careful of the high voltage circuit on Front P.C.B. when servicing.

Method:

1. Prepare the 2 Resistors (ERG2SJ221:220 ohm/2w) for discharge.

Note:

- Above 2 Resistors may be substituted with equivalent type.
2. Make short circuit using 2 Resistors between C7004(+) and C7004(-) for 3 seconds as follows.
3. After discharging, confirm that the capacitor voltage is sufficiently lowered using a voltmeter

3.2.2. EEPROM data for spare parts of the Main P.C.B.

When the Main P.C.B. is replaced, the fixed and average data must be changed by Tatsujin kit according to the Movie Camera's suffix.

Then, confirm and/or adjust the VTR and Camera section one by one.

4 Specifications

Digital Video Camera / Recorder

ITEM	SPECIFICATION	ITEM	SPECIFICATION
POWER	Source: DC 7.9 / 7.2 V Consumption: Recording 4.2 W (When using Viewfinder) 4.5 W (When using LCD Monitor)	STANDARD ILLUMINATION	1,400 lx
		MINIMUM REQUIRED ILLUMINATION	2 lx (Colour Night View Mode)
RECORDING FORMAT	Mini DV (Consumer-use Digital Video SD Format)	USB	Card reader/writer function, USB 2.0 compliant (Hi-Speed) No copyright protection support Pict Bridge-Compliant
TAPE USED	6.35 mm digital video tape		DV Input/Output Terminal (IEEE1394, 4-pin)
RECORDING / PLAYBACK TIME	SP mode: 80 min. with DVM80 LP mode: 120 min. with DVM80	DIGITAL INTERFACE

Weight and dimensions are approximate values.
Specifications may change without prior notice.

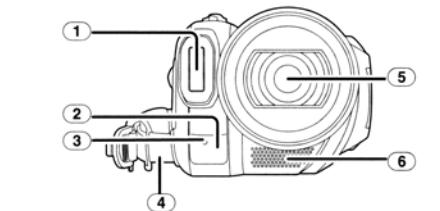

5 Location of Controls and Components

Followings are the Location of Controls and Components for NV-GS500EB as a sample.

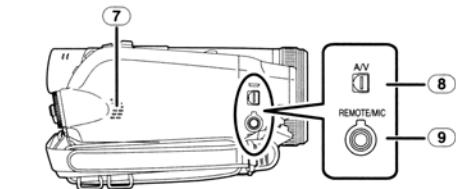

For other models, refer to each Operatin Instructions.

Parts identification and handling

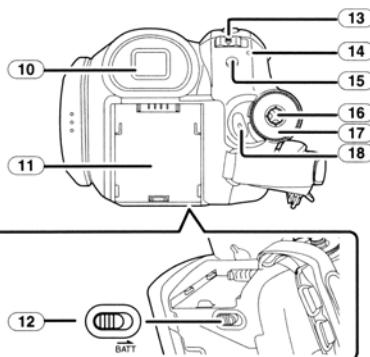

■ Camera

- ① Built-in video flash
- ② White balance sensor
- ③ Remote control sensor
- ④ Recording lamp
- ⑤ Grip belt
(One-touch free-style grip belt)
- ⑥ Lens (LEICA DICOMAR)
- ⑦ Microphone (built-in, stereo)

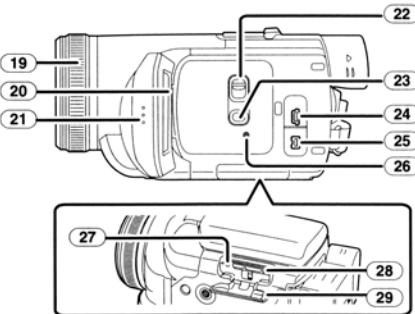

- ⑧ Speaker
- ⑨ Audio-video/S-Video output terminal [A/V]
 - Use the supplied Multi cable only, otherwise audio may not be played back normally.
- ⑩ Terminal for free style remote control [REMOTE]
- ⑪ Microphone terminal [MIC]
 - A compatible plug-in powered microphone can be used as an external microphone.
 - When the movie camera is connected with AC adaptor, sometimes noise may be heard depending on microphone type. In that case, please switch to battery for power supply and noise will stop.

10 Viewfinder

Due to limitations in LCD production technology, there may be some tiny bright or dark spots on the Viewfinder screen. However, this is not a malfunction and does not affect the recorded picture.

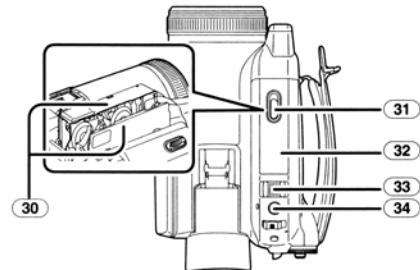

- ⑪ Battery holder
- ⑫ Battery release lever [BATT]
- ⑬ Power switch [OFF/ON]
- ⑭ Status indicator
- ⑮ Menu button [MENU]
- ⑯ Joystick
- ⑰ Mode dial
- ⑱ Recording start/stop button

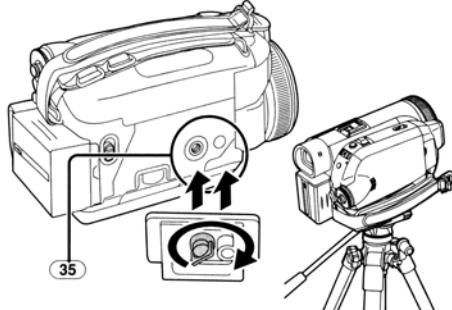

- ⑯ Focus ring
- ⑰ LCD monitor

Due to limitations in LCD production technology, there may be some tiny bright or dark spots on the LCD monitor screen. However, this is not a malfunction and does not affect the recorded picture.

- ① LCD monitor open part [OPEN]
- ② Mode select switch [AUTO/MANUAL/FOCUS]
- ③ Power LCD button [POWER LCD]
- ④ USB terminal [←]
- ⑤ DV input/output terminal [DV]
- ⑥ Reset button [RESET]
- ⑦ Card access lamp
- ⑧ Card slot
- ⑨ Card slot cover

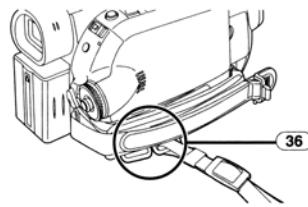

- ⑩ Cassette holder
- ⑪ Cassette eject lever [OPEN/EJECT]
- ⑫ Cassette cover
- ⑬ Zoom lever [W/T]
- ⑭ Volume lever [-/+ / VOL+]
- ⑮ Photoshot button [PHOTO SHOT]

⑯ Tripod receptacle

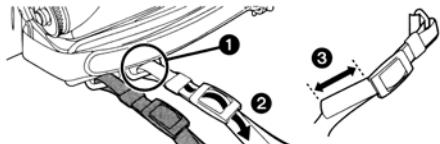

This is a hole for attaching the camera to optional tripod/VW-CT45E. (Please carefully read the operating instructions for how to attach the tripod to the camera.)

- When the tripod is used, operate the camera from the free style remote control for convenience. (When not using the remote control, attach the clip to the grip belt for convenience. When you move with remote control attached to a pocket, etc., take care to avoid falling of the tripod.)
- You cannot open the card slot cover when the tripod is used. Insert the card first and then attach the tripod.

