

Service Manual

Interchangeable Lens for Digital Camera

Model No. **H-HSA35100PP**

H-HSA35100E

H-HSA35100GK

WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

1 Safety Precautions

1.1 Information for Your Safety

Keep the unit as far away as possible from electromagnetic equipment (such as microwave ovens, TVs, video games, radio transmitters, high-voltage lines etc.).

- Do not use the camera near cell phones because doing so may result in noise adversely affecting the pictures and sound.
- If the camera is adversely affected by electromagnetic equipment and stops functioning properly, turn the camera off and remove the battery and/or the connected AC adaptor. Then reinsert the battery and/or reconnect the AC adaptor and turn the camera on.

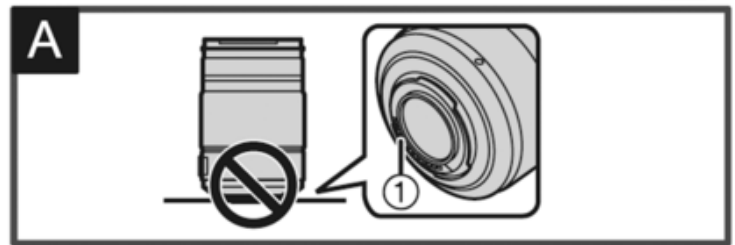

The lens can be used with a digital camera compatible with the lens mount standard for the "Micro Four Thirds™ System".

- It cannot be mounted on the Four Thirds™ mount specification camera.
- The appearance and specifications of products described in this manual may differ from the actual products you have purchased due to later enhancements.
- Micro Four Thirds™ and Micro Four Thirds Logo marks are trademarks or registered trademarks of Olympus Imaging Corporation, in Japan, the United States, the European Union and other countries.
- Four Thirds™ and Four Thirds Logo marks are trademarks or registered trademarks of Olympus Imaging Corporation, in Japan, the United States, the European Union and other countries.
- G MICRO SYSTEM is an interchangeable lens type digital camera system of LUMIX based on a Micro Four Thirds System standard.
- Other names of systems and products mentioned in these instructions are usually the registered trademarks or trademarks of the manufacturers who developed the system or product concerned.

Precautions

■ Lens Care

- This lens has a dust-proof and splash-proof construction. When using it, please be careful of the following. If the lens is not working properly, consult the dealer or your nearest Service Center.
 - Please attach the lens to a dust-proof and splash-proof digital camera.
 - When detaching the lens from the digital camera, take care to ensure that sand, dust, splashes of water etc., do not get into the lens or the terminals.
 - This lens is not waterproof and cannot be used to record underwater. For splash-proofing, the lens is constructed to resist the entry of water. If splashes of water etc. do adhere to the lens, wipe after use with a soft dry cloth.
- To improve the dust-proofing and splash-proofing of this lens, a lens mount rubber is used in the mounting portion. After changing the lens a number of times, you may find that the lens mount rubber has marked the mount portion of the digital camera body, which does not affect its performance. For information on changing the lens mount rubber, contact your nearest Service Center.
- Do not press the lens with excessive force.
- When there is dirt (water, oil, and fingerprints, etc.) on the surface of the lens, the picture may be affected. Lightly wipe the surface of the lens with a soft, dry cloth before and after taking pictures.
- To prevent dust and other particles from accumulating on or entering the lens, attach the lens rear cap when the lens is not in use.
- To protect the lens contact points ①, do not place the lens with its mount surface facing down. In addition, do not allow the lens contact points to become dirty. (See illustration **A**)

■ About Condensation (Fogging of the Lens)

- Condensation occurs when there are differences in temperature and humidity as described below. Condensation can cause the lens to become dirty and lead to mold and malfunctioning, so exercise caution in the following situations:
 - When the camera is brought indoors from outside during cold weather
 - When the camera is brought into an air-conditioned car
 - When cold air from an air conditioner is directly blown onto the lens
 - In humid places
- If condensation occurs, turn the power off and leave it for about two hours. Once the camera acclimatizes to the surrounding temperature the condensation will go away naturally.

1.2 Cautions for use

Take care not to drop or knock the lens. Also take care not to put a lot of pressure on the lens.

- Take care not to drop the bag that you inserted the lens in as it may strongly shock the lens. The camera may stop operating normally and pictures may no longer be recorded. Also, the lens may be damaged.
- When carrying the digital camera with the lens attached, hold both the digital camera and the lens.

When using pesticides and other volatile substances around the camera make sure that they do not get onto the lens.

- If such substances get onto the lens they can damage the exterior case or cause the paint to peel.

Do not point the lens at the sun or other strong light sources.

- This could cause the lens to collect an excessive amount of light, resulting in fire and malfunction.
- Under no circumstances should the unit be stored in any of the following locations since doing so may cause problems in operation or malfunctioning.
 - In direct sunlight or on a beach in summer
 - In locations with high temperatures and humidity levels or where the changes in temperature and humidity are acute
 - In locations with high concentrations of sand, dust or dirt
 - Where there is fire
 - Near heaters, air conditioners or humidifiers
 - Where water may make the unit wet
 - Where there is vibration
 - Inside a vehicle

- Refer also to the owner's manual of the digital camera.
- When the unit is not going to be used for a prolonged period, we recommend storing with a desiccant (silica gel). Failure to do so may result in performance failure caused by mold, etc. It is recommended that you check the unit's operation prior to use.
- Do not leave the lens in contact with rubber or plastic products for extended periods of time.
- Do not touch the lens contact point. Doing so can cause failure of the unit.
- Do not disassemble or alter the unit.

Do not use while directly touching the lens at low temperatures for a long period of time.

