⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by **⚠** in the Schematic Diagrams, Circuit Board Diagrams, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

1 Safety Precautions

1.1. General Guidelines

1. When conducting repairs and servicing, do not attempt to modify the equipment, its parts or its materials.
2. When wiring units (with cables, flexible cables or lead wires) are supplied as repair parts and only one wire or some of the wires have been broken or disconnected, do not attempt to repair or re-wire the units. Replace the entire wiring unit instead.
3. When conducting repairs and servicing, do not twist the Fasten connectors but plug them straight in or unplug them straight out.
4. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
5. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
6. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

1.2. Touch-Current Check

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect a measuring network for touch currents between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in Figure 1.
3. Use Leakage Current Tester (Simpson 228 or equivalent) to measure the potential across the measuring network.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reserve the AC plug in the AC outlet and repeat each of the above measure.
6. The potential at any point (TOUCH CURRENT) expressed as voltage U_1 and U_2 , does not exceed the following values:

For a. c.: $U_1 = 35 \text{ V (peak)}$ and $U_2 = 0.35 \text{ V (peak)}$;

For d. c.: $U_1 = 1.0 \text{ V}$,

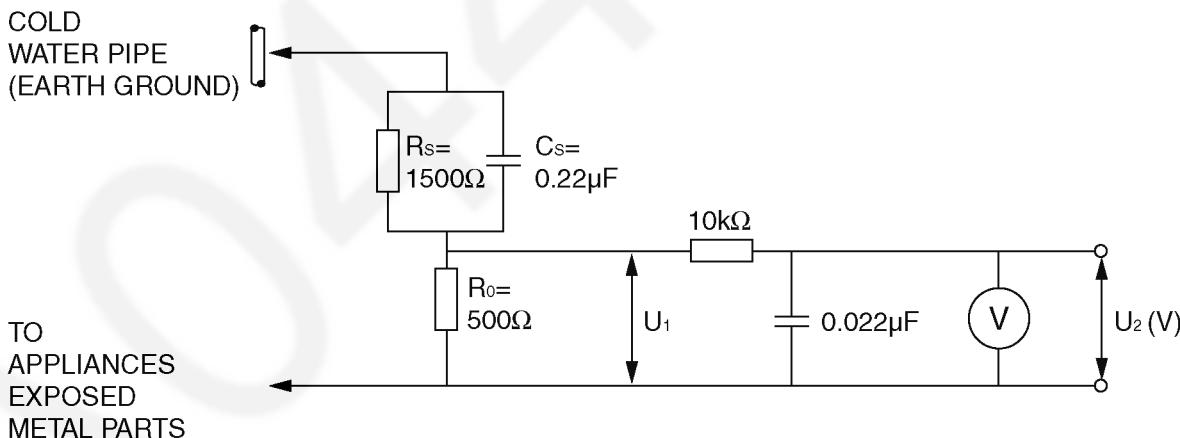

Note:

The limit value of $U_2 = 0.35 \text{ V (peak)}$ for a. c. and $U_1 = 1.0 \text{ V}$ for d. c. correspond to the values 0.7 mA (peak) a. c. and 2.0 mA d. c.

The limit value $U_1 = 35 \text{ V (peak)}$ for a. c. correspond to the value 70 mA (peak) a. c. for frequencies greater than 100 kHz.

7. In case a measurement is out of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

Measuring network for TOUCH CURRENTS

Resistance values in ohms (Ω)

V: Voltmeter or oscilloscope
(r.m.s. or peak reading)

Input resistance: $\geq 1 M\Omega$

Input capacitance: $\leq 200 \text{ pF}$

Frequency range: 15 Hz to 1 MHz and d.c. respectively

NOTE - Appropriate measures should be taken to obtain the correct value in case of non-sinusoidal waveforms.

Figure 1

2 Warning

2.1. Prevention of Electrostatic Discharge (ESD) to Electrostatically Sensitive (ES) Devices

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor [chip] components. The following techniques should be used to help reduce the incidence of component damage caused by electrostatic discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder removal device. Some solder removal devices not classified as [anti-static (ESD protected)] can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

Caution

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise ham less motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

2.2. About lead free solder (PbF)

Note: Lead is listed as (Pb) in the periodic table of elements.

In the information below, Pb will refer to Lead solder, and PbF will refer to Lead Free Solder.

The Lead Free Solder used in our manufacturing process and discussed below is (Sn+Ag+Cu).

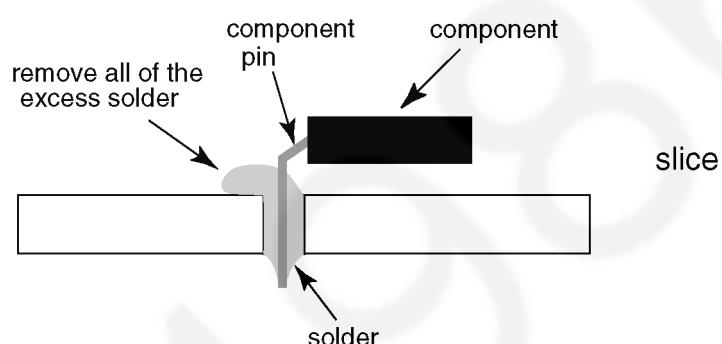

That is Tin (Sn), Silver (Ag) and Copper (Cu) although other types are available.

This model uses Pb Free solder in it's manufacture due to environmental conservation issues. For service and repair work, we'd suggest the use of Pb free solder as well, although Pb solder may be used.

PCBs manufactured using lead free solder will have the PbF within a leaf symbol **PbF** stamped on the back of PCB.

Caution

- Pb free solder has a higher melting point than standard solder. Typically the melting point is 50 ~ 70 °F (30~40 °C) higher. Please use a high temperature soldering iron and set it to 700 ± 20 °F (370 ± 10 °C).
- Pb free solder will tend to splash when heated too high (about 1100 °F or 600 °C). If you must use Pb solder, please completely remove all of the Pb free solder on the pins or solder area before applying Pb solder. If this is not practical, be sure to heat the Pb free solder until it melts, before applying Pb solder.
- After applying PbF solder to double layered boards, please check the component side for excess solder which may flow onto the opposite side. (see figure below)

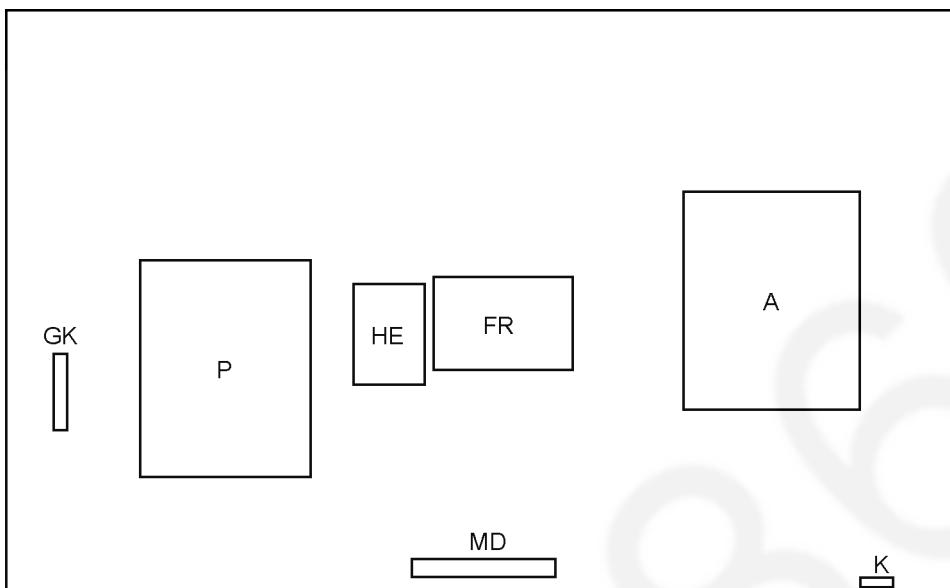

Suggested Pb free solder

There are several kinds of Pb free solder available for purchase. This product uses Sn+Ag+Cu (tin, silver, copper) solder. However, Sn+Cu (tin, copper), Sn+Zn+Bi (tin, zinc, bismuth) solder can also be used.

0 .3mm X 100g	0 .6mm X 100g	1 .0mm X 100g

3 Service Navigation

3.1. PCB Layout

Board Name	Function
A-Board	Main
FR-Board	FRC
P-Board	Power
K-Board	IR/LED/CATS
GK-Board	SWITCH
MD-Board	HUMAN ACTIVITY SENSOR
HE-Board	HEVC

4 Specifications

■ Product fiche

Energy efficiency class (E/W)	B
Visible screen size (diagonal)	146 cm / 58 inches
On mode average power consumption (E/W)	182 W
On mode power consumption / screen area (R)	0.020 W / cm ²
Annual energy consumption ^{*1} (E/W)	252 kWh
Standby power consumption ^{*2}	0.20 W
Off mode power consumption	0.20 W
Screen resolution	3 840 (W) × 2 160 (H)

*1: Energy consumption XYZ kWh per year, based on the power consumption of the television operating 4 hours per day for 365 days.

The actual energy consumption will depend on how the television is used.

*2: when the TV is turned off with the remote control and no function is active.

For the information of rated power consumption, refer to the label on the TV back cover.

■ TV

Dimensions (W × H ^{*1} × D)

1 306 mm × 803 mm × 294 mm (With Pedestal)
1 306 mm × 779 mm × 42 mm (TV only)

Mass

48.0 kg Net (With Pedestal)

33.0 kg Net (TV only)

Power source

AC 220-240 V, 50 / 60 Hz

IEEE802.11b/g/n (E/W)	2.412 GHz - 2.472 GHz	
IEEE802.11b/g/n (R)	2.400 GHz - 2.4835 GHz	
Security	WPA2-PSK (TKIP/AES), WPA-PSK (TKIP/AES), WEP (64 bit/128 bit)	
Bluetooth wireless technology* ³		
Standard Compliance	Bluetooth 3.0	
Frequency Range	2.402 GHz - 2.480 GHz	

*1: With Camera pop-up: +24 mm height

*2: The frequency and channel differ depending on the country.

*3: Not all the Bluetooth compatible devices are available with this TV. Up to 5 devices can be used simultaneously (except the 3D eyewear and VIERA Touch Pad Controller).