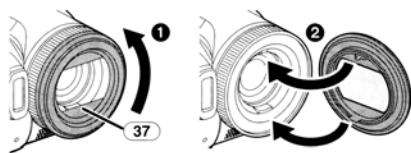

⑰ Shoulder strap fixture

This is a fixture for attaching the shoulder strap to hang the camera from your neck or shoulder.

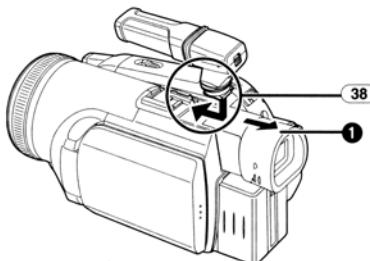

- Put the strap through the fixture ① and through the stopper ② so it will not come off. Extend part ③ by at least 2 cm.
- Fit the other end of the belt similarly.

⑱ Lens hood

In order to remove the lens hood, rotate it counterclockwise ①. In order to fit it, put into slot ②, and then rotate it clockwise.

⑲ Smart accessory shoe

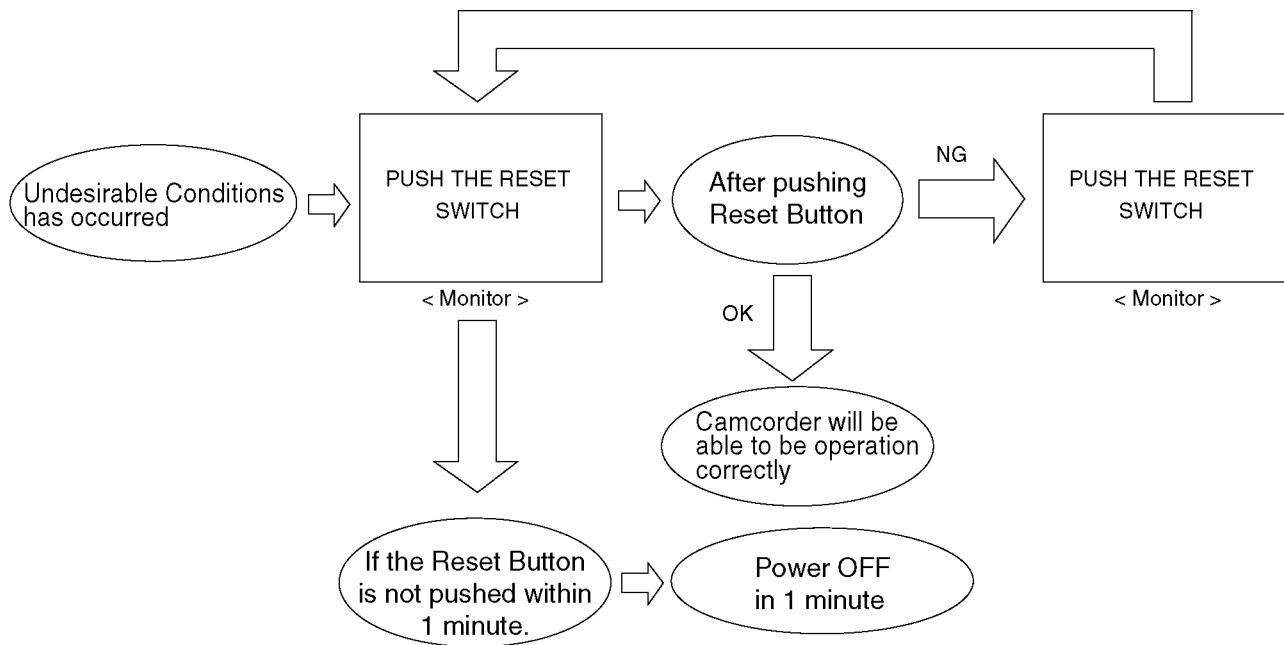

The stereo zoom microphone /VW-VMH3E (optional) or the video DC light/VW-LDH3E (optional) should be mounted here.

- When mounting or removing the accessory, extend the viewfinder (①).
- When using an accessory for the smart accessory shoe, the power is supplied from this product.

6 Service Mode

6.1. Error Display

PUSH THE RESET SWITCH is displayed automatically on the EVF or the LCD Monitor when an undesirable condition has occurred.

Note:

When "PUSH THE RESET SWITCH" is displayed repeatedly, required.

Check the Error Code which is listed in the Service Menu.

6.2. Service Menu

When abnormal detection contents are confirmed a When I do the following operation automatic diagnosis cord is displayed.

1. Preparation

Remove the card and tape from this machine.

2. Service menu is displayed. (see Fig. S1)

Pushed [PHOTO SHOT] button and [JOYSTICK LEFT \blacktriangleleft] button and [AUTO/MANUAL/FOCUS switch to FOCUS] button simultaneously for 3 seconds.

3. Operating automatic diagnosis cord is displayed.

Item [3] is selected with the [JOYSTICK UP or DOWN $\blacktriangleup/\blacktriangledown$] button.

[NO] is selected with the [JOYSTICK RIGHT \blacktriangleright] button.

[YES] is selected with the [JOYSTICK UP or DOWN $\blacktriangleup/\blacktriangledown$] button.

Press the [JOYSTICK CENTER] button.

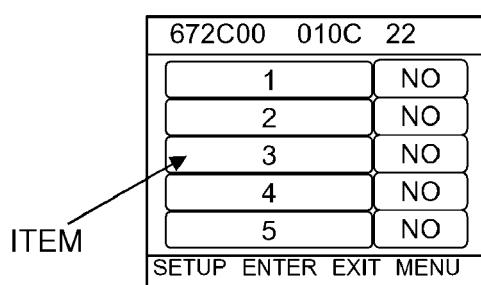

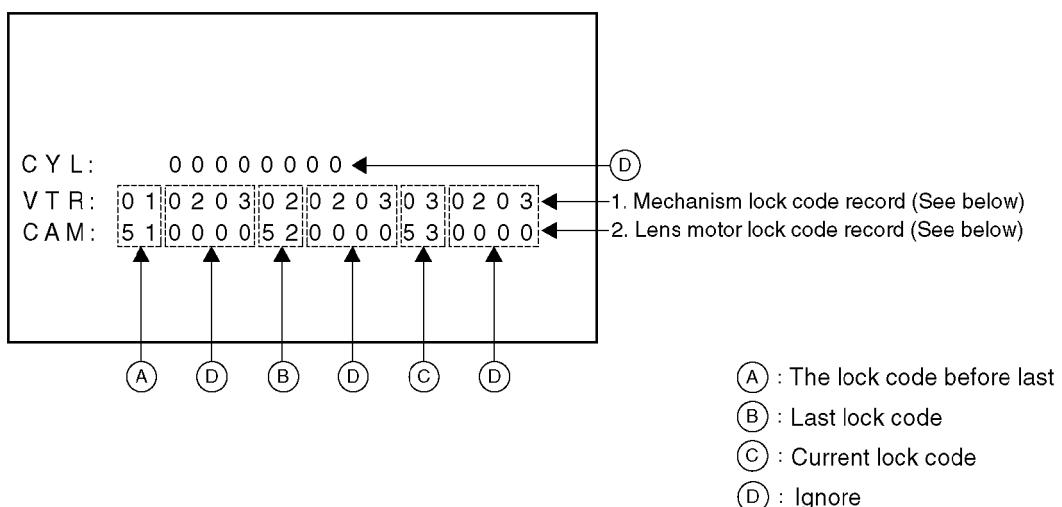

Fig. S1

NOTE:

Do not operate items Except for 3 in the Service Menu.