- In cold places (environments below 0 °C (32 °F), such as ski slopes), prolonged direct contact with the metal parts of the lens may cause skin injury. Use gloves or similar when using the lens for long periods.

Do not use benzine, thinner, alcohol or other similar cleaning agents to clean the lens glass or exterior cabinet.

- Using solvents can damage the lens or cause the paint to peel.
- Wipe off any dust or fingerprints with a soft, dry cloth.
- Use a dry, dust cloth to remove dirt and dust on the lens mount rubber, zoom ring, or focus ring.
- Do not use a household detergent or a chemically treated cloth.

Troubleshooting

**A sound is heard when the camera is turned on or off.
A sound is heard from the lens when taking a picture of a bright subject such as when outdoors.**

- This is the sound of lens or aperture movement and is not a malfunction.

2 Service Navigation

2.1 Introduction

This service manual contains technical information, which allow service personnel's to understand and service this model

Please place orders using the parts list and not the drawing reference numbers.

If the circuit is changed or modified, the information will be followed by supplement service manual.

2.2 Important Notice

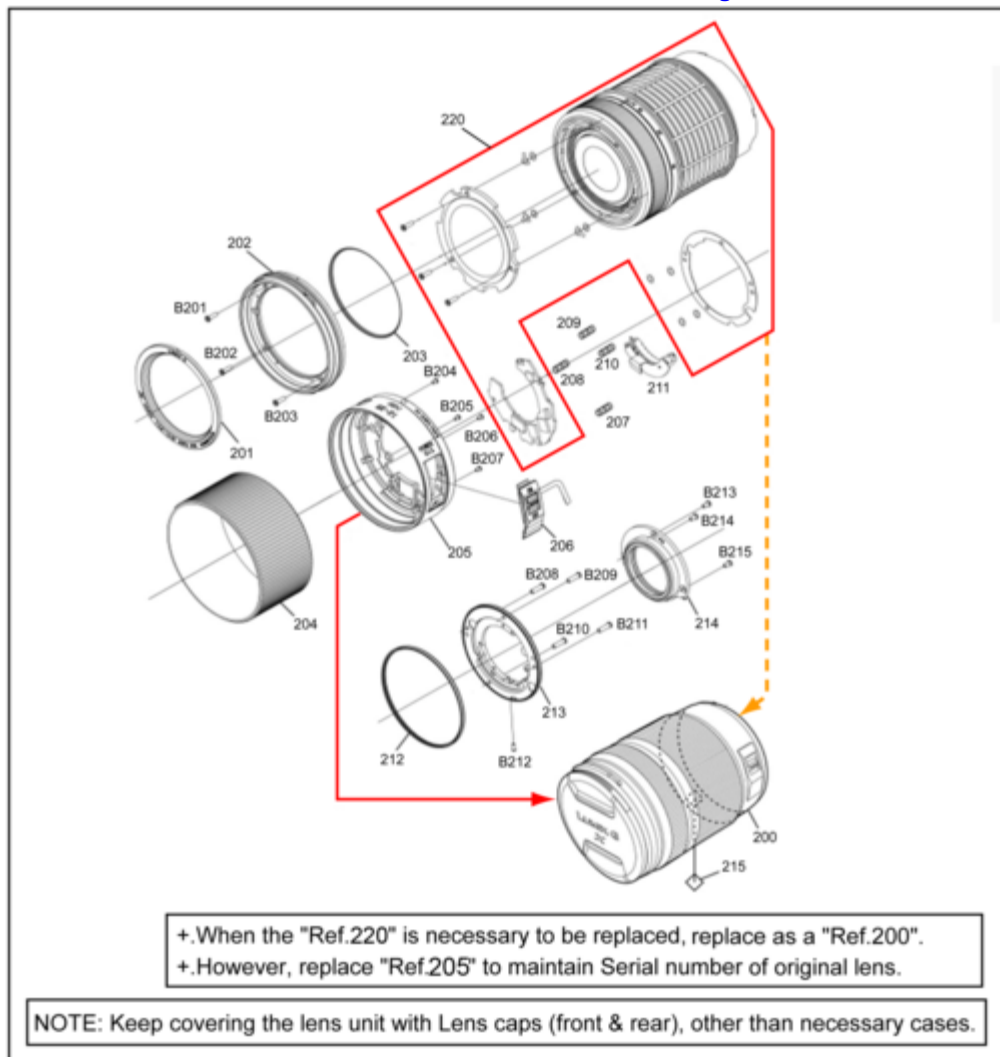

2.2.1 About LENS MAIN UNIT (Ref. 220)

1. LENS MAIN UNIT (Ref. 220) is not supplied due to difficulty of the transportation issue (Fragile, Dust-free packing), and requires critical lens adjustments.

Therefore, any needs of the "LENS MAIN UNIT" (Ref. 220), carefully confirm its performance in advance.

2. Once "LENS MAIN UNIT" (Ref. 220) is confirmed as defective, place order "LENS Unit" (Ref. 200) and replace REAR FRAME UNIT (Ref. 205), to maintain Serial number of owner's original lens.

Fig. 1-1

3. No adjustment is required when replacing the part mentioned on Fig.1-1. But, when tighten the concerned screws, apply proper torque

mentioned on "6. Disassembly and Assembly Instruction" section.