■ 3D Eyewear

Dimensions (W × H × D)	164.7 mm × 41.0 mm × 170.7 mm
Mass	Approx. 34 g
Usage temperature range	0 °C - 40 °C
Battery	Coin-shaped lithium battery CR2025
Operation time	Approx. 75 hours in continuous use of the battery made by Panasonic
Materials	
Main body	Resin
Lens section	Liquid crystal glass

Note

- 3D Eyewear and Touch Pad Controller use Bluetooth wireless technology.
- Design and Specifications are subject to change without notice. Mass and Dimensions shown are approximate.
- For the information of the open source software, refer to [eHELP] (Support > Licence).
- This equipment complies with the EMC standards listed below. (E/W)
EN55013, EN61000-3-2, EN61000-3-3, EN55020, EN55022, EN55024 (E/W)

5 Technical Descriptions

5.1. Specification of KEY for CI Plus, DTCP-IP, One-to-One, Widevine, Netflix and HDCP

5.1.1. General information:

1. eMMC (IC8903) for spare parts has the seed of KEY for each.
 2. The final KEY data will be generated by Main IC (IC8000) when SELF CHECK was done and are stored in both Main IC (IC8000) and eMMC (IC8903).
- All KEY are not generated for all models.
The necessary KEY are only generated and stored depend on the feature of models.

5.1.2. Replacement of ICs:

When Main IC (IC8000) is replaced, eMMC (IC8903) should be also replaced with new one the same time.

When eMMC (IC8903) is replaced, Main IC (IC8000) is not necessary to be replaced the same time.

After the replacement of IC, SELF CHECK should be done to generate the final KEY data.

How to SELF CHECK: While pressing [VOLUME (-)] button on the main unit, press [MENU] button on the remote control for more than 3 seconds.

TV will be forced to the factory shipment setting after this SELF CHECK.

5.1.3. Model and Keys:

Model No.	Keys					
	One-to-One (For USB Rec.)	CI Plus	DTCP-IP	WIDEVINE	Netflix	HDCP2
TX-58AX800E	Yes	Yes	Yes	Yes	Yes	Yes
TX-58AXW804	Yes	Yes	Yes	Yes	Yes	Yes
TX-58AXR800	Yes	Yes	None	Yes	Yes	Yes

5.2. USB HDD Recording

5.2.1. General information:

Digital TV programmes can be recorded in USB HDD.

A One-to-One key generated in A-board by SELF CHECK binds TV and USB-HDD for communication.

That key is only one key for them. If the key is difference, TV can not access USB-HDD.

Caution:

New key will be generated by following SELF CHECK and previous TV programmes recorded in USB HDD will not be viewed.

SELF CHECK: While pressing [VOLUME (-)] button on the main unit, press [MENU] button on the remote control for more than 3 seconds.

5.3. Service port (M3 mini Jack) Specifications

The Service port (M3 mini Jack) can use as the RS232C terminal which is a standard computer SERIAL interface.

*This operation system should be used by the certified professional dealer.

PC Control of the TV

- The TV can be controlled by a personal computer when connected through an RS232C/ M3 mini jack conversion cable (not supplied).
- The computer will require software which allows sending and receiving of control data through its SERIAL port.
Please see required parameters and commands below.

Communication parameters

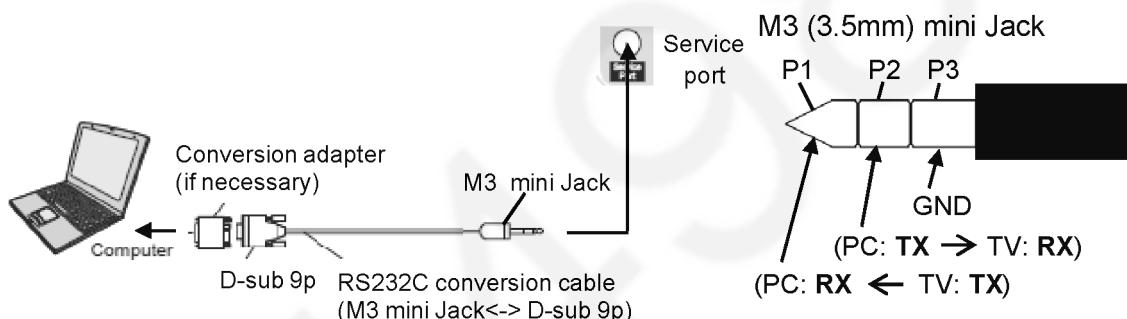

Signal level	RS-232C compliant
Synchronization method	Asynchronous
Baud rate	9600 bps
Parity	None
Character length	8 bits
Stop bit	1 bit
Flow control	-

Basic format for control data

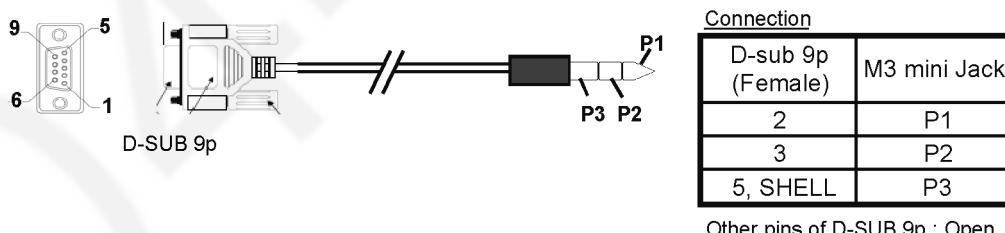

The transmission of control data from the PC starts with a STX signal, followed by the command, the parameters, and lastly an EXT signal in that order. If there are no parameters, then the parameter signal does not need to be sent.

*Please see other side regarding Commands and Parameters.

Connection

(Recommended connection of D-SUB 9p / M3 mini jack conversion cable)

Command: 3 byte (fixed)

Colon and Parameter are only sent when necessary

End (03 h): 1 byte

Start (02 h): 1 byte

Colon: 1 byte

Parameter: 5 bytes maximum

(Length depends on Command)

Notes:

- With standby mode, this TV responds to "PON" and "QPW" commands only.
- Wait for the response of the first command to come from this unit before sending the next command.
- If multiple commands are transmitted, be sure to keep intervals of 250 m sec.
Send the command again when the call back command is unusual.
- If an incorrect command is sent by mistake, this TV will send an "ER401" or "ER402" command back to the computer.
- This TV does not respond for 15 seconds when "PON" or "POF" commands are transmitted.
- Send "EXT" commands before sending "IMS:***" commands.
- MUTE commands ("AMT: 0" and "AMT: 1") and "AVL: ***" command are invalid in case of HDMI (CEC) cooperation.
However AMT, AUU, AUD commands are effective. (MUTE rotation (toggle), VOLUME UP and VOLUME DOWN controls are possible.)

Connection

Disconnection

6 Service Mode

6.1. How to enter into Service Mode

6.1.1. Purpose

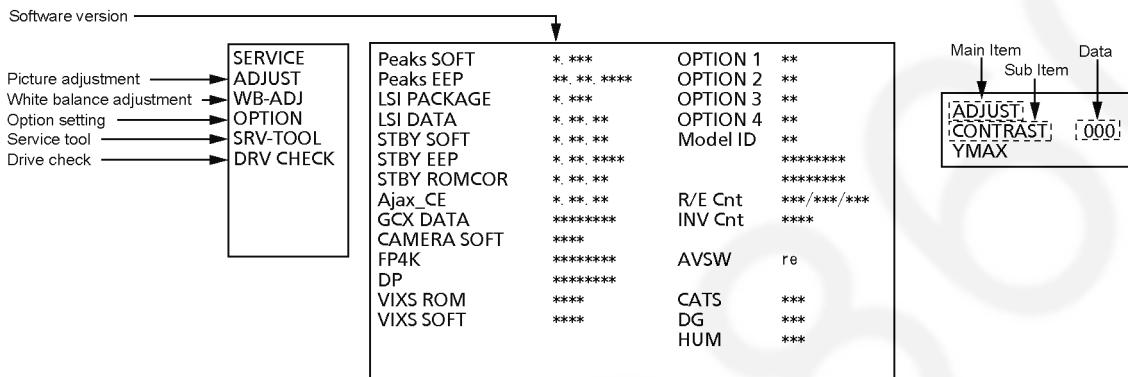

After exchange parts, check and adjust the contents of adjustment mode.

While pressing [VOLUME (-)] button of the main unit, press [RED] button of the remote control three times within 2 seconds.

Note:

Service Mode can not be entered when 3D signal input.

Input 2D signal to enter Service Mode.

6.1.2. Key command

Press the [3/4] button to change the adjustment values or function.

Press the [1/2] button to step up/down through the functions and adjustments.

Press the numerical button [VOLUME (+/-)] to change of each option item.

Press the [OK] button after each adjustment has been made to store the required values.

6.1.3. How to exit

Switch off the power with the [POWER] button on the main unit or the [POWER] button on the remote control.

6.1.4. Contents of adjustment mode

- Value is shown as a hexadecimal number.
- Preset value differs depending on models.
- After entering the adjustment mode, take note of the value in each item before starting adjustment.

Main item	Sub item	Sample Data	Remark
ADJUST	CONTRAST	24E	
	COLOR	2F	
	TINT	00	
	SUB-BRT	800	
	BACKLGT	FFF

6.2. Service tool mode

6.2.1. How to access

1. Select [SRV-TOOL] in Service Mode.
2. Press [OK] button on the remote control.

SRV-TOOL		
Display of Flash ROM maker code →	Flash ROM : 0 - 0	
Display of SOS History →	PTCT : 00 . 00 . 00 . 00 . 00 .	Time 00000:40 On/Off 0000001
		← POWER ON TIME/COUNT Press [MUTE] button (3 seconds)

6.2.2. Display of SOS History

SOS History (Number of LED blinking) indication.

From left side; Last SOS, before Last, three occurrence before, 2nd occurrence after shipment, 1st occurrence after shipment.
This indication except 2nd and 1st occurrence after shipment will be cleared by [Self-check indication and forced to factory shipment setting].

6.2.3. POWER ON Time, On/Off

Note : To display TIME/COUNT menu, highlight position, then press MUTE for 3 seconds.