Self diagnosis cord contents are as follows.

Display contents (self diagnosis cord contents)

Mechanism & Lens motor lock code	
DISPLAY	CONDITION
01	T-REEL LOCK
02	S-REEL LOCK
03	UNLOADING LOCK
04	LOADING LOCK
05	CYLINDER
51	ZOOM MOTOR LOCK
52	FOCUS MOTOR LOCK

Turn off the power supply after confirmation.

Please do the error cord backup record the clear after repair completion.

CLEAR METHOD

If the Card and Tape inserted, take out it before Service Mode operation.

Making the mode dial of This Machine a tape recording mode, push [JOYSTICK LEFT] button and [AUTO/MANUAL/FOCUS] switch to FOCUS] button and [RECORDING START/STOP] button simultaneously for 3 seconds.

7 Service Fixture & Tools

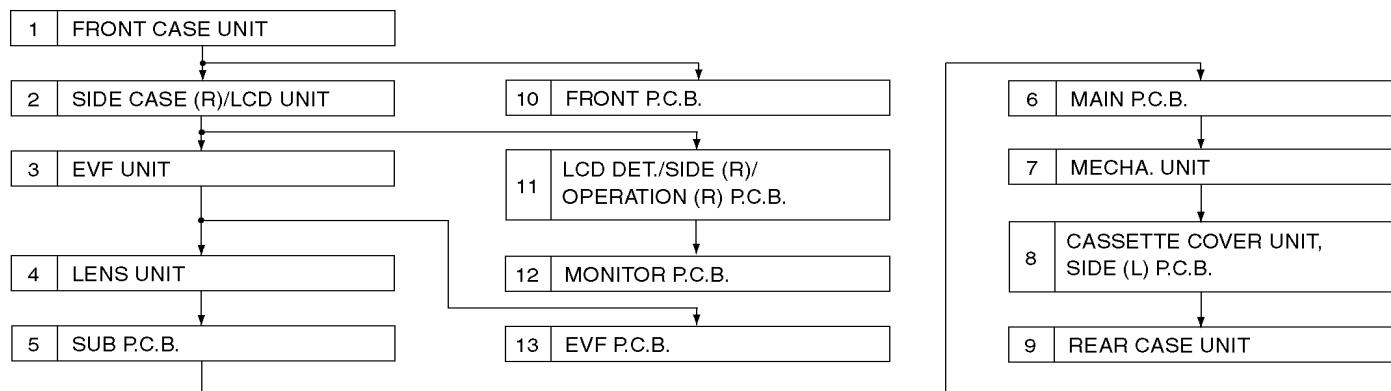

7.1. Service Tools and Equipment

Parts Name	Parts No.	Q'ty	Remarks
Step Up Ring	VFK1164TAR43	1	For Collimator 43mm

8.5. Disassembly Procedures of Camera Lens Unit

The following flowchart describes order or steps for removing the Camera lens unit and certain printed circuit boards in order to make access to the item needing service.

To reassemble the unit follow the steps in reverse order.

Note 1:

Each Ref.numbers are equivalent to number of Fig.L2 and Parts List.