3 Specifications

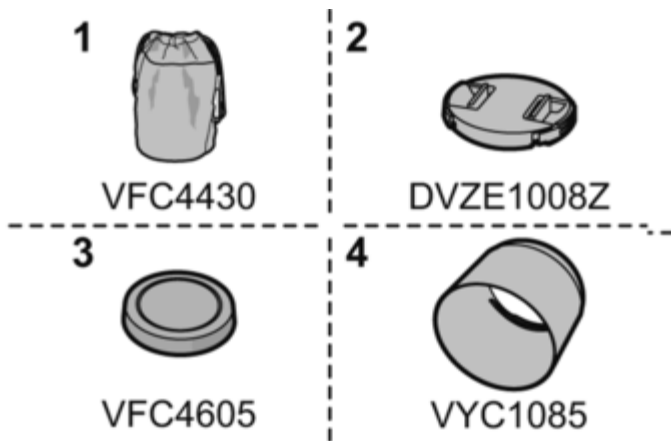

3.1 Specifications (Rated)

Specifications are subject to change without notice.

INTERCHANGEABLE LENS FOR DIGITAL CAMERA
“LUMIX G X VARIO 35-100 mm / F2.8 II / POWER O.I.S.”

Focal length
f=35 mm to 100 mm (35 mm film camera equivalent: 70 mm to 200 mm)
Aperture type
7 diaphragm blades/circular aperture diaphragm
Maximum aperture
F2.8
Minimum aperture value
F22
Lens construction
18 elements in 13 groups (2 ED lenses, 1 UED lens)
Nano surface coating
Yes
In focus distance
0.85 m (2.8 feet) to ∞ (from the focus distance reference line)
Maximum image magnification
0.1 \times (35 mm film camera equivalent: 0.2 \times)
Optical image stabiliser
Available
[O.I.S.] switch
Available (Switching ON/OFF)
Mount
“Micro Four Thirds Mount”
Angle of view
34° (Wide) to 12° (Tele)
Filter diameter
58 mm
Max. diameter
Approx. 67.4 mm (2.7 inch)
Overall length
Approx. 99.9 mm (3.9 inch) (from the tip of the lens to the base side of the lens mount)
Mass
Approx. 357 g (0.79 lb)
Operating temperature
–10 °C to 40 °C (14 °F to 104 °F)
Dust-proof and splash-proof
Available

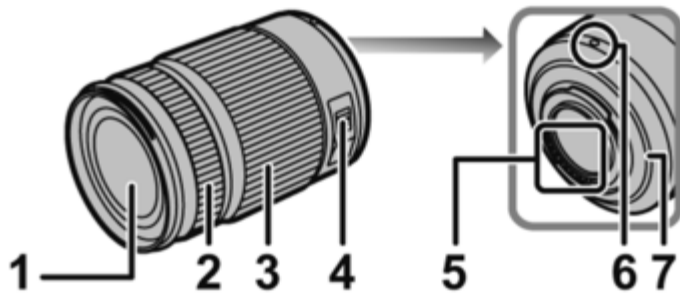

3.2 Accessories

- 1** Lens Pouch
- 2** Lens Cap
- 3** Lens Rear Cap
- 4** Lens Hood

- The lens rear cap and lens cap are attached to the interchangeable lens at the time of purchase.

4 Location of Controls and Components

- 1** Lens surface
- 2** Focus ring
Rotate to focus when taking pictures with manual focus (MF).
- 3** Zoom ring
Rotate the zoom ring when you wish to take large (tele) or wide (wide angle) pictures.
- 4** [O.I.S.] switch
When the lens is attached to the camera the stabilizer function is set to activate if the O.I.S. switch is set to [ON].
 - We recommend setting the O.I.S. switch to [OFF] when using a tripod.
- 5** Contact points
- 6** Lens fitting mark
- 7** Lens mount rubber

Note

- If you zoom after focusing, focusing errors may occur. After zooming, please perform the focusing again.
- In very quiet situations Auto Focus operating sounds may be recorded during motion picture recording. This is not a malfunction. In such situations, switching to Manual Focus will improve the situation.
- If you set the O.I.S. to [ON] when recording a motion picture, operating sounds may be recorded. If they become bothersome, we recommend setting the O.I.S. switch to [OFF] and mounting the camera on a tripod.

5 Service Fixture & Tools

5.1 Service Fixture and Tools

The following Service Fixture and Tools are used for Checking & Servicing for this unit.

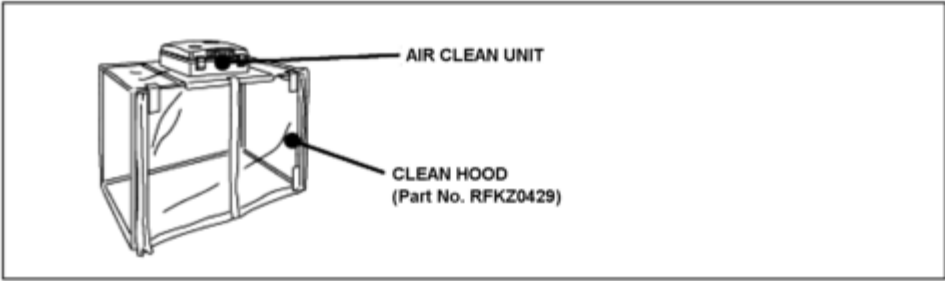

<div>Lens Cleaning Kit (BK)</div> <div>VFK1900BK</div> <div></div> <div>* Only supplied 10 set/box.</div>	<div>Torque Driver</div> <div>RFKZ0542</div> <div></div> <div>Spec: 2-30N・cm (Equiv.0,1-3kgf/cm)</div>	<div>Driver</div> <div>VFK1390</div> <div></div>
<div>Adjustment Shaft x 4</div> <div>VMS7941</div> <div></div> <div>2.0mm</div> <div>An equivalent type can be used (Less than 2.0mm)</div>		

5.2 Clean Box

- The repair quality is considered, and it is recommended working in the environment of satisfied clean level less than class 10,000 (Federal Standard 209D).