Time : Cumulative power on time, indicated hour : minute by decimal

On/Off : Number of On/Off switching by decimal

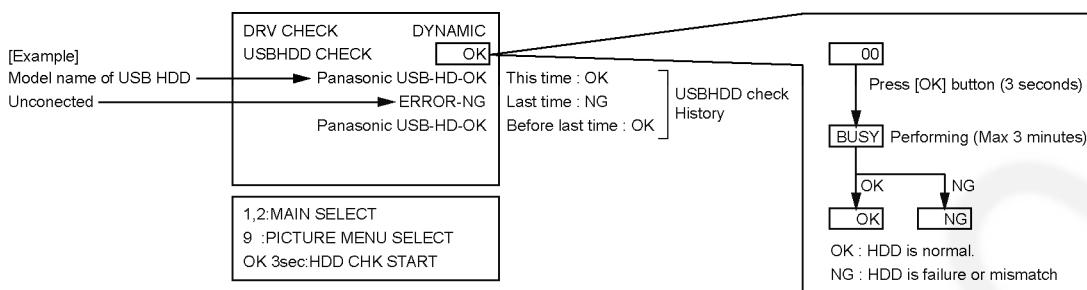

Note : This indication will not be cleared by either of the self-checks or any other command.

6.2.4. Exit

Disconnect the AC cord from wall outlet or switch off the power with [Power] button on the main unit.

6.3. DRV Check - USBHDD Check

1. Select [DRV Check - USBHDD Check] in Service Mode.
2. Press [OK] button on the remote control for more than 3 seconds.

6.4. Hotel mode

6.4.1. Purpose

Restrict a function for hotels.

6.4.2. Access command to the Hotel mode setup menu

In order to display the Hotel mode setup menu, please enter the following command (within 2 seconds).
[TV]: Vol.[Down] + [REMOTE] : AV (3 times)

Then, the Hotel mode setup menu is displayed.

Hotel Mode	
Hotel Mode	Off
Initial INPUT	Off
Initial POS	Off
Initial VOL Level	Off
Maximum VOL Level	100
Button Lock	Off
Remote Lock	Off
Private Information	Keep
Select	
Change	
RETURN	

6.4.3. To exit the Hotel mode setup menu

Switch off the power with the [POWER] button on the main unit or the [POWER] button on the remote control.

6.4.4. Explain the Hotel mode setup menu

Item	Function
Hotel Mode	Select hotel mode On/Off
Initial INPUT	Select input signal modes. Set the input, when each time power is switched on. Selection : Off, Analogue, DVB-S, DVB-C, DVB-T, AV1, AV2, HDMI1, HDMI2, HDMI3, HDMI4, DisplayPort • Off: give priority to a last memory.
Initial POS	Select programme number. Selection : Off/0 to 99 • Off: give priority to a last memory
Initial VOL Level	Adjust the volume when each time power is switched on. Selection/Range : Off/0 to 100 • Off: give priority to a last memory
Maximum VOL Level	Adjust maximum volume. Range : 0 to 100
Button Lock	Select local key conditions. Selection : Off/SETUP/MENU • Off: altogether valid • SETUP: only F-key is invalid (Tuning guide (menu) can not be selected.) • MENU: only F-key is invalid (only Volume/Mute can be selected.)
Remote Lock	Select remote control key conditions. Selection : Off/SETUP/MENU • Off: altogether valid • SETUP: only Setup menu is invalid • MENU: Picture/Sound/Setup menu are invalid
Private Information	Select private information for VIERA Cast is Keep or Reset if Hotel mode is set to [On] when TV power on. Selection : Keep/Reset • Keep: private information for VIERA Cast is keep • Reset: private information for VIERA Cast is reset

6.5. Data Copy by USB Memory

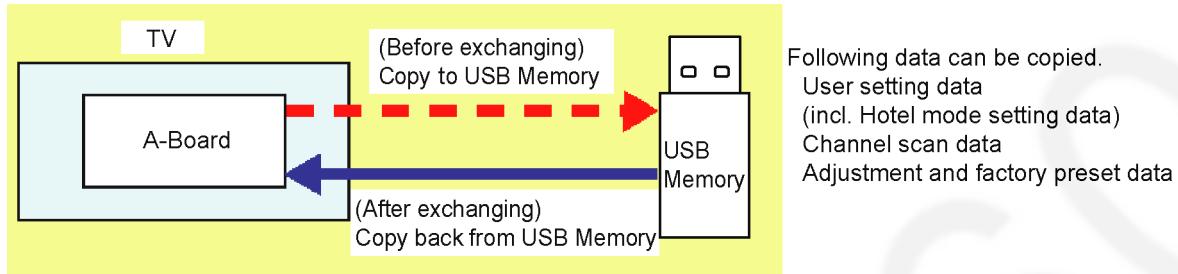

Note:

SD card can not be used for Data Copy.

6.5.1. Purpose

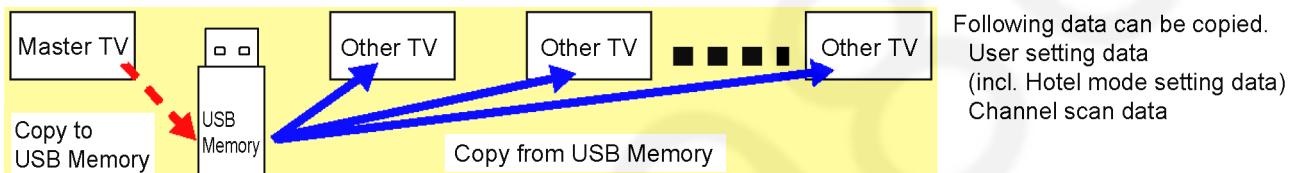

(a) Board replacement (Copy the data when exchanging A-board):

When exchanging A-board, the data in original A-board can be copied to USB Memory and then copy to new A-board.

(b) Hotel (Copy the data when installing a number of units in hotel or any facility):

When installing a number of units in hotel or any facility, the data in master TV can be copied to USB Memory and then copy to other TVs.

6.5.2. Preparation

Make pwd file as startup file for (a) or (b) in a empty USB Memory.

1. Insert a empty USB Memory to your PC.
2. Right-click a blank area in a USB Memory window, point to New, and then click text document. A new file is created by default (New Text Document.txt).
3. Right-click the new text document that you just created and select rename, and then change the name and extension of the file to the following file name for (a) or (b) and press ENTER.

File name:

- (a) For Board replacement : boardreplace.pwd
- (b) For Hotel : hotel.pwd

Note:

Please make only one file to prevent the operation error.

No any other file should not be in USB Memory.

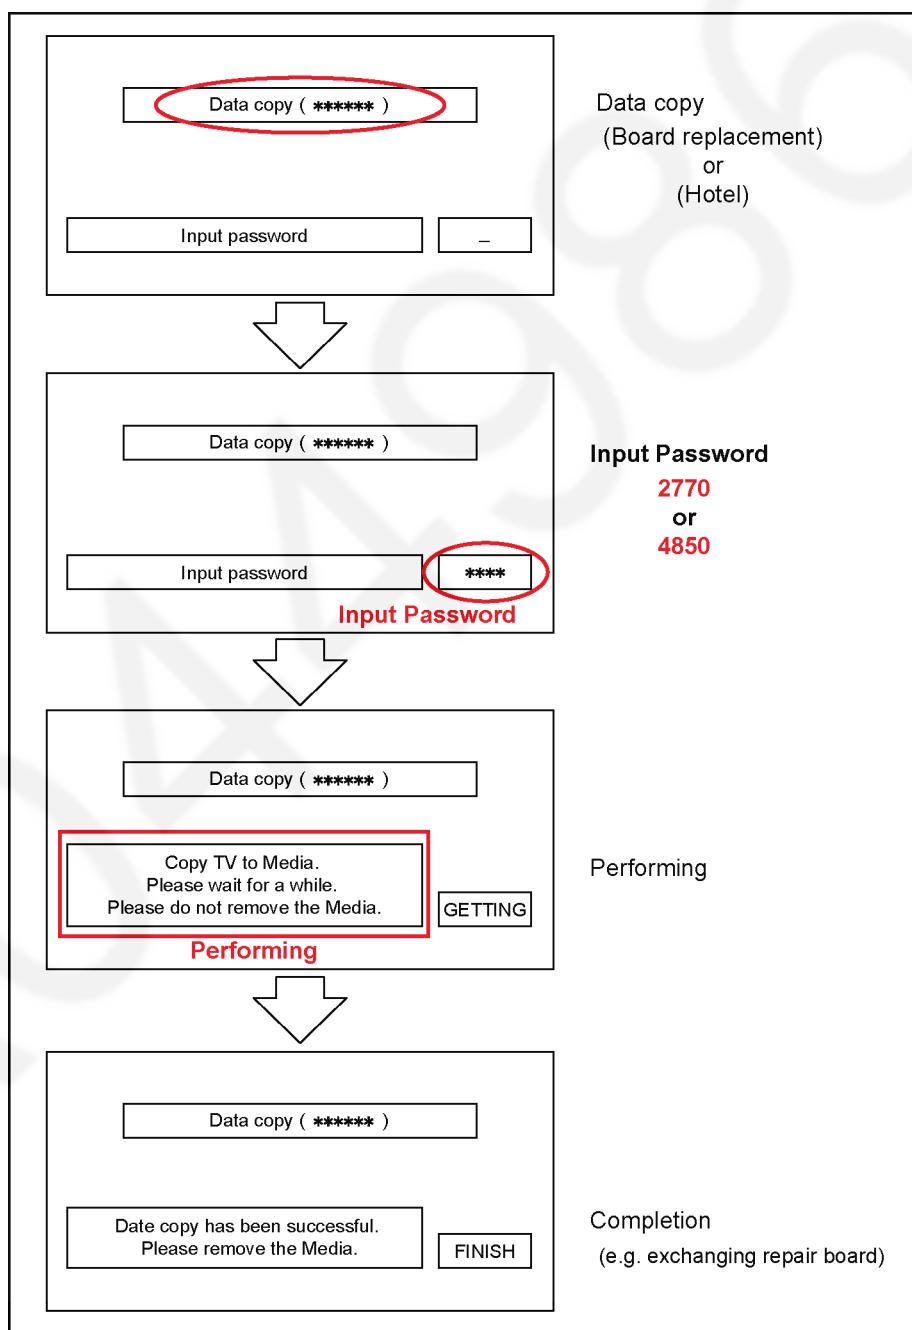

6.5.3. Data copy from TV set to USB Memory

1. Turn on the TV set.
2. Insert USB Memory with a startup file (pwd file) to USB terminal.
On-screen Display will be appeared according to the startup file automatically.
3. Input a following password for (a) or (b) by using remote control.
 - (a) For Board replacement : 2770
 - (b) For Hotel : 4850
- Data will be copied from TV set to USB Memory.
It takes around 2 to 6 minutes maximum for copying.
4. After the completion of copying to USB Memory, remove USB Memory from TV set.
5. Turn off the TV set.