Fig. L1

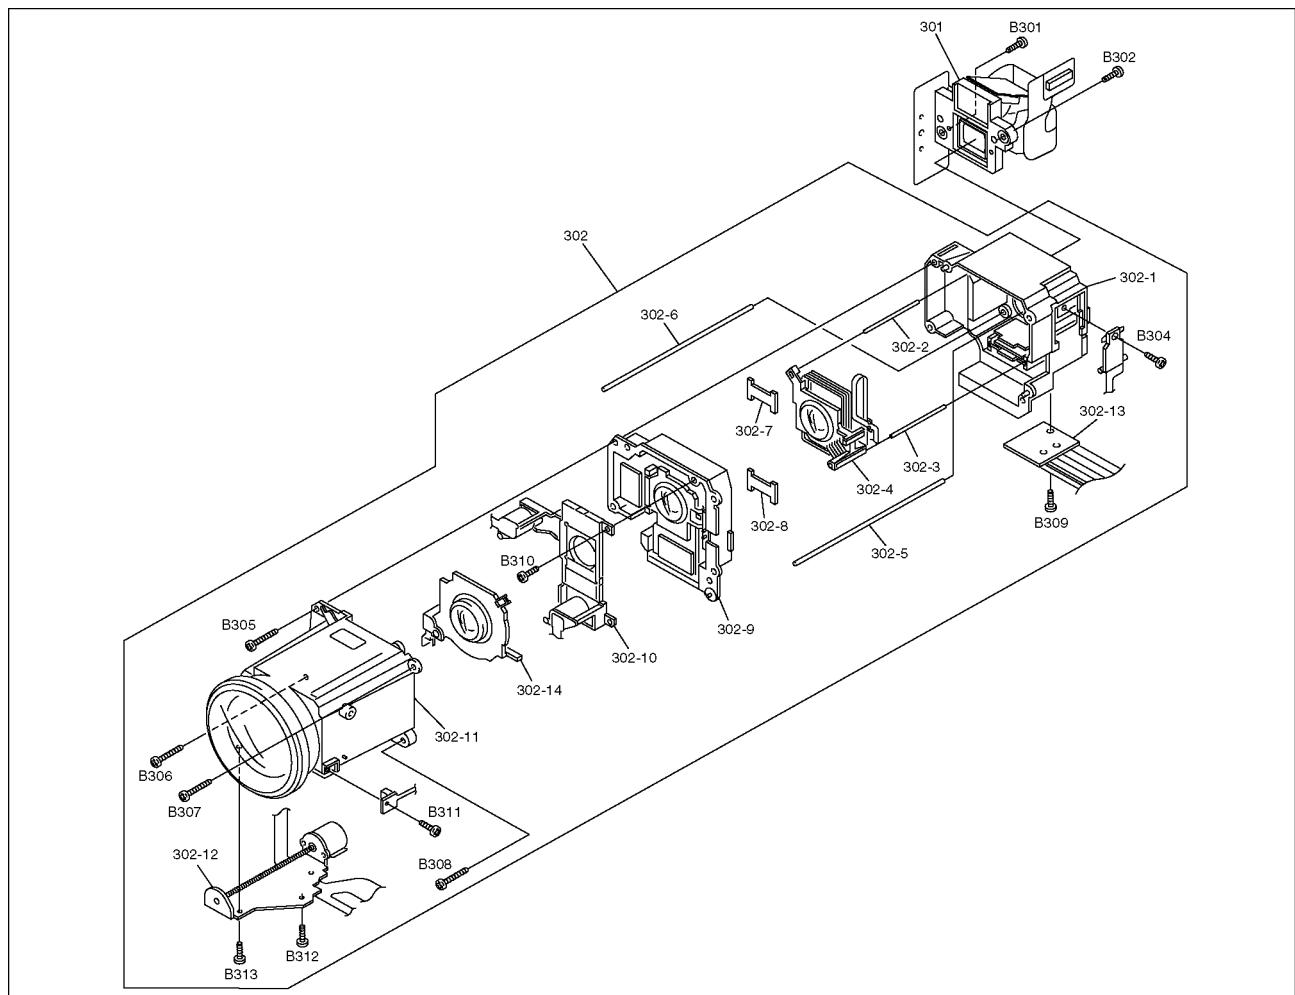

Fig. L2

9 Measurements and Adjustments

9.1. Service Positions

9.1.1. List of the extension cables

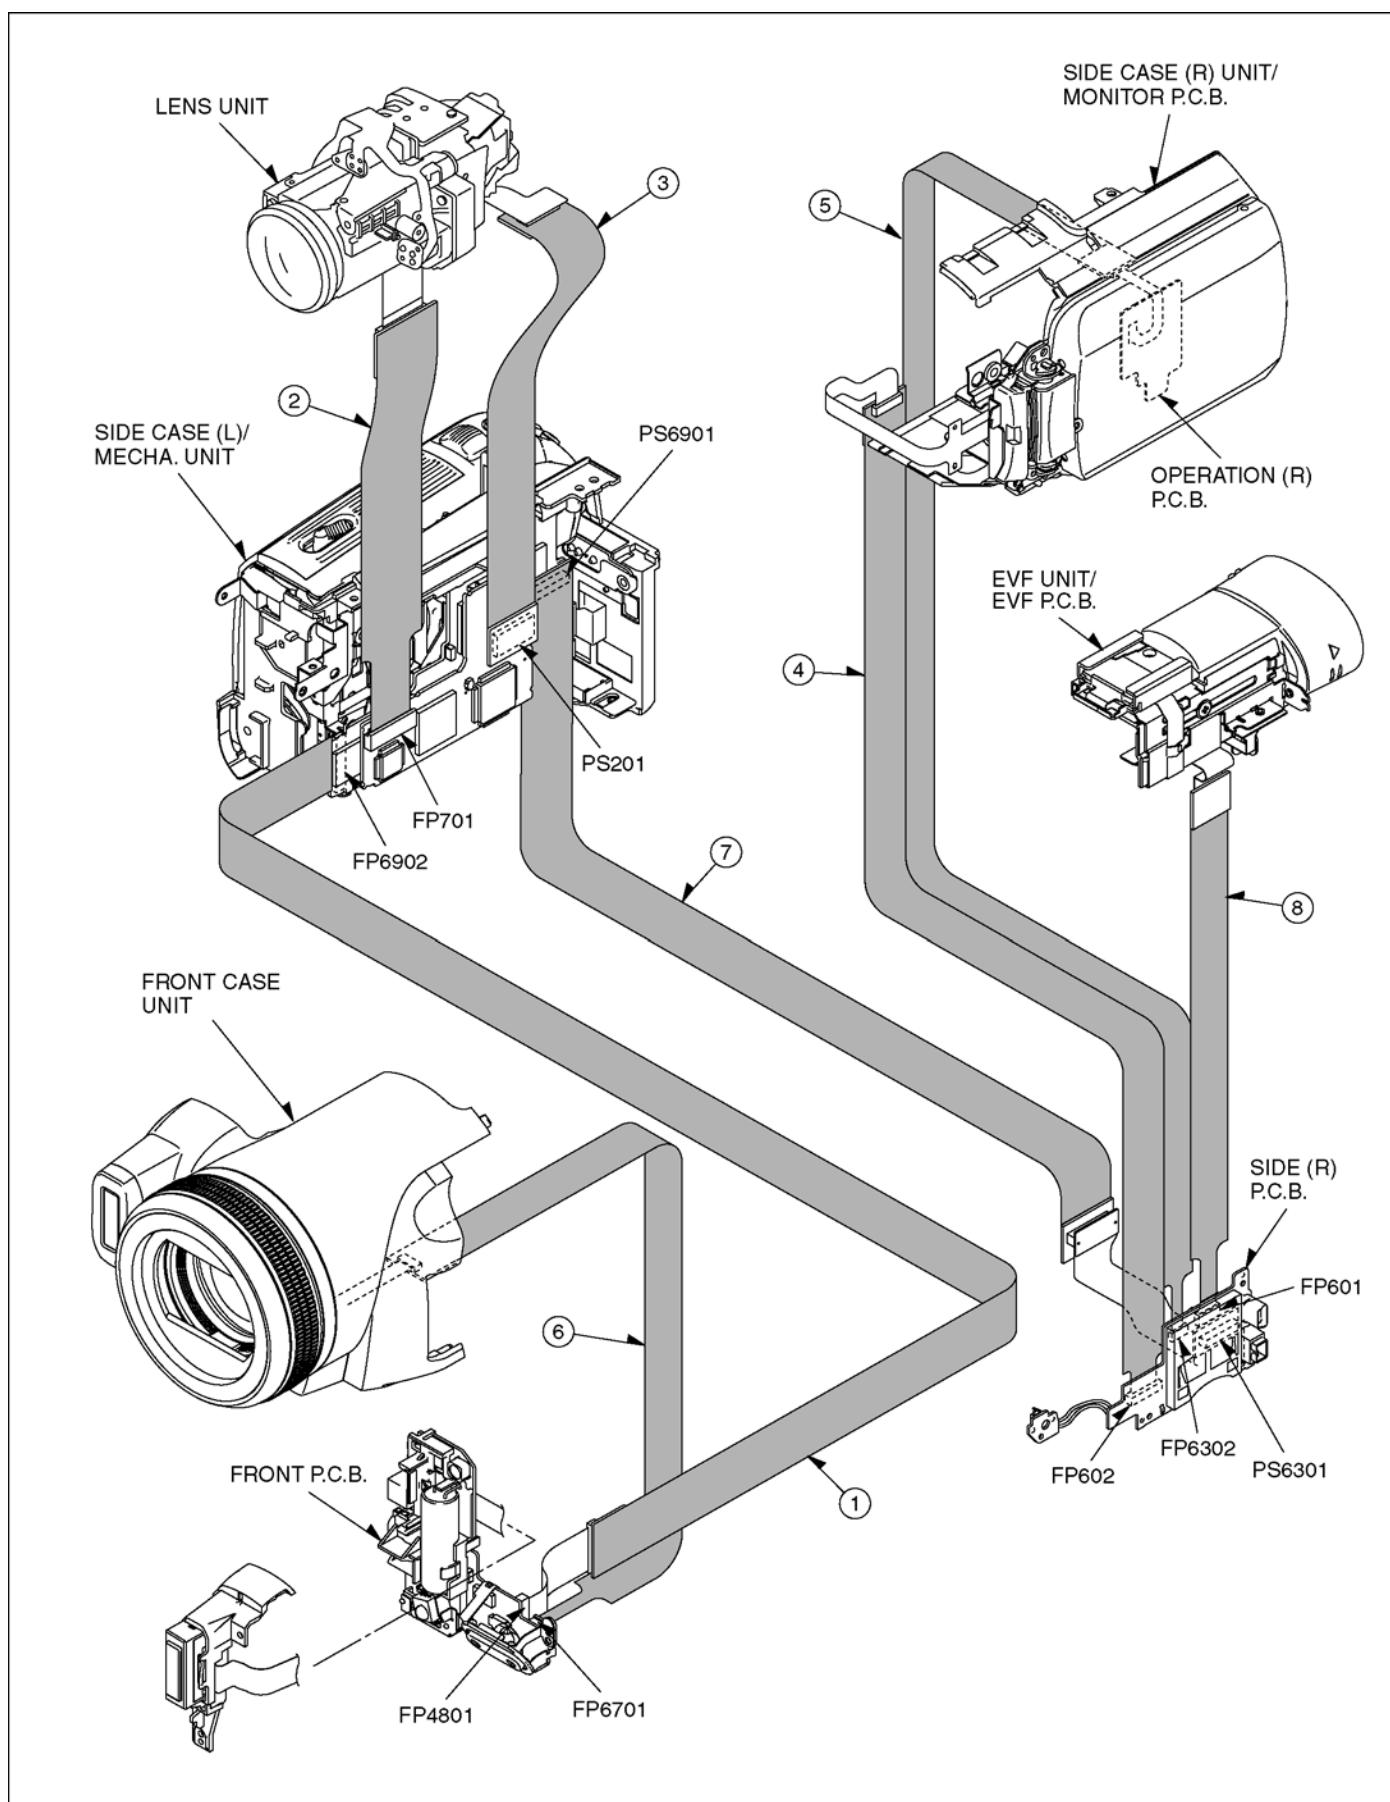

Use the following extension cables when checking or adjusting individual circuit boards except module Parts.