[NOTE]

- Work in the environment of satisfied clean level less than class 10,000 (Federal Standard 209D) for cleaning the inside of the lens.

6 Disassembly and Assembly Instructions

6.1 Outline

Please be disassembly and assembly with reference to the flow chart and illustrations drawings.

Important:

1. It is recommended dealing with Clean Box, to keep maintaining the dustproof environment.
(Refef to " **5.2. Clean Box** " section of this Service Manual for details.)
2. To minimize the possibilities/risk of getting the dust/dirt on the lens surface, keep covering the lens unit with lens caps (front & rear), other than necessary cases.
3. Do not touch the surface of the lens glasses with your fingers.
4. Blow off the dust on the surface of the lens with a blower brush.
5. Use lens cleaning KIT (BK)(VFK1900BK).

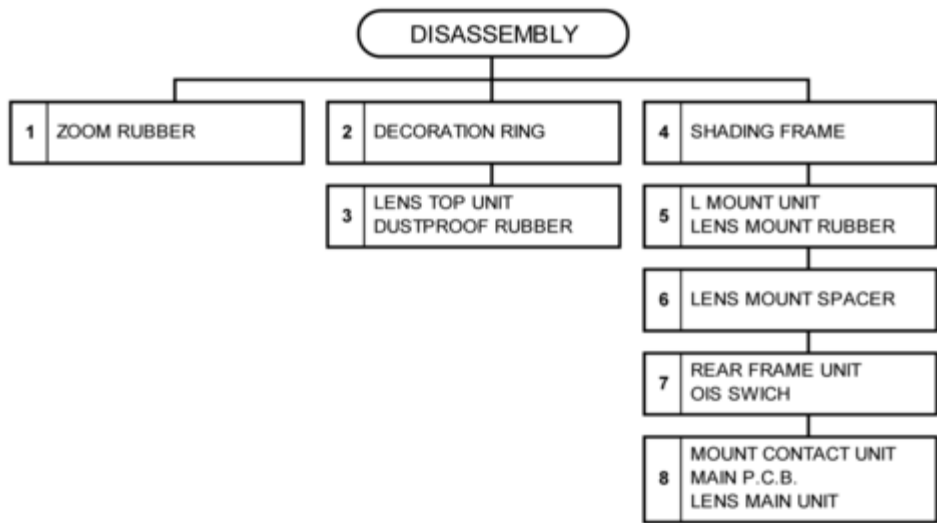

NOTE:

1. When installing the screws, be sure to use the torque driver (RFKZ0542) and tighten the screws with specified torque, mentioned on the following.

Caution

Keep covering the lens unit with Lens caps (front & rear), other than necessary cases.

6.2 Disassembly Flow Chart

6.3 Disassembly Procedure

Important:

It must be performed inside of satisfied clean level.

(Satisfied clean level:

Less than class 10,000(Federal Standard 209D))

6.3.1 Removal of the Zoom Rubber

1. Remove the Zoom Rubber.

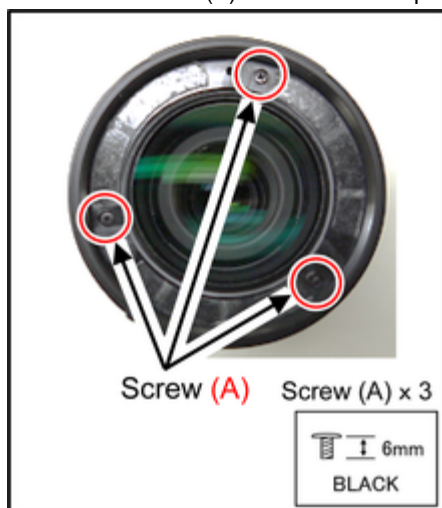

6.3.2 Removal of the Decoration Ring

1. The Decoration Ring is stuck on the Lens Top Unit.
2. Put the sheet so that the lens glass is fully covered.
3. Insert the small flat blade screwdriver to Gap (between the Decoration Ring and lens glass), and peel off the Decoration Ring gently.

6.3.3 Removal of the Lens Top Unit and the Dustproof Rubber

1. Remove 3 screws (A) and the Lens Top Unit.

2. Remove the Dustproof Rubber.

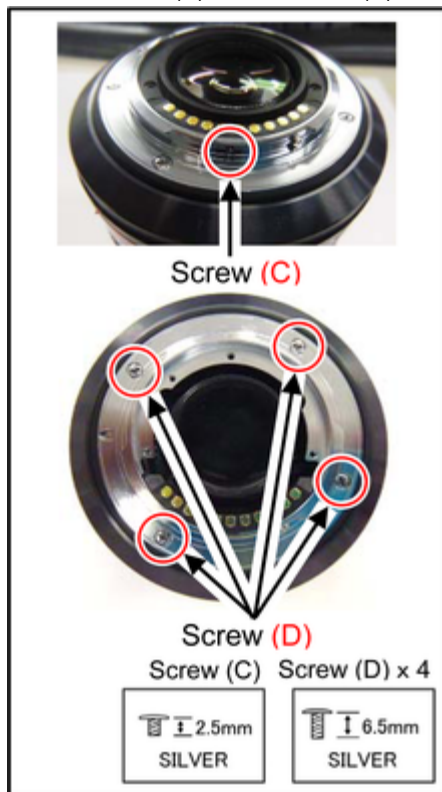

6.3.4 Removal of the Shading Frame

1. Remove 3 screws (B) and the Shading Frame.

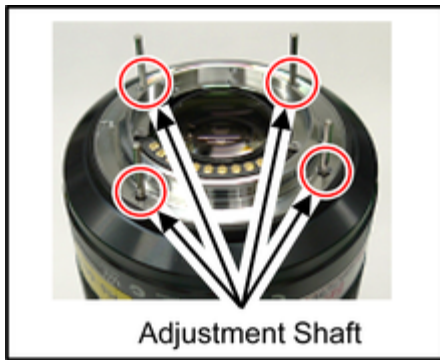

6.3.5 Removal of the L Mount Unit and the Lens Mount Rubber

1. Remove screw (C) and 4 screws (D).

2. Insert 4 Adjustment Shafts (VMS7941 or an equivalent one) to screw holes in order not to remove Adjustment washes.
3. Remove the L Mount Unit.