Note:

Following new folder will be created in USB Memory for data from TV set.

- (a) For Board replacement : user_setup
- (b) For Hotel : hotel

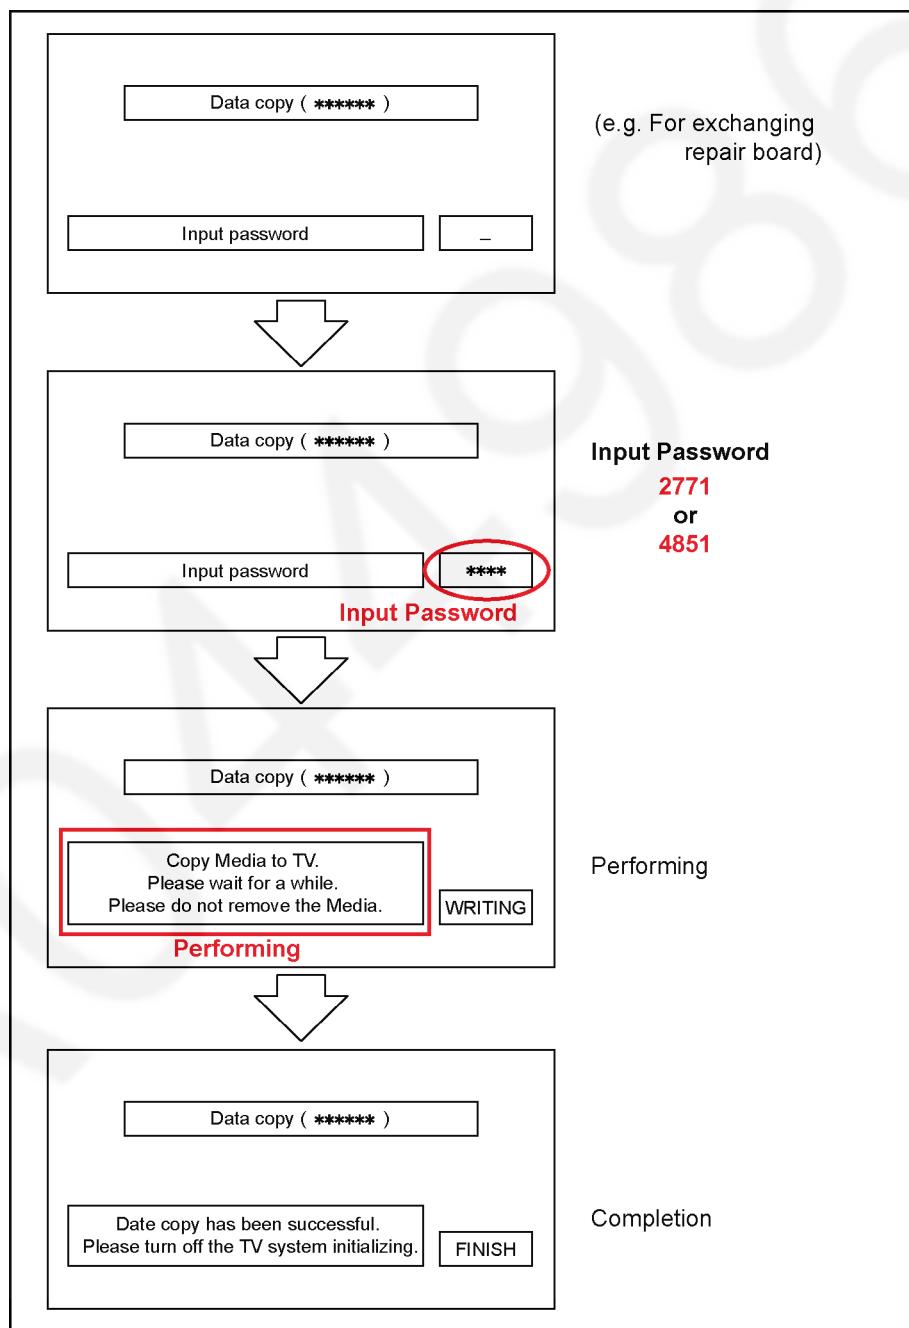

6.5.4. Data copy from USB Memory to TV set

1. Turn on the TV set.
2. Insert USB Memory with Data to USB terminal.
On-screen Display will be appeared according to the Data folder automatically.
3. Input a following password for (a) or (b) by using remote control.
 - (a) For Board replacement : 2771
 - (b) For Hotel : 4851
- Data will be copied from USB Memory to TV set.
4. After the completion of copying to USB Memory, remove USB Memory from TV set.
 - (a) For Board replacement : Data will be deleted after copying (Limited one copy).
 - (b) For Hotel : Data will not be deleted and can be used for other TVs.
5. Turn off the TV set.

Note:

1. Depending on the failure of boards, function of Data copy for board replacement does not work.
2. This function can be effective among the same model numbers.

7 Troubleshooting Guide

Use the self-check function to test the unit.

1. Checking the IIC bus lines
2. Power LED Blinking timing

7.1. Check of the IIC bus lines

7.1.1. How to access

7.1.1.1. Self-check indication only:

Produce TV reception screen, and while pressing [VOLUME (-)] button on the main unit, press [OK] button on the remote control for more than 3 seconds.

7.1.1.2. Self-check indication and forced to factory shipment setting:

Caution:

New key will be generated and previous TV programmes recorded in USB HDD will not be viewed. (See USB HDD Recording)

Produce TV reception screen, and while pressing [VOLUME (-)] button on the main unit, press [MENU] button on the remote control for more than 3 seconds.

7.1.2. Screen display

58		
SELF CHECK COMPLETE

H82DP	IC3500	DP-HDMI	A-BOARD/DISPLAYPORT
H83HEVC	IC6000	HEVC	HE-BOARD

7.1.4. Exit

Disconnect the AC cord from wall outlet or press the [POWER] button on the main unit for 3 seconds to turn off and then turn on automatically.

7.2. Power LED Blinking timing chart

1. Subject

Information of LED Flashing timing chart.

2. Contents

When an abnormality has occurred the unit, the protection circuit operates and reset to the stand by mode. At this time, the defective block can be identified by the number of blinks of the Power LED on the front panel of the unit.

Blinking Times	Contents	Check point
1	BL SOS	LCD PANEL P-Board
3 (fast blinking)	IROM SOS	A-Board
6	FPGA SOS	A-Board
7	SUB 3.3V	A-Board
9	SOUND SOS	A-Board Speaker
10	GCX/FRC SOS	FR-Board
12	BE SOS	A-Board
13	EMERGENCY SOS	A-Board

7.3. LCD Panel / FR test mode

Purpose:

To find the possible failure point where in LCD Panel, FR board or A board when the abnormal picture is displayed.

Procedure:

Step 1. Go into LCD Panel test mode and confirm the symptom

While pressing [VOLUME (-)] button of the main unit, press [OPTION] button of the remote control three times within 2 seconds.

The several test patterns generated by LCD Panel are displayed. Judge by the following method.

Still abnormal picture is displayed: The cause must be in LCD Panel. Exit test mode.

Normal picture is displayed: The cause must be in A board or FR board. Go into FR test mode

Step 2. Go into FR test mode and confirm the symptom

During in LCD Panel test mode, press [OK] button on the remote control.

The test pattern generated by FR board is displayed. Judge by the following method.

Abnormal picture is displayed: The cause must be in FR board.

Normal picture is displayed: The cause must be in A board.

Step 3. How to Exit:

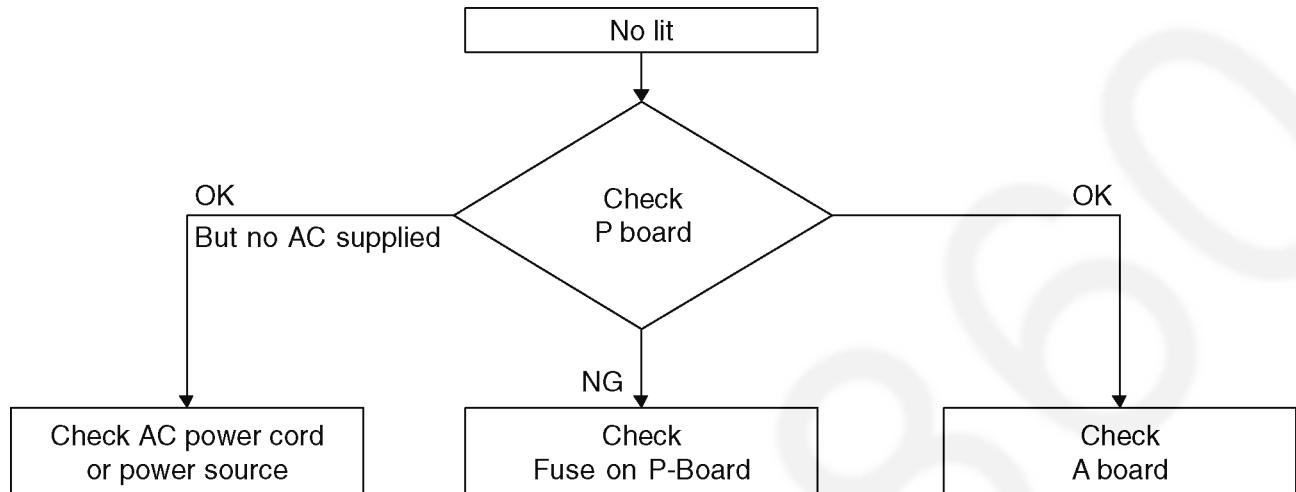

Switch off the power with the [POWER] button on the main unit or the [POWER] button on the remote control in LCD Panel test mode or FR test mode.