(Main P.C.B. and Sub P.C.B.)

Ref.	Part No.	Pin	Part Name	Connection	Q'ty	Remarks
(1)	VFK1575C4520	45	Flat Cable	FP6902 (Main) - FP4801 (Front)	1	as NV-GS400
(2)	VFK1575C4520	45	Flat Cable	FP701 (Sub) - Lens Unit	1	as NV-GS400
(3)	VFK1453	40	Flat Cable	PS201 (Sub) - Prism Unit	1	as NV-GS200
(4)	VFK1716	25	Flat Cable	FP602 (Side R) - FP902 (Monitor)	1	as NV-GX5
(5)	VFK1465	5	Flat Cable	FP6302 (Side R) - Operation (R) Unit	1	as NV-GS50
(6)	VFK1440	10	Flat Cable	FP6701 (Front) - MF Sensor Unit	1	as NV-DS7
(7)	VFK1993	60	Flat Cable	PS6901 (Main) - PS6301 (Side R)	1	as NV-GS300
(8)	VFK1978	31	Flat Cable	FP601 (Side R) - FP853 (EVF)	1	as SDR-S100

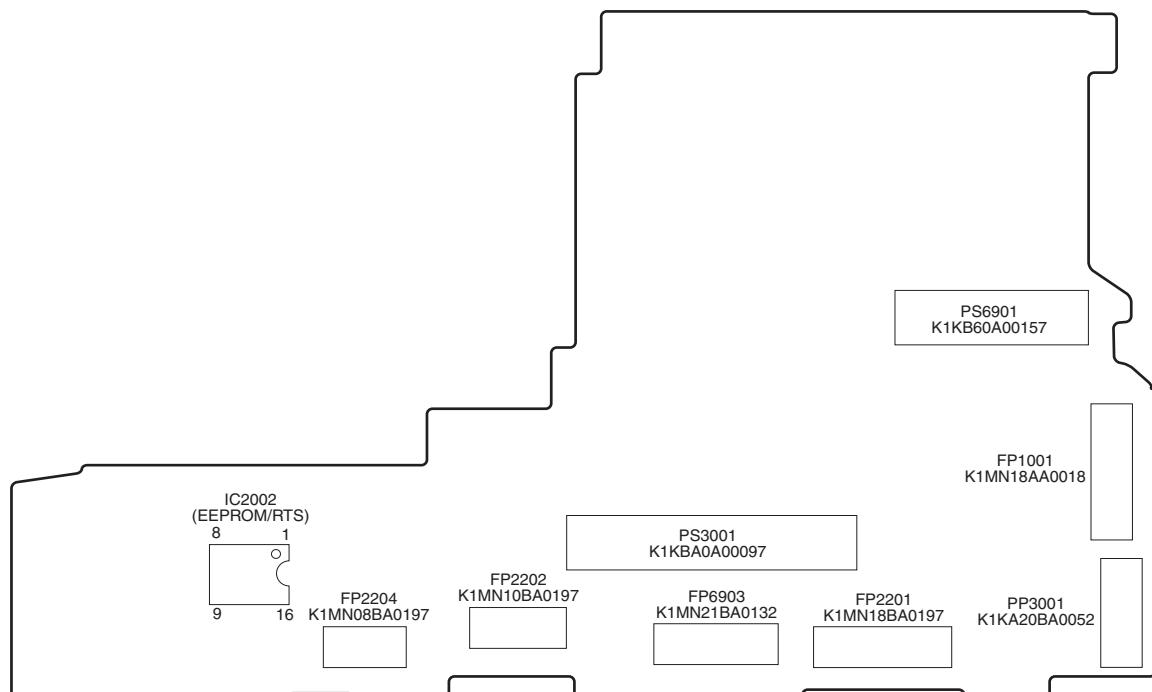

9.1.2. Checking and repairing individual circuit boards except module parts (Main P.C.B. and Sub P.C.B.)

How to use extension cables.