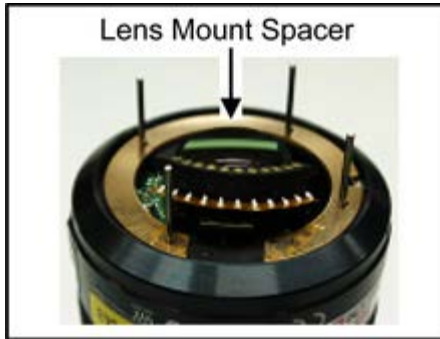

4. Remove the Lens Mount Rubber.

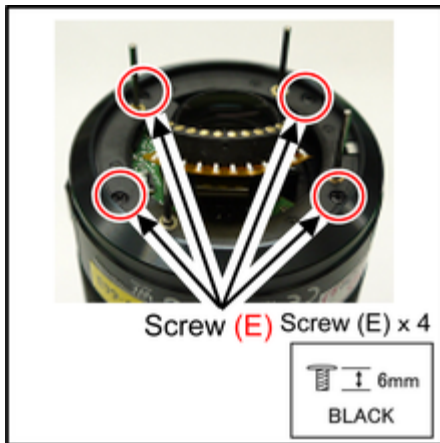

6.3.6 Removal of the Lens Mount Spacer

1. Lift up and remove the Lens Mount Spacer slowly.

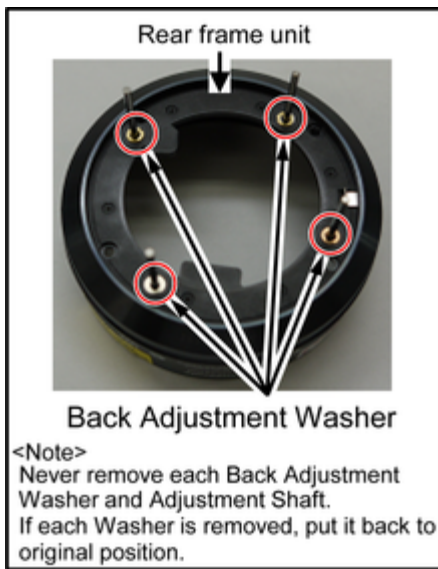

6.3.7 Removal of the Rear Frame Unit and the OIS Switch

1. Disconnect the Connector of the Main P.C.B..
2. Remove 4 screws (E) and the Rear Frame Unit.

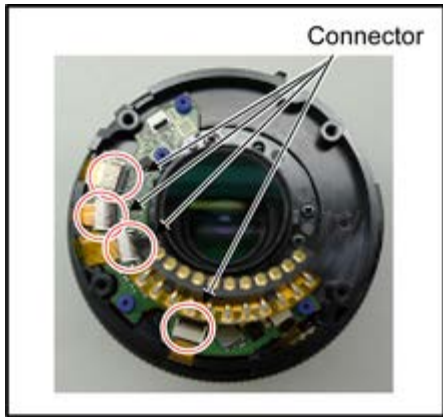

3. Remove the bond by flat brade screwdriver in the following state.
4. Remove the OIS Switch.

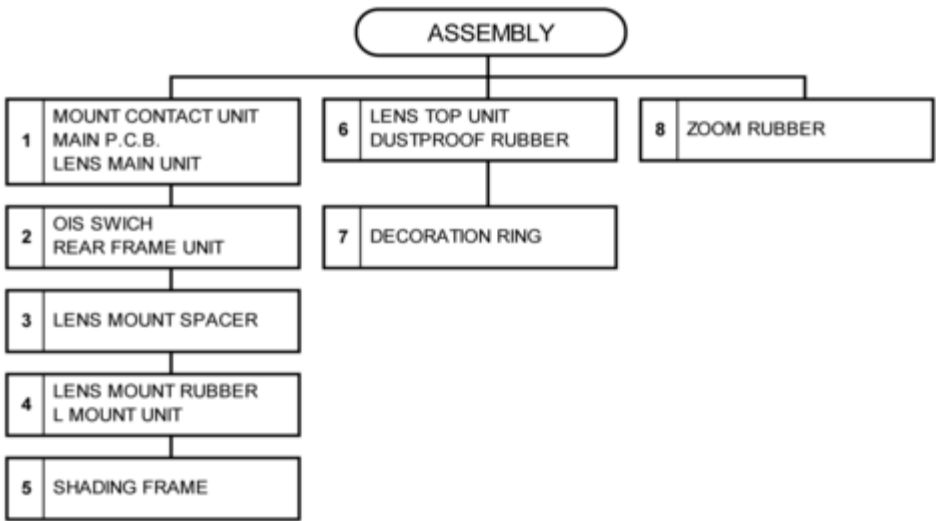

6.3.8 Removal of the Main P.C.B. and the Mount Contact Unit

1. Disconnect 4 connectors of the Main P.C.B..
2. Remove the Main P.C.B. and the Mount Contact Unit.
3. Remove the Mount Connect Unit from Main P.C.B..