7.4. No Power

First check point

There are following 3 states of No Power indication by power LED.

1. No lit
2. Green is lit then turns red blinking a few seconds later. (See Power LED Blinking timing chart)
3. Only red is lit.

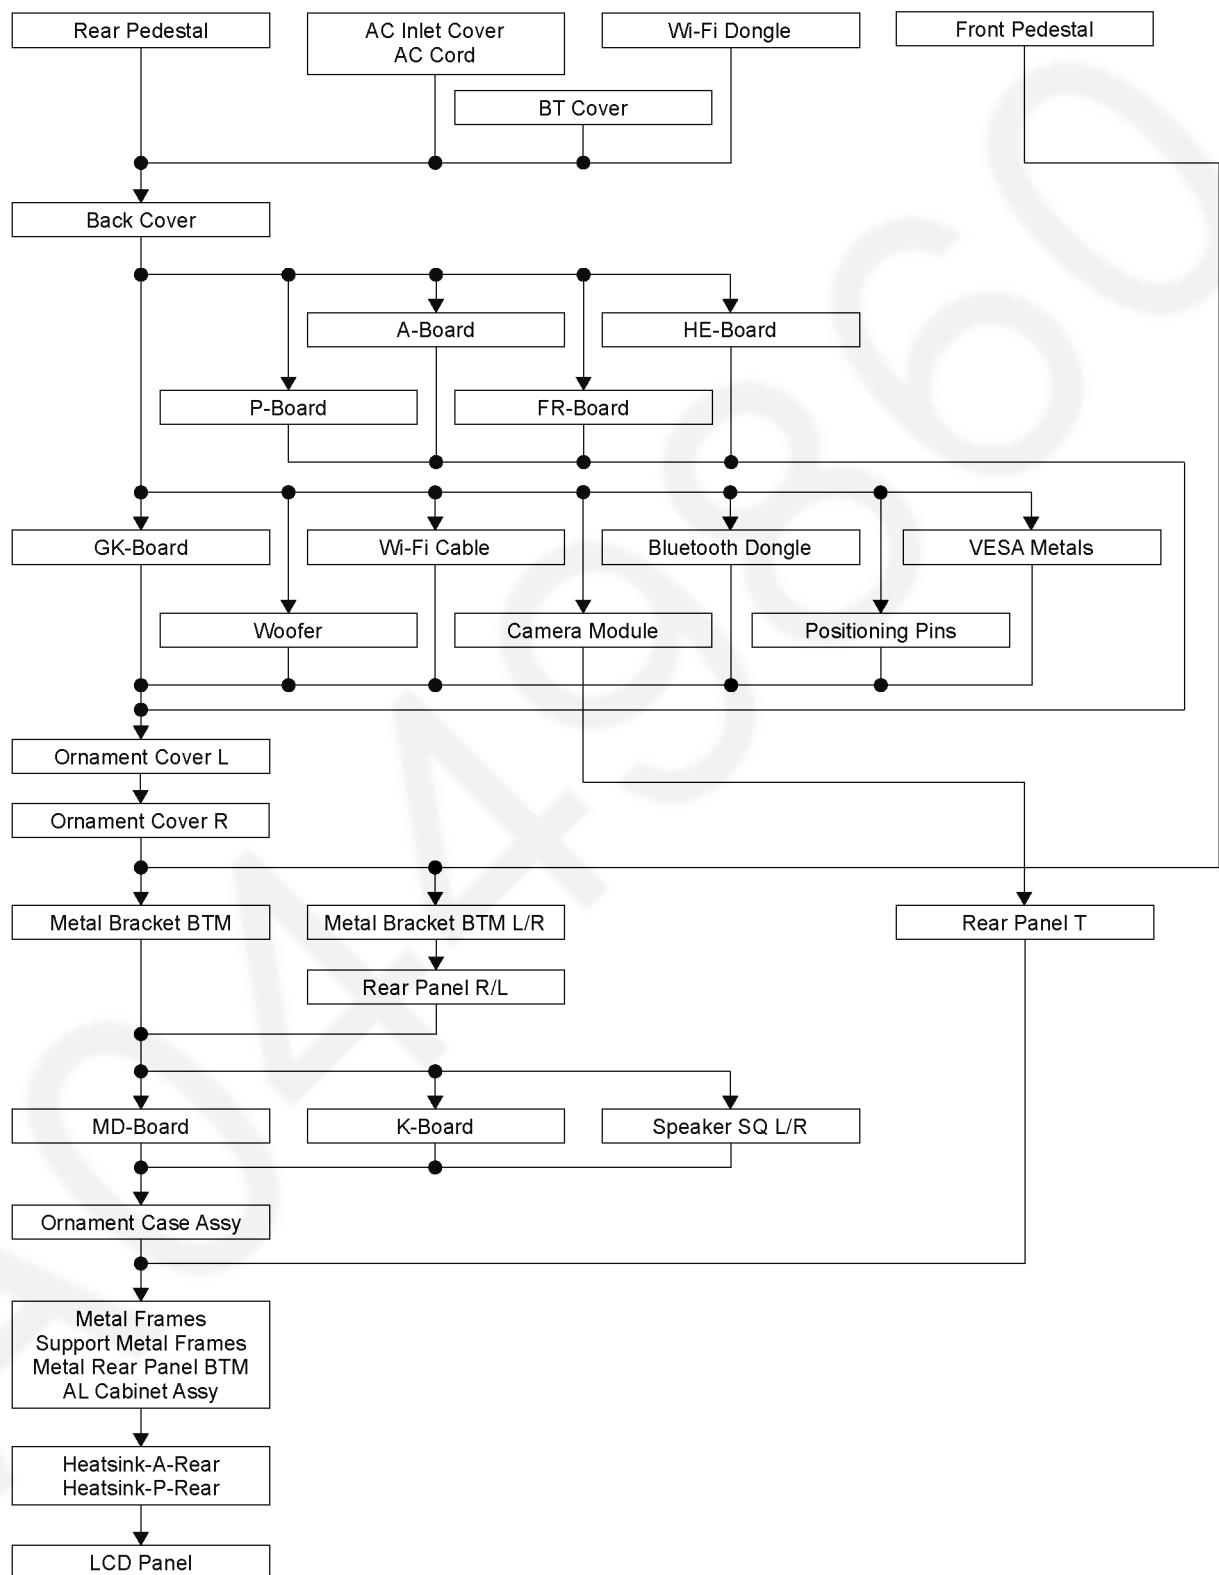

8 Disassembly and Assembly Instructions

8.1. Disassembly Flow Chart for the Unit

This is a disassembly chart.

When assembling, perform this chart conversely.

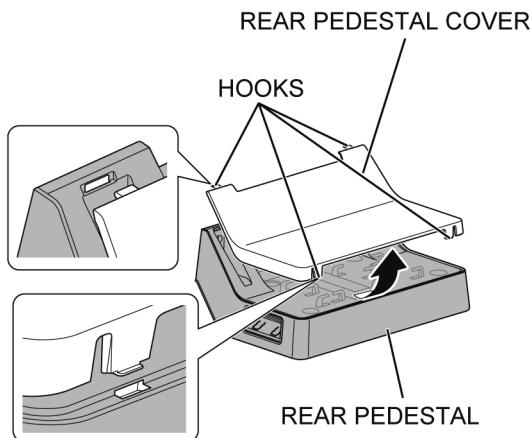

8.2. Disassembly Procedure for the Unit

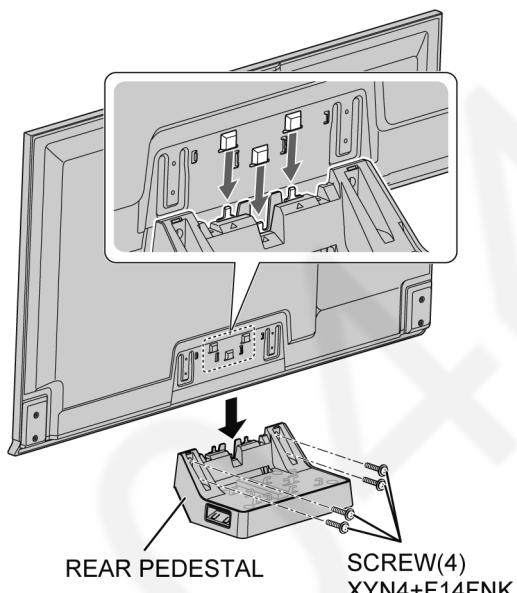

Lay down the unit so that the rear cover faces upward.

8.2.1. Rear Pedestal

1. Remove the 4 hooks.
2. Remove the Rear Pedestal Cover.

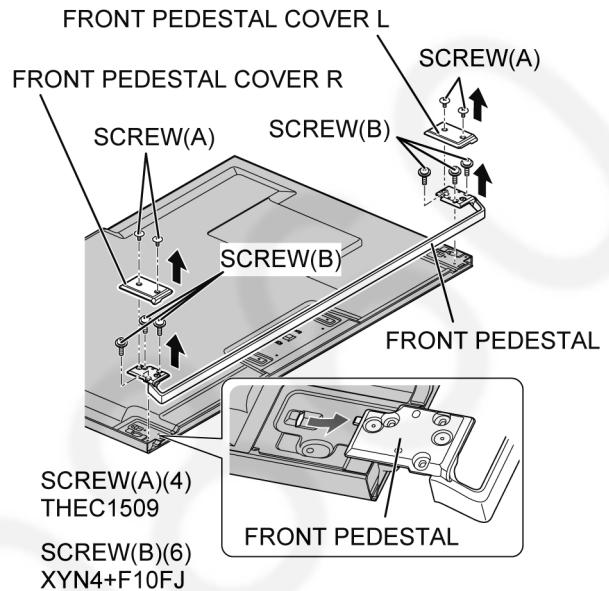

3. Remove the 4 screws.
4. Remove the Rear Pedestal.

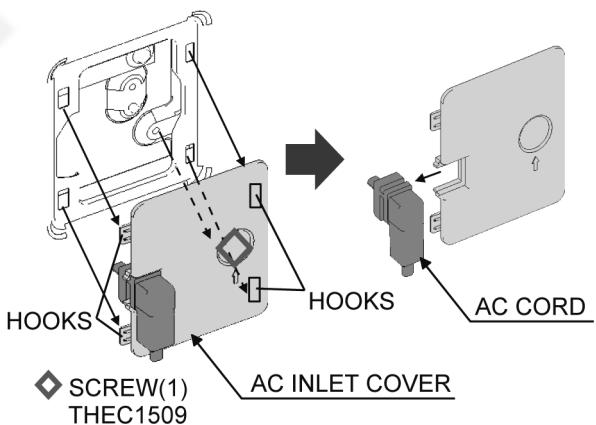

8.2.2. Front Pedestal

1. Remove the 4 screws (A).
2. Remove the Front Pedestal Cover L/R.
3. Remove the 6 screws (B).
4. Remove the Front Pedestal.