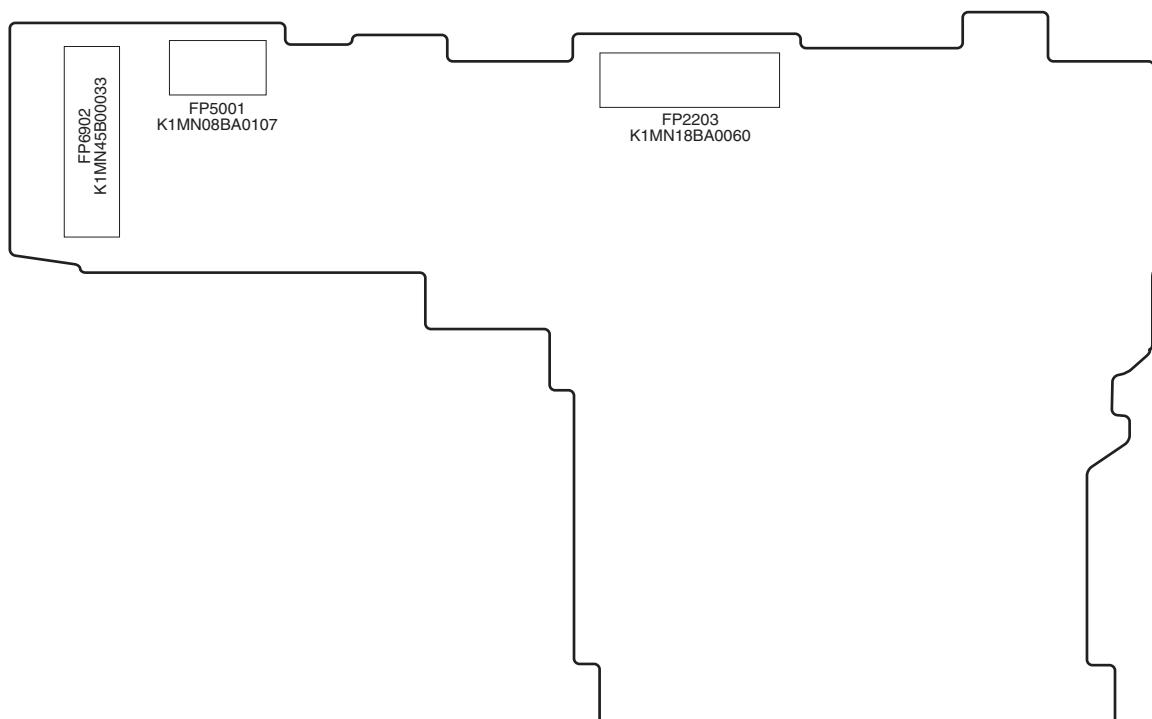

9.2. Location for Connectors of the Main P.C.B. & Sub P.C.B.

9.2.1. Main P.C.B.

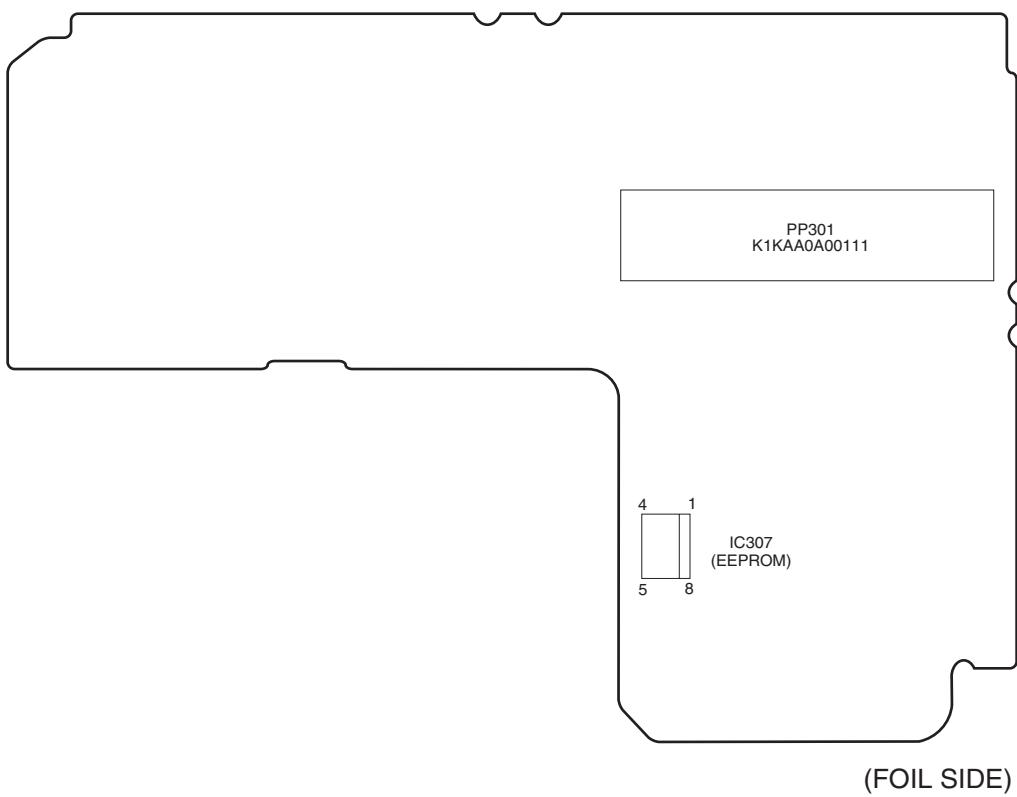

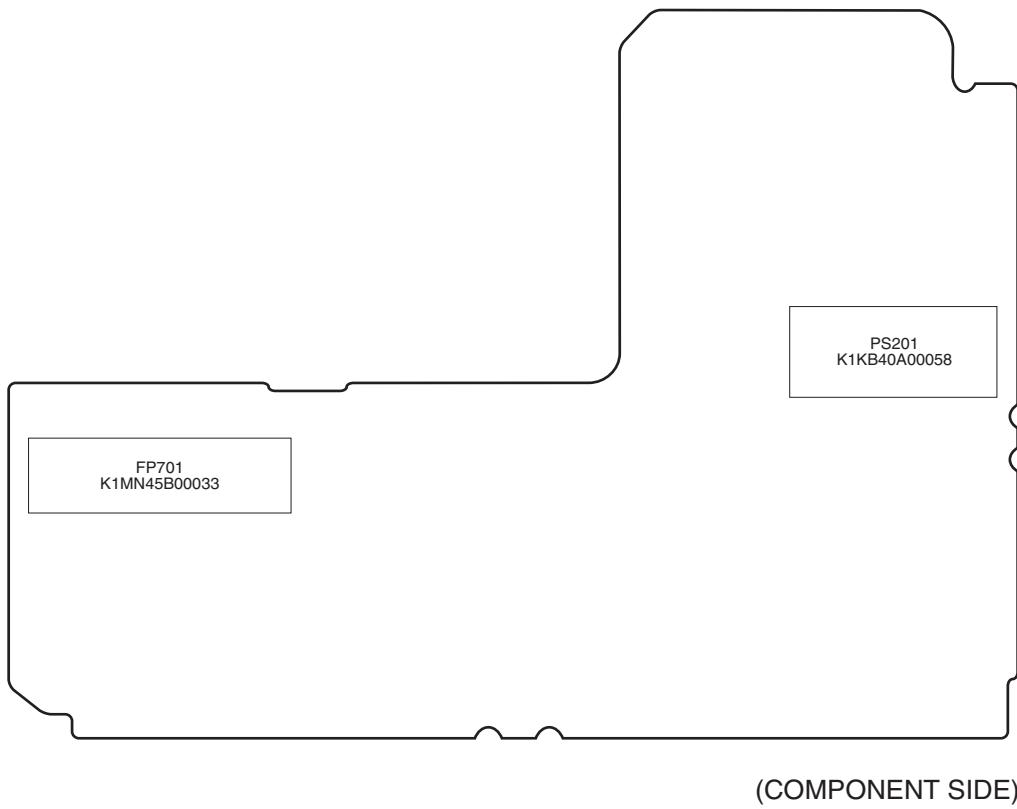

(COMPONENT SIDE)

(FOIL SIDE)

9.2.2. Sub P.C.B.

9.3. Electrical Adjustment Procedures

9.3.1. Computer assisted adjustment system <TATSUJIN> adjustment

This unit employs the computer assisted system named; [TATSUJIN PC-Adjustment](#) for Electrical adjustment.

It is required to install a USB driver for service which can be download only from TSN-WEB.

9.3.2. Set-up manual for DV-Camcorder.

Pay attention, because the adjustment method is different from this machine.

1. Save the software

Install the effective model's TATSUJIN Software to PC: Personal Computer.

2. Set-Up

a. It need the connection between the PC and this unit with USB cable.

b. Connect the PC and DV Camcorder as shown in Fig. E1 and E2.

c. The adjustment instruction is available at [Software download](#) on the [Support Information from NWBG-PAVC](#) web-site in [TSN System](#), together with maintenance software.