6.4 Assembly Flow Chart

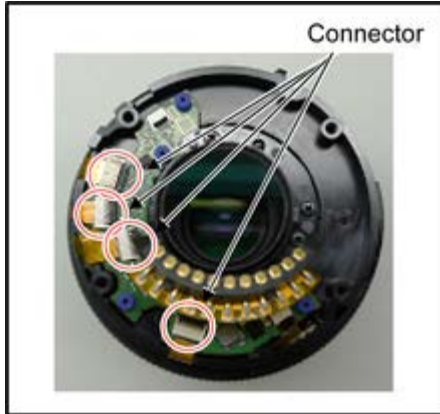

6.5 Assembly procedure

Important:

1. When tightening the screw, use a torque driver (RFKZ0542) with specified torque described in each step.

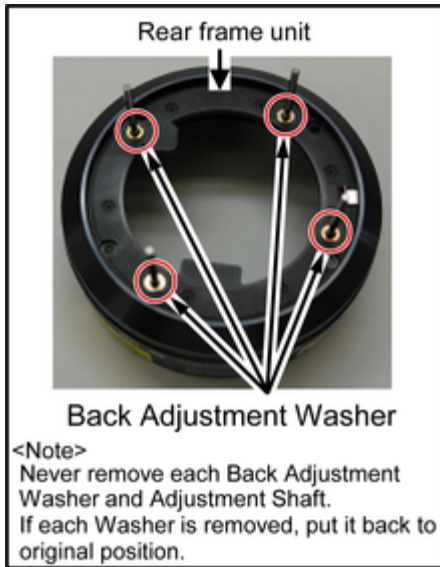

6.5.1 Installation of the Mount Contact Unit and the Main P.C.B.

1. Connect FPC of the Mount Connect Unit to connector of the Main P.C.B..
2. Installation the Main P.C.B. with the Mount Contact Unit.
3. Connect FPCs to 4 connectors of the Main P.C.B..