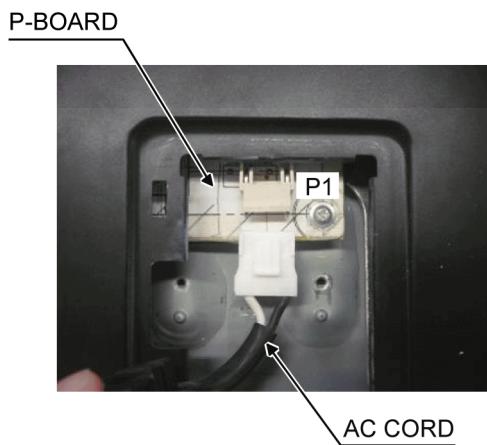

8.2.3. AC Inlet Cover and AC Cord

1. Remove the 1 screw.
2. Remove the 4 hooks.
3. Remove the AC Inlet Cover on AC Cord.

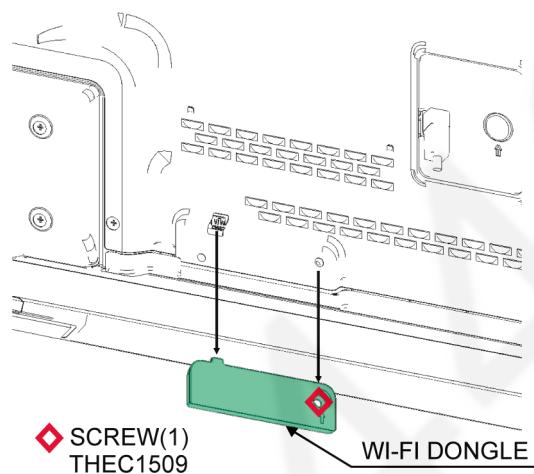

4. Disconnect the connector (P1) on P-Board.
5. Remove the AC Cord on P-Board.

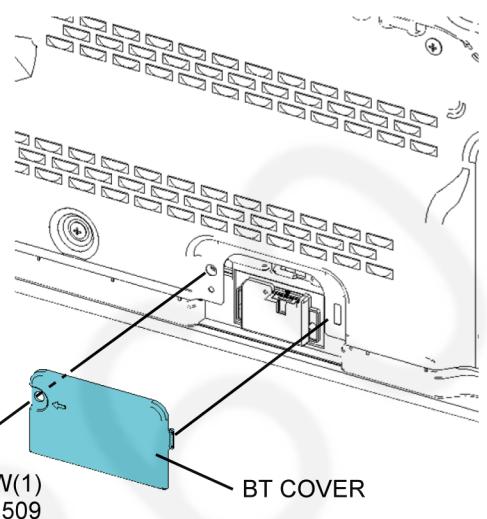

8.2.4. Wi-Fi Dongle

1. Remove the 1 screw.
2. Remove the Wi-Fi Dongle.

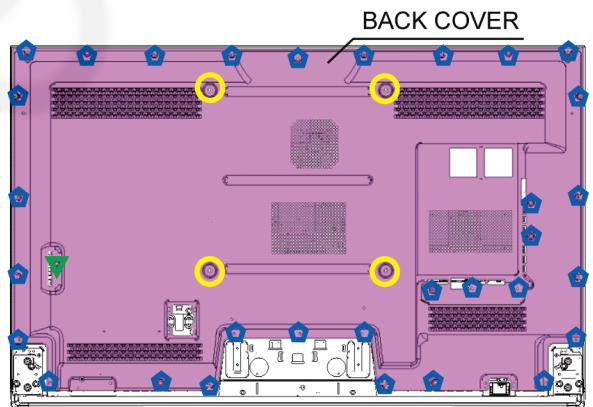

8.2.5. BT Cover

1. Remove the 1 screw.
2. Remove the BT Cover.

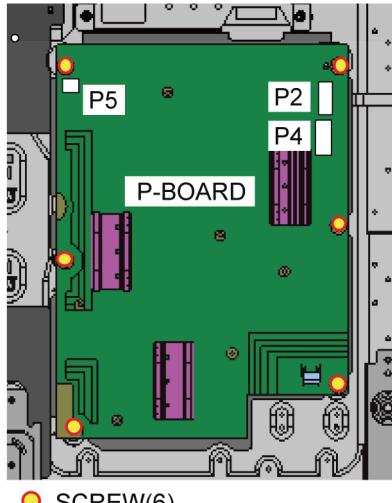

8.2.6. Back Cover

1. Remove the 31 screws (A).
2. Remove the 1 screw (B).
3. Remove the 4 M6 Caps.
4. Remove the Back Cover.

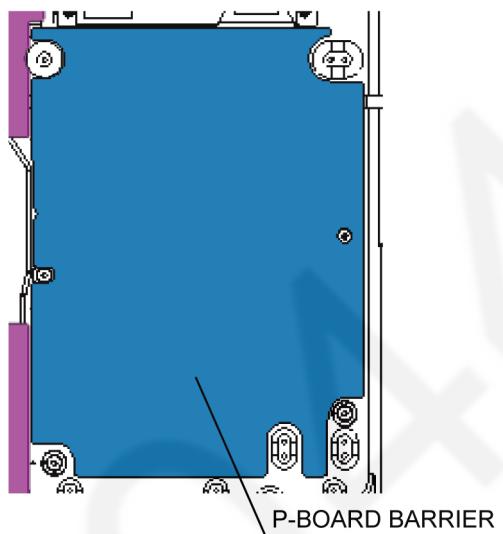

8.2.7. P-Board

1. Remove the 6 screws.
2. Disconnect the connectors (P2, P4 and P5).
3. Remove the P-Board.

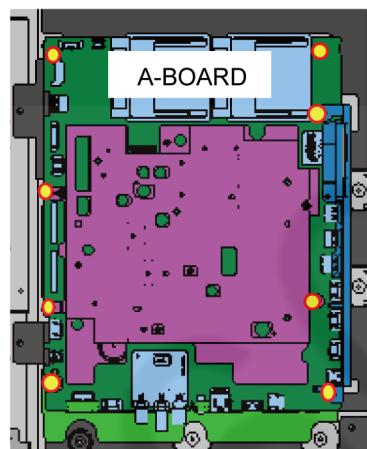

4. Remove the P-Board Barrier.

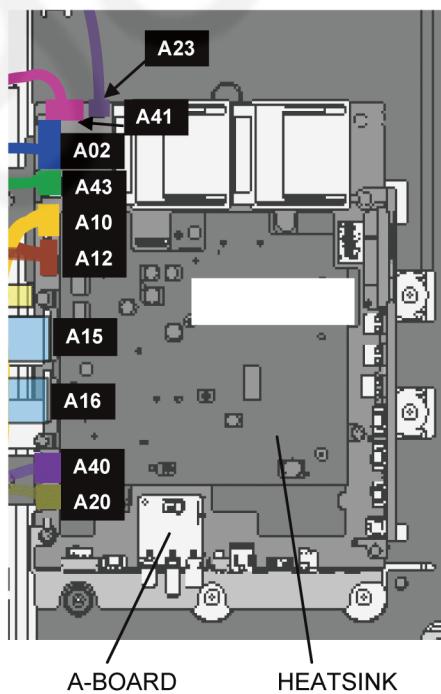

8.2.8. A-Board

1. Remove the 8 screws.

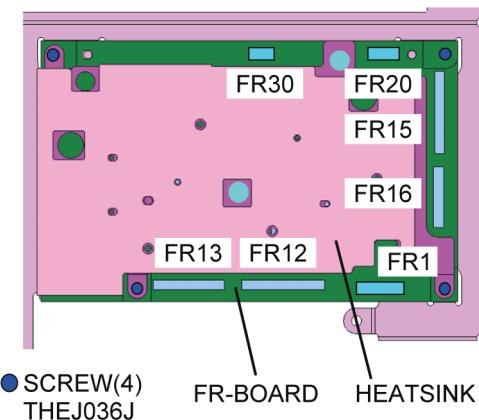

2. Disconnect the connectors (A02, A10, A12 ,A15, A16, A20, A23, A40, A41 and A43).
3. Remove the A-Board with the Heatsink.

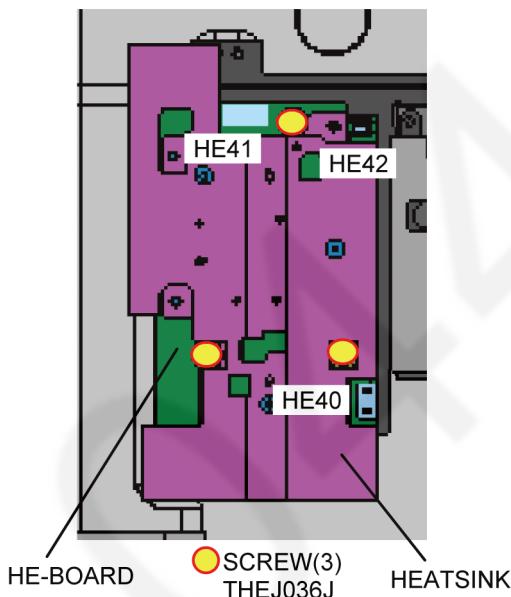

8.2.9. FR-Board

1. Remove the 4 screws.
2. Disconnect the connectors (FR1, FR12, FR13, FR15, FR16, FR20 and FR30).
3. Remove the FR-Board with the Heatsink.