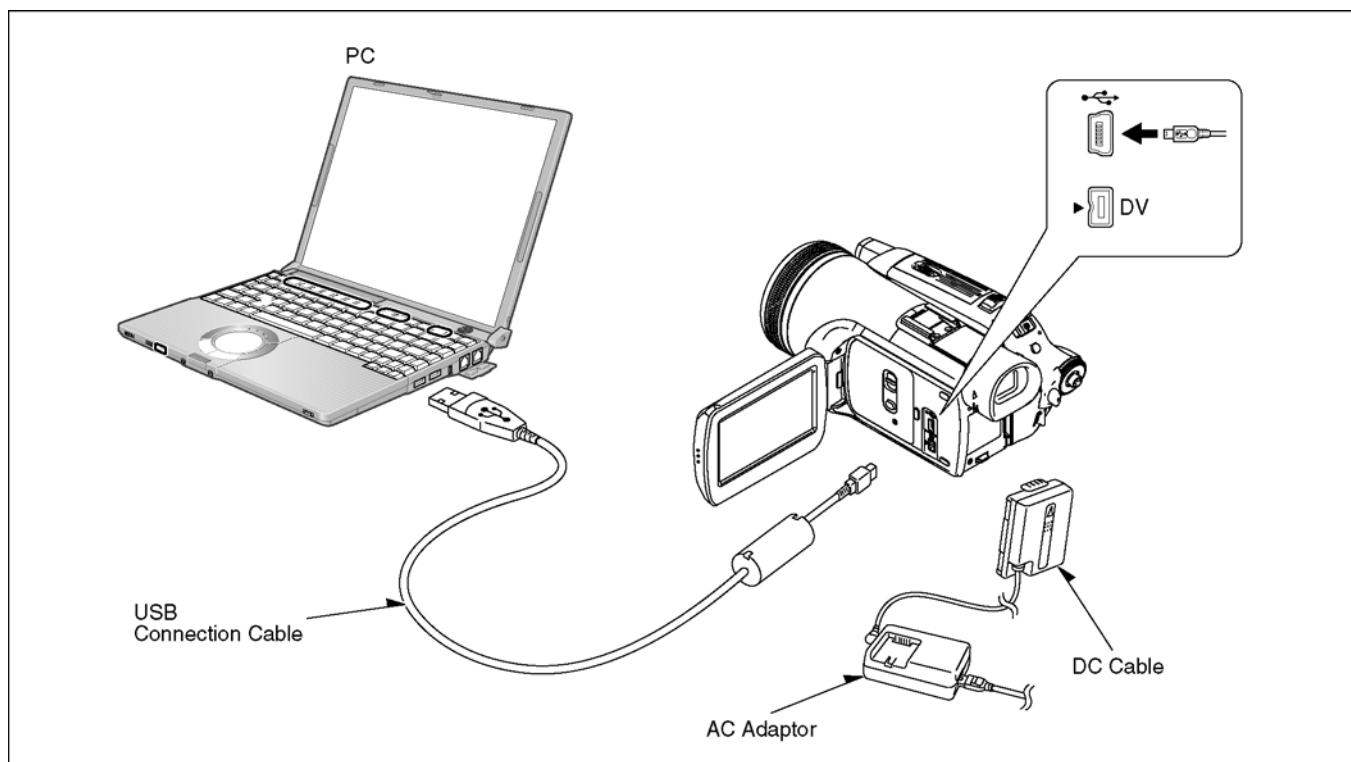

Fig. E1

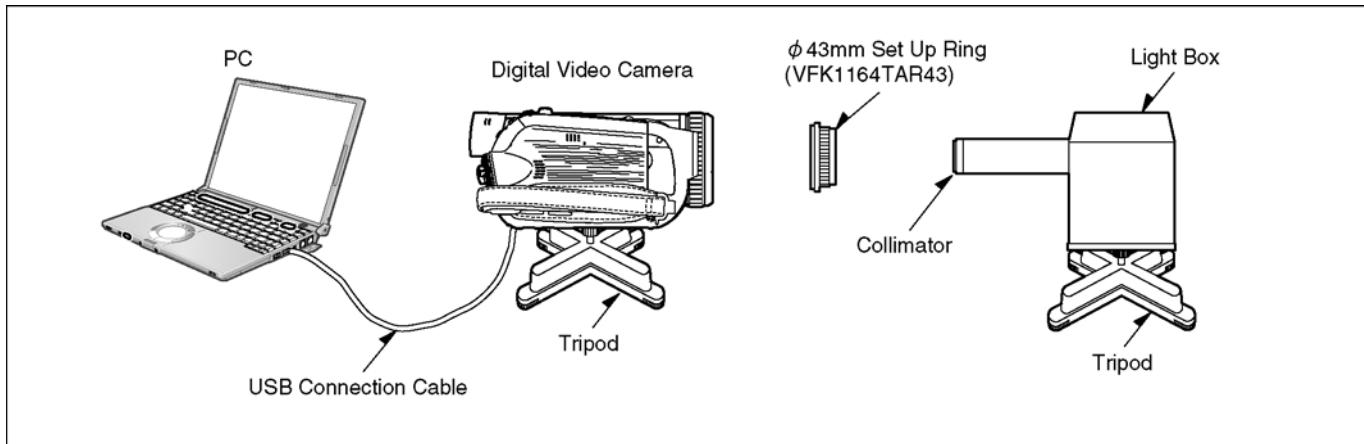

Fig. E2 Rough image of set-up connection

Ref	Name	Parts No.	Q'ty	Remarks
1	DV Camcorder	---	1	The Camcorder being adjusted.
2	Personal Computer	---	1	With Tatsujin Software.
3	AC Adaptor	---	1	The AC Adaptor for DV Camcorder.
4	DC Cable	---	1	The AC Adaptor for DV Camcorder.
5	USB Cable	---	1	Connect the Comcorder and PC.
6	Step Up Ring	VFK1164TAR43	1	For Collimator 43mm
7	TATSUJIN PC-Adjustment Program	VF0D2003AV30	1	

9.3.3. Set up PC-EVR adjustment program

1. Turn on the PC and install the TATSUJIN Adjustment Program into the PC.
2. TATSUJIN PC-Adjustment Program start in the following procedure.
PC Menu : [Start] → [Program] → [win Tatsujin] → [DV Movie] → [NV-GS500 Series]

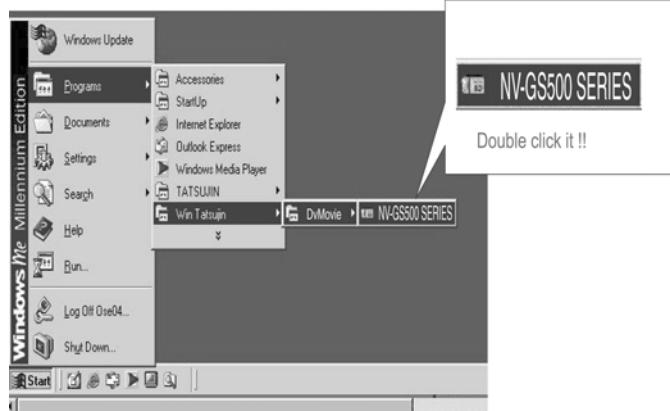

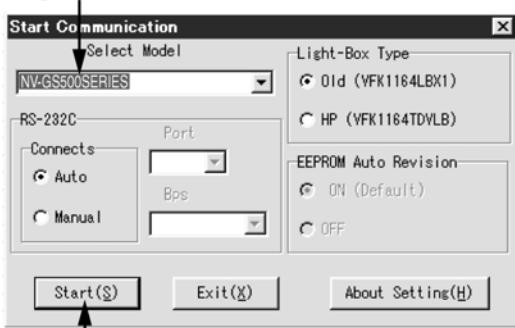

Fig. E3-1

The main menu display will be displayed.

3. Select the desired model.
4. Turn on the camcorder. Then, click **Start**.

① Select the desired model.

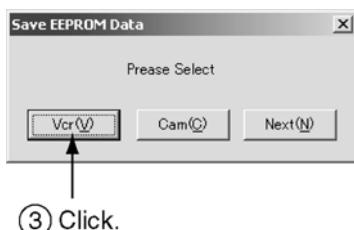

② Click to start.