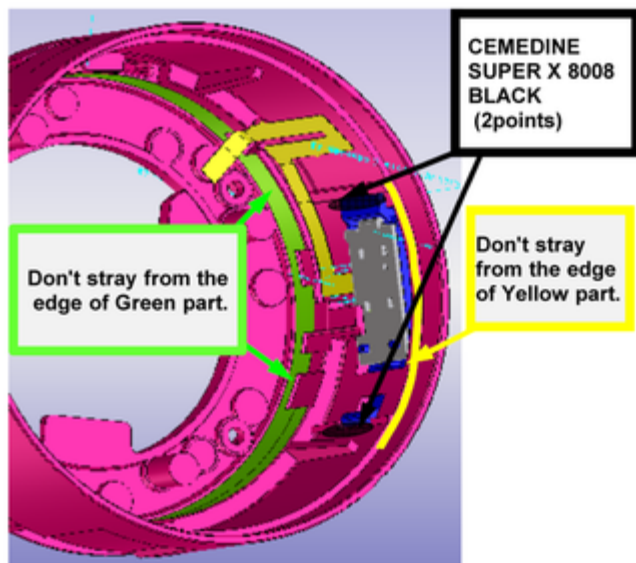

6.5.2 Installation of the OIS Switch and the Rear Frame Unit

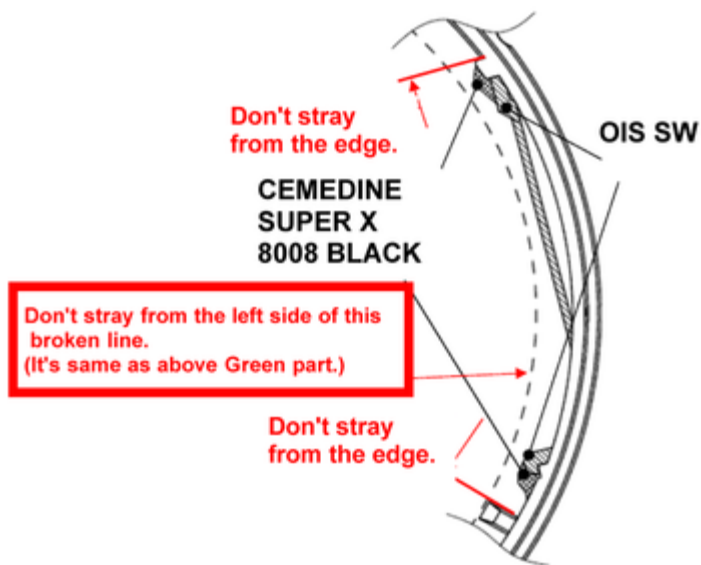

1. Install the OIS Switch in the following state.

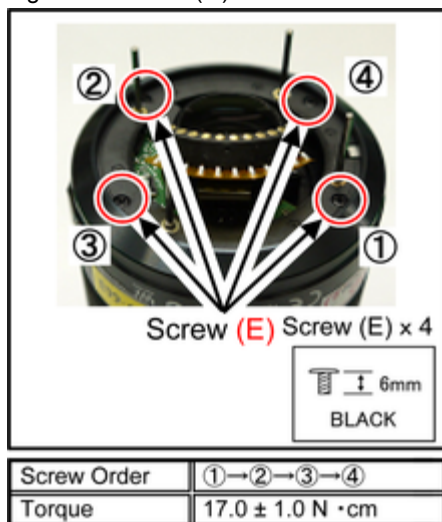

2. Apply "CEMEDINE SUPER X 8008 BLACK" (Commercial Item) to the following 2 points after installing the OIS Switch.

Front view

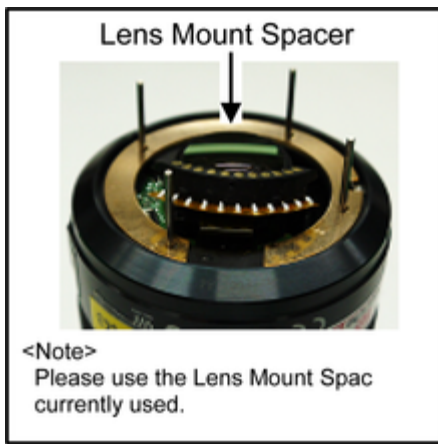

3. Connect FPC to connector of the Main P.C.B..
4. Tighten 2 screws (G) in numerical order by using the torque driver with specified torque.

6.5.3 Installation of the Lens Mount Spacer

1. Put the Lens Mount Spacer on the Rear Frame Unit slowly.

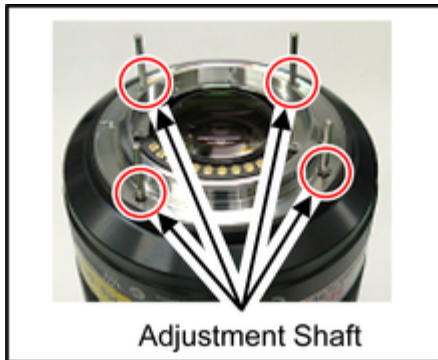

6.5.4 Installation of the Lens Mount Rubber and the L Mount Unit

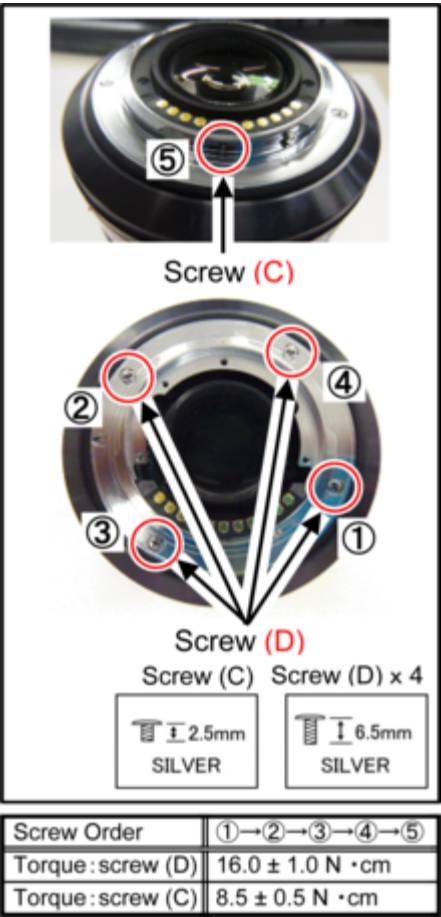

1. Install the Lens Mount Rubber.

2. Install the L Mount Unit.
3. Remove the 4 Adjustment Shafts (VMS7941 or an equivalent one).

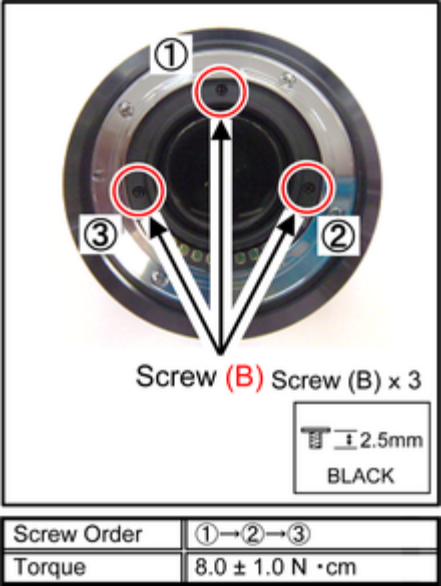

4. Tighten 4 screws (D) and screw (C) in numerical order by using the torque driver with specified torque.

6.5.5 Installation of the Shading Frame

- 1. Install the Shading Frame.
- 2. Tighten 3 screws (B) in numerical order by using the torque driver with specified torque.

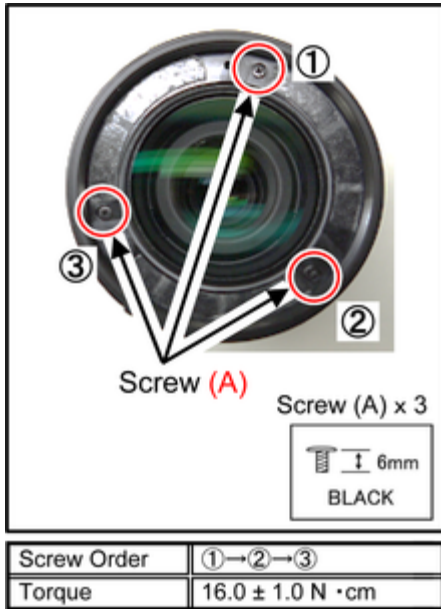

6.5.6 Installation of the Dustproof Rubber and the Lens Top Unit

- 1. Install the Dustproof Rubber.

2. Install the Lens Top Unit.
3. Tighten 3 screws (A) in numerical order by using the torque driver with specified torque.

6.5.7 Installation of the Decoration Ring

1. Insert the Pin of the Decoration Ring to the hole of the Lens Top Unit.
 - Use new one, do not use the one which is removed.
 - Double-stick tape sticks to the Decoration Ring of the repair part. Remove the old double-stick tape from the Lens Top Unit.
2. After installing the Decoration Ring, use a soft cloth to press it into place.