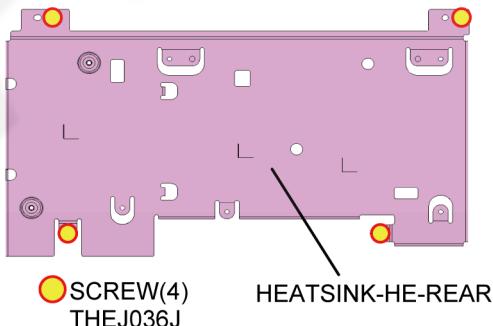

8.2.10. HE-Board

1. Remove the 3 screws.
2. Disconnect the connectors (HE40, HE41 and HE42).
3. Remove the HE-Board with the Heatsink.

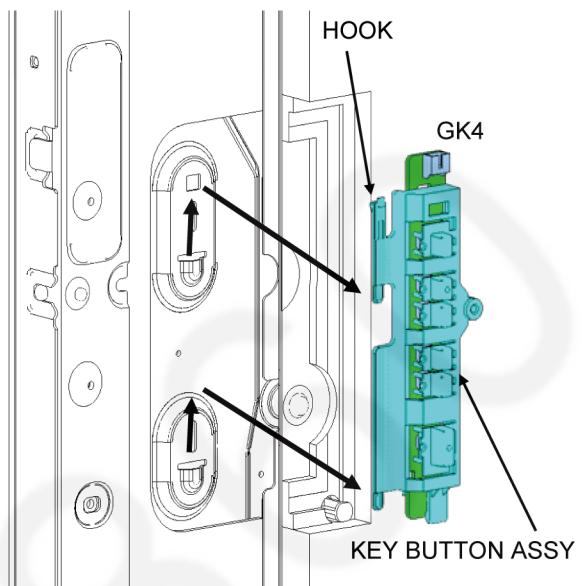

4. Remove the 4 screws.
5. Remove the Heatsink-HE-Rear.

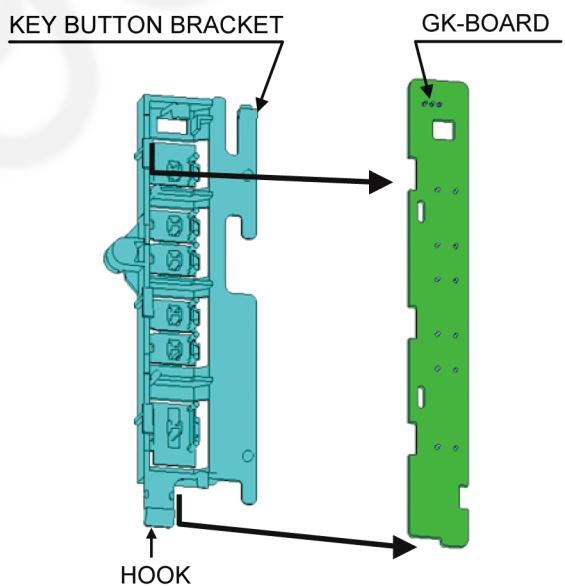

8.2.11. GK-Board

1. Disconnect the connector (GK4).
2. Remove the 1 hook.

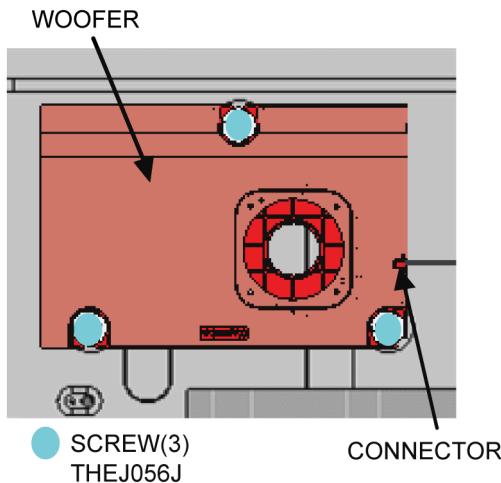

3. Remove the 1 hook.
4. Remove the GK-Board and the Key Button Bracket.

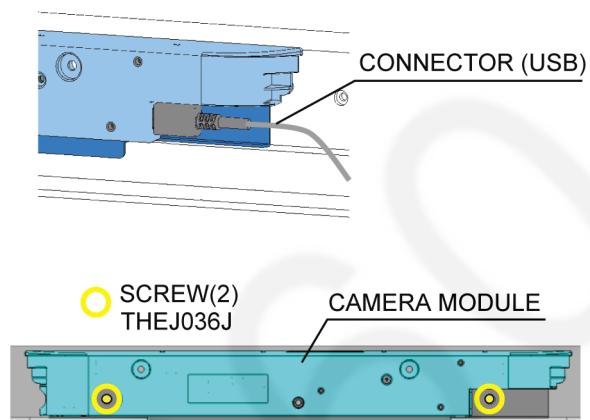

8.2.12. Woofer

1. Disconnect the connector.
2. Remove the 3 screws.
3. Remove the Woofer.

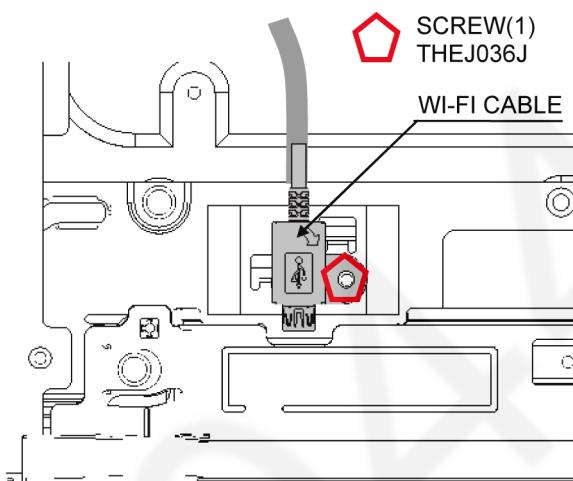

8.2.14. Camera Module

1. Disconnect the connector (USB).
2. Remove the 2 screws.
3. Remove the Camera Module.

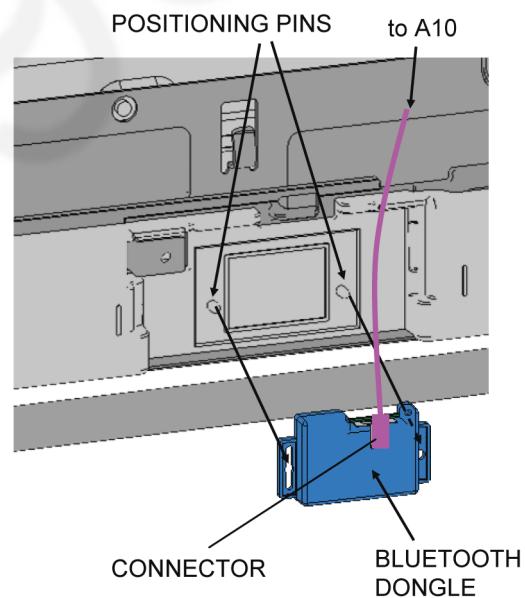

8.2.13. Wi-Fi Cable

1. Remove the 1 screw.
2. Remove the Wi-Fi Cable.

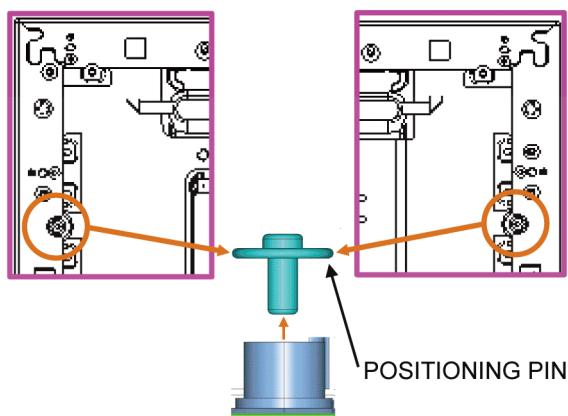

8.2.15. Bluetooth Dongle

1. Disconnect the connector.
2. Remove the Bluetooth Dongle.

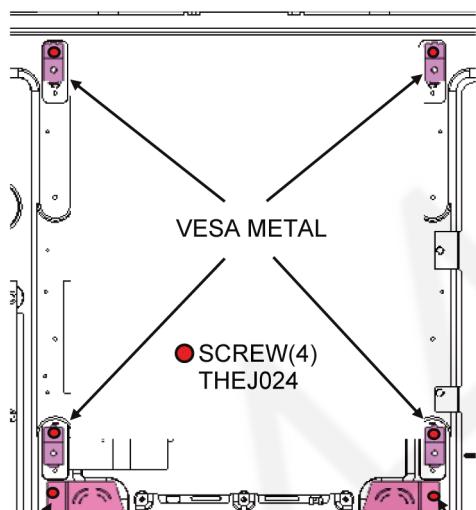

8.2.16. Positioning Pins

1. Remove the 2 Positioning Pins.

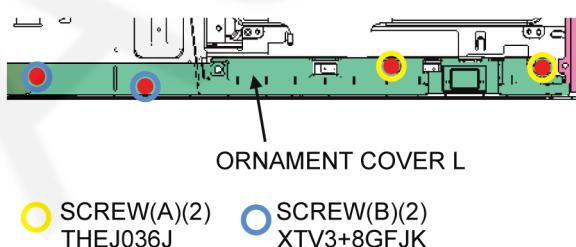

8.2.17. VESA Metals

1. Remove the 4 screws.
2. Remove the 4 VESA Metals.

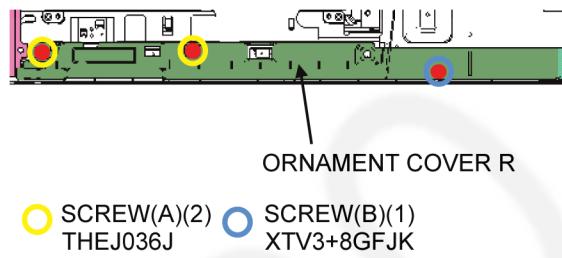

8.2.18. Ornament Cover L

1. Remove the 2 screws (A).
2. Remove the 2 screws (B).
3. Remove the Ornament Cover L.

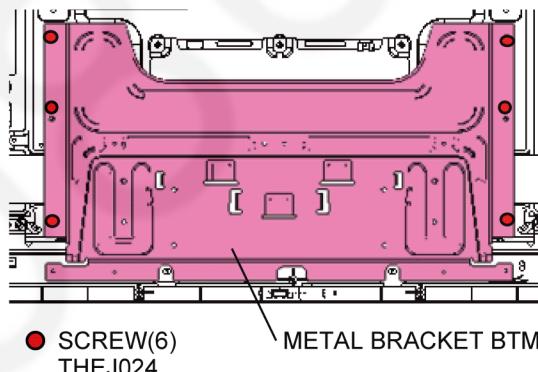

8.2.19. Ornament Cover R

1. Remove the 2 screws (A).
2. Remove the 1 screw (B).
3. Remove the Ornament Cover R.