Fig. E3-2

5. The communication is complete, and the dialog will appear.

Then, click **VCR (V) or Cam (C)** to save the EEPROM data,

③ Click.

Fig. E3-3

6. Saving for EEPROM data is complete, menu will appear. To perform each adjustment, display the adjustment menu by selecting the desired menu from **Camera Adjust**, **Video Adjust**, **LCD Adjust** or **EVF Adjust** and select each adjustment item.

④ Select the desired menu.

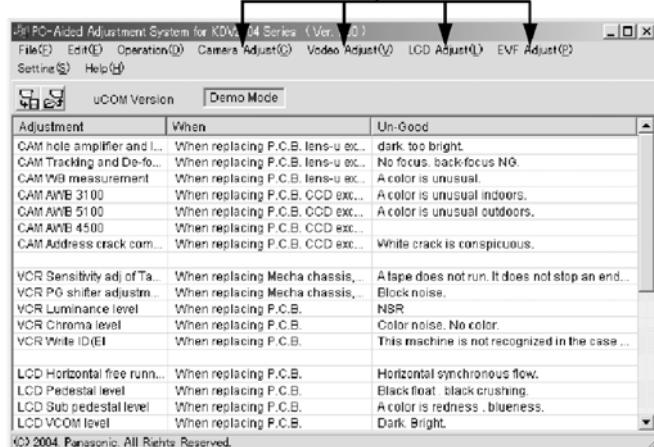

Fig. E3-4

Note:

The adjustment data is stored to the EEPROM IC after each adjustment.

7. After adjustment, to end the software, select **Exit** in File menu or close the window.

⑤ Select "Exit" or close the window.

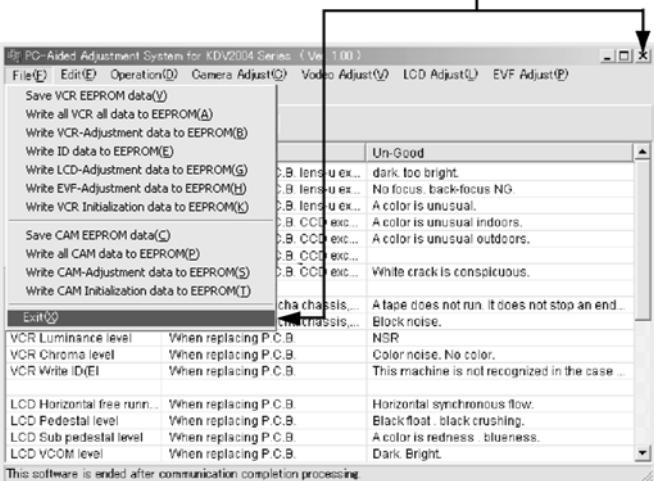

Fig. E3-5

9.3.4. Initial guideline

The table below shows which adjustments are necessary according to the unit parts and individual parts to be replaced. Make sure to perform these adjustments shown below as necessary.

		Replacement Parts									
		Adjustment Item									
		Sub P.C.B.	Main P.C.B.	IC307 (EEPROM)	IC2002 (EEPROM)	Lens Unit	Prism Unit	Iris Unit	4th Lens Frame Unit	Cylinder Unit	Main Chassis Unit
Camera	CAM hole amplifier / Iris PWM	○	○								
	CAM Tracking and De-focus	○	○	○							
	CAM Revision CCD scratch	○	○	○							
	CAM AWB adjustment	○	○	○		○	○	○			
Video	VCR Sensitivity ADJ. of Tape sensors		○							○	
	VCR PG shifter adjustment		○	○						○	○
	VCR Luminance level		○	○							

Note : ○ : Adjustment Item

9.4. Mechanical Adjustment Procedures

9.4.1. Adjustment item

Item	Adjustment at the time of the part exchange		
	Half finished goods mechanism	Cylinder	Remarks
Linearity adjustment & BER value confirmation	○	○	

9.4.2. Adjustment procedures

Pay attention, because the adjustment method is different from this machine.

I Linearity adjustment & BER value confirmation

1. Remove the mechanism adjustment cover of this machine as shown in Fig. D1.
2. Remove the front case unit. (Refer to Disassembly Procedures.)
3. The envelope detection special tool board (VFK1641) is connected to this machine as shown in Fig. D2 and D3.

Note:

Be careful not to damage when the Passive Probe is connected to the connection terminal of Main P.C.B..
It exists the possibility of the damage.

4. The envelope detection special tool board is connected to oscilloscope as shown in Fig. D2 and D3.
Connect the AV Jack of this machine and the oscilloscope by using the Multi cable.
5. The post is adjusted with the post driver(VFK1899) so that recycles the normal tape which recorded NTSC signal and the detection wave-link become a flat as shown in Fig. D4.
*At the time of the cylinder unit exchange unnecessary.
6. The post is adjusted with the post driver so that recycles a alignment tape(VFM3110EDS) and the detection wave-link become a flat once again.
7. Recycling the tape that video-taped it with this machine after adjustment, the BER value is confirmed with the item of the BER the item of the BER confirmation of expert soft inside.

10 Maintenace

10.1. Cleaning Lens, Viewfinder and LCD Panel

Do not touch the surface of lens, Viewfinder and LCD Panel with your hand.

When cleaning the lens, use air-Blower to blow off the dust.

When cleaning the LCD Panel, dampen the lens cleaning paper with lens cleaner, and gently wipe their surface.

Note:

A lens cleaning paper and lens cleaner are available at local camera shops and market place.

S1. About Indication of The Schematic Diagram

S1.1. Important Safety Notice

COMPONENTS IDENTIFIED WITH THE MARK  HAVE THE SPECIAL CHARACTERISTICS FOR SAFETY. WHEN REPLACING ANY OF THESE COMPONENTS USE ONLY THE SAME TYPE.

- 1.Although reference number of the parts is indicated on the P.C.B. drawing and/or schematic diagrams, it is NOT mounted on the P.C.B. when it is displayed with "\$" mark.
- 2.It is only the "Test Round" and no terminal (Pin) is available on the P.C.B. when the TP (Test Point) indicated as "●" mark.
- 3.The voltage being indicated on the schematic diagram is measured in "Standard-Playback" mode when there is no specify mode is mentioned.
- 4.Although the voltage and waveform available on here is measured with standard frame, it may be differ from actual measurement due to modification of circuit and so on.
- 5.The voltage being indicated here may be include observational-error (deviation) due to internal-resistance and/or reactance of equipment. Therefore, handle the value indicated on here as reference.
- 6.Use the parts number indicated on the Replacement Parts List .
- 7.Indication on Schematic diagrams:

S2. Voltage and Waveform Chart

Note) Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

S6. Replacement Parts List

- Note:
- 1.* Be sure to make your orders of replacement parts according to this list.
 2. **IMPORTANT SAFETY NOTICE**
Components identified with the mark Δ have the special characteristics for safety.
When replacing any of these components, use only the same type.
 3. Unless otherwise specified,
All resistors are in OHMS, K=1,000 OHMS. All capacitors are in MICRO-FARADS (uf), P=uuF.
 4. The marking (RTL) indicates the retention time is limited for this item. After the discontinuation
of this assembly in production, it will no longer be available.

E.S.D. standards for Electrostatically Sensitive Devices, refer to “PREVENTION OF ELECTROSTATIC DISCHARGE (ESD) TO ELECTROSTATICALLY SENSITIVE (ES) DEVICES” section.