6.5.8 Installation of the Zoom Rubber Ring

1. Install the Zoom Rubber Ring.

7 Maintenance

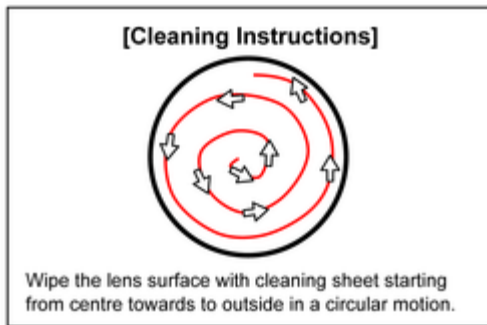

7.1 Dust / Dirt on the outer casing part(s)

1. Blow off the dust first, then sweep out the dust from narrower spaces with soft cleaning brush.
2. Wipe up the outer casing part with the dry fuzz-free cloth.

7.2 Dust / Dirt on the Lens Glasses (Lens Cleaning)

1. Blow off the dust on the Lens glass surface with the Blower, gently. (Do not blow strongly.)
2. Wipe out the dirt on the Lens glass surface with Lens Cleaning Kit (VFK1900BK) if necessary.

(Consult the instruction sheet which is included in the Lens Cleaning Kit in details.)

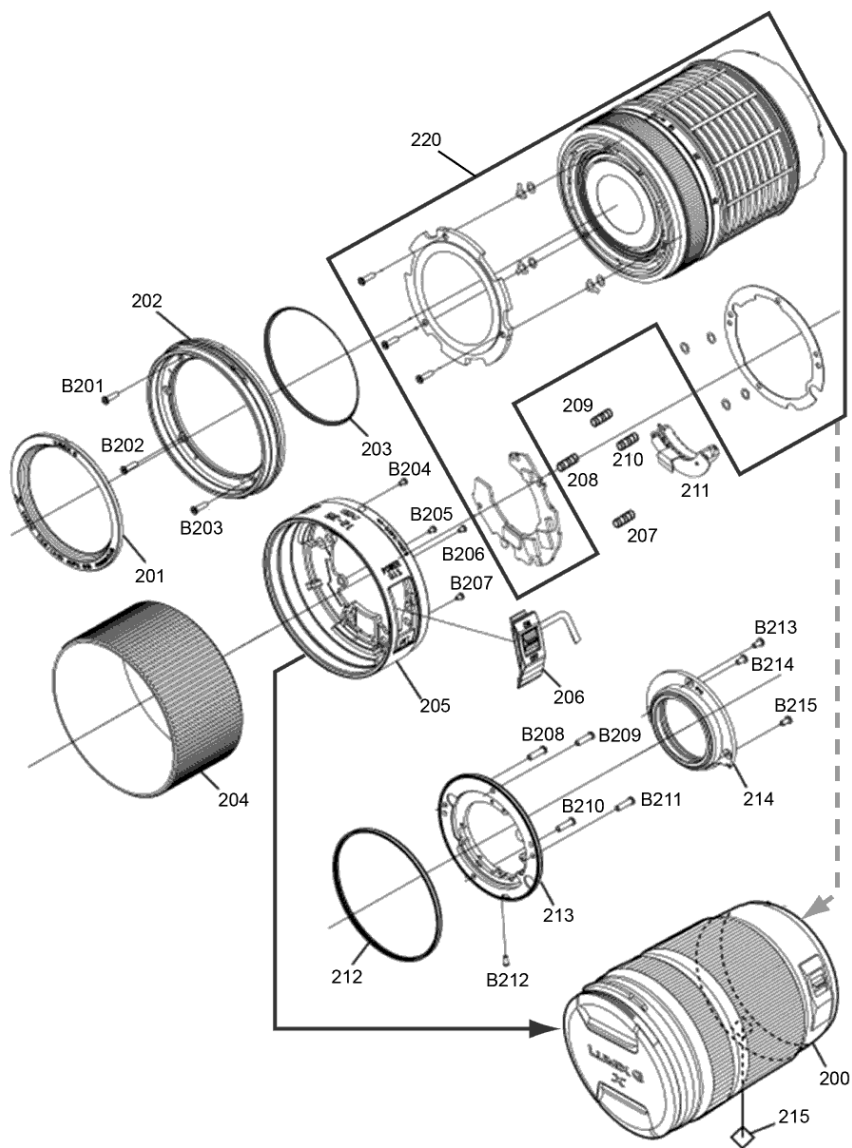

Model No. : H-HSA35100PP/E/GK parts list note

- Note:

 - 1. * Be sure to make your orders of replacement parts according to this list.
 - 2. IMPORTANT SAFETY NOTICE
Components identified with the mark  have the special characteristics for safety.
When replacing any of these components, use only the same type.
 - 3. Unless otherwise specified,
All resistors are in OHMS, K=1,000 OHMS. All capacitors are in MICRO-FARADS (uf), P=uuF.
 - 4. The marking (RTL) indicates the retention time is limited for this item. After the discontinuation of this assembly in production, it will no longer be available.
 - 5. Supply of CD-ROM, in accordance with license protection, is allowable as replacement parts only for customers who accidentally damaged or lost their own.

E.S.D. standards for Electrostatically Sensitive Devices, refer to PREVENTION OF ELECTROSTATIC DISCHARGE (ESD) TO ELECTROSTATICALLY SENSITIVE (ES) DEVICES section.
All parts are supplied from AVC-IMAGING.