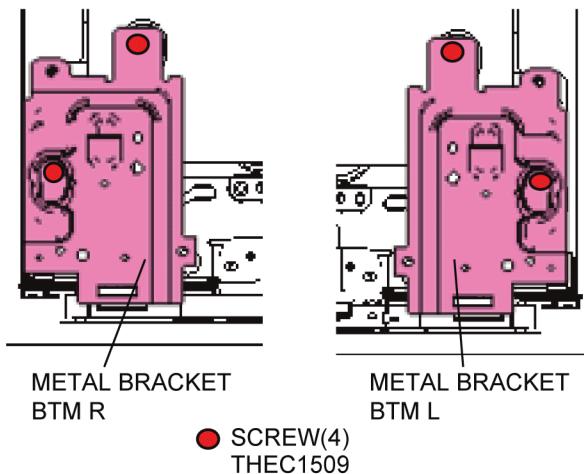

8.2.20. Metal Bracket BTM

1. Remove the 6 screws.
2. Remove the Metal Bracket BTM.

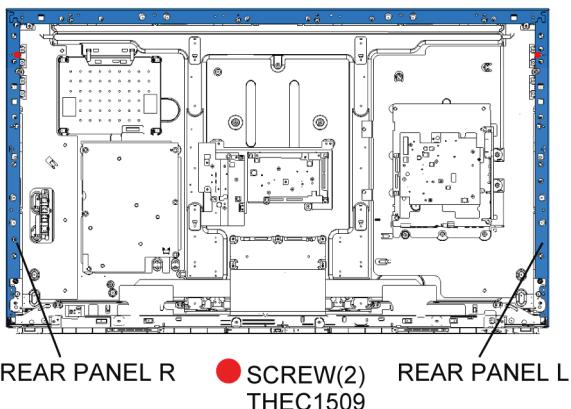

8.2.21. Metal Bracket BTM L/R

1. Remove the 4 screws.
2. Remove the Metal Bracket BTM L/R.

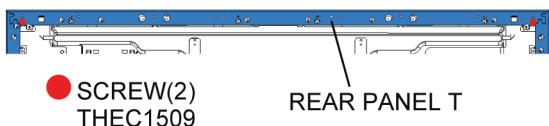

8.2.22. Rear Panel L/R

1. Remove the 2 screws.
2. Remove the Rear Panel L/R.

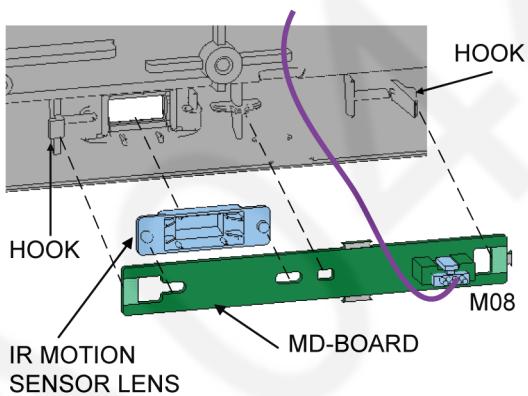

8.2.23. Rear Panel T

1. Remove the 2 screws.
2. Remove the Rear Panel T.

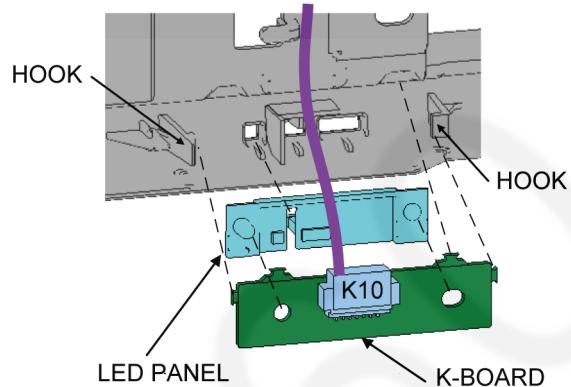

8.2.24. MD-Board

1. Disconnect the connector (M08).
2. Remove the 2 hooks.
3. Remove the MD-Board.

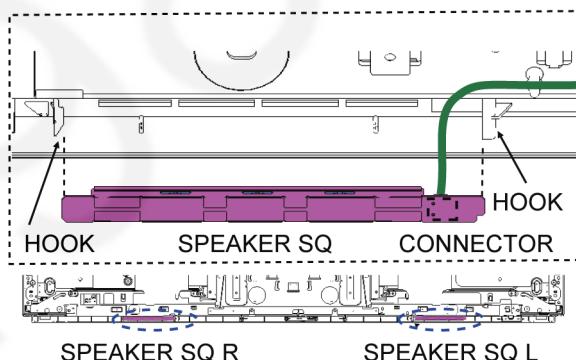

8.2.25. K-Board

1. Remove the 2 hooks.
2. Disconnect the connector (K10).
3. Remove the K-Board.

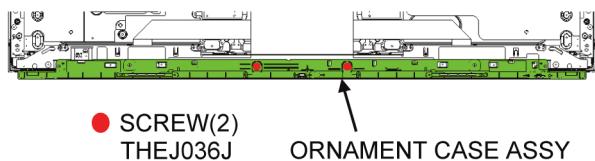

8.2.26. Speaker SQ L/R

1. Remove the 4 hooks.
2. Disconnect the 2 connectors.
3. Remove the Speaker SQ L/R.

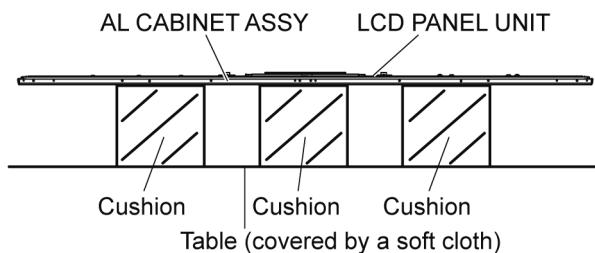

8.2.27. Ornament Case Assy

1. Remove the 2 screws.
2. Remove the Ornament Case Assy.

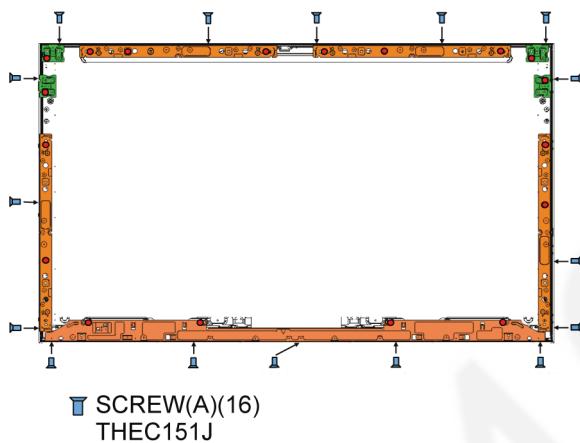

8.2.28. Metal Frames, Support Metal Frames, Metal Rear Panel BTM and AL Cabinet Assy

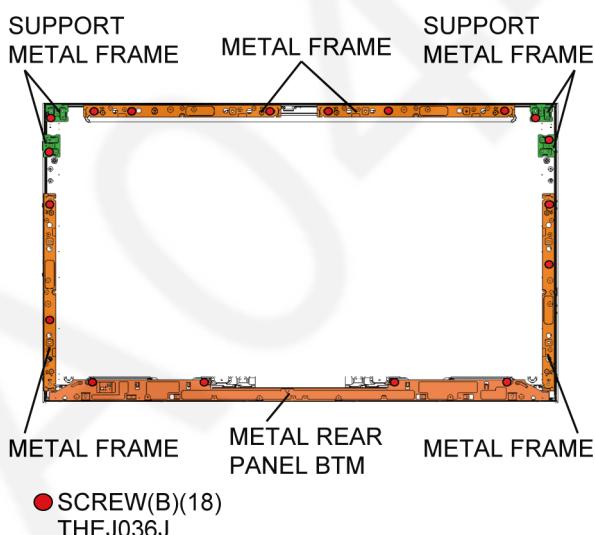

1. Place the Cabinet assy on a flat surface of a table (covered by a soft cloth) and a cushion.

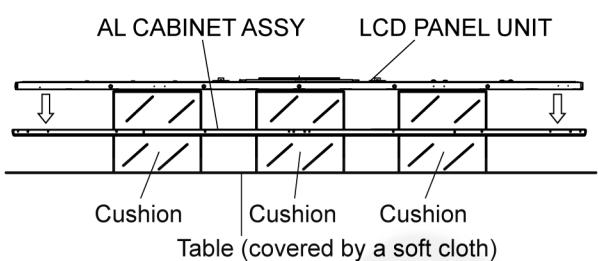

2. Remove the 16 screws (A).

3. Remove the 18 screws (B).
4. Remove the 4 Metal Frames, the 4 Support Metal Frames and the Metal Rear Panel BTM.

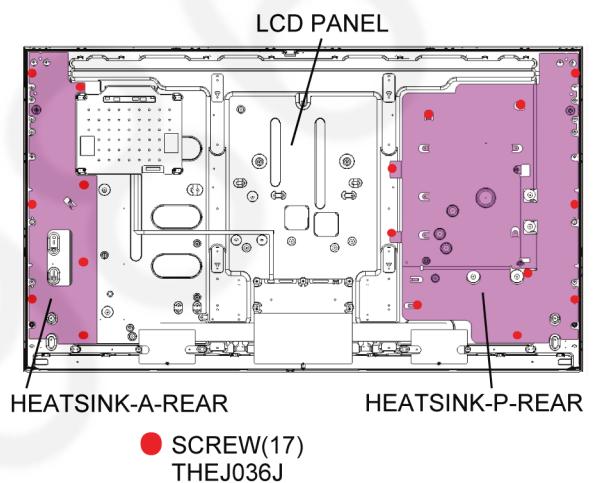

5. Remove the AL Cabinet Assy.

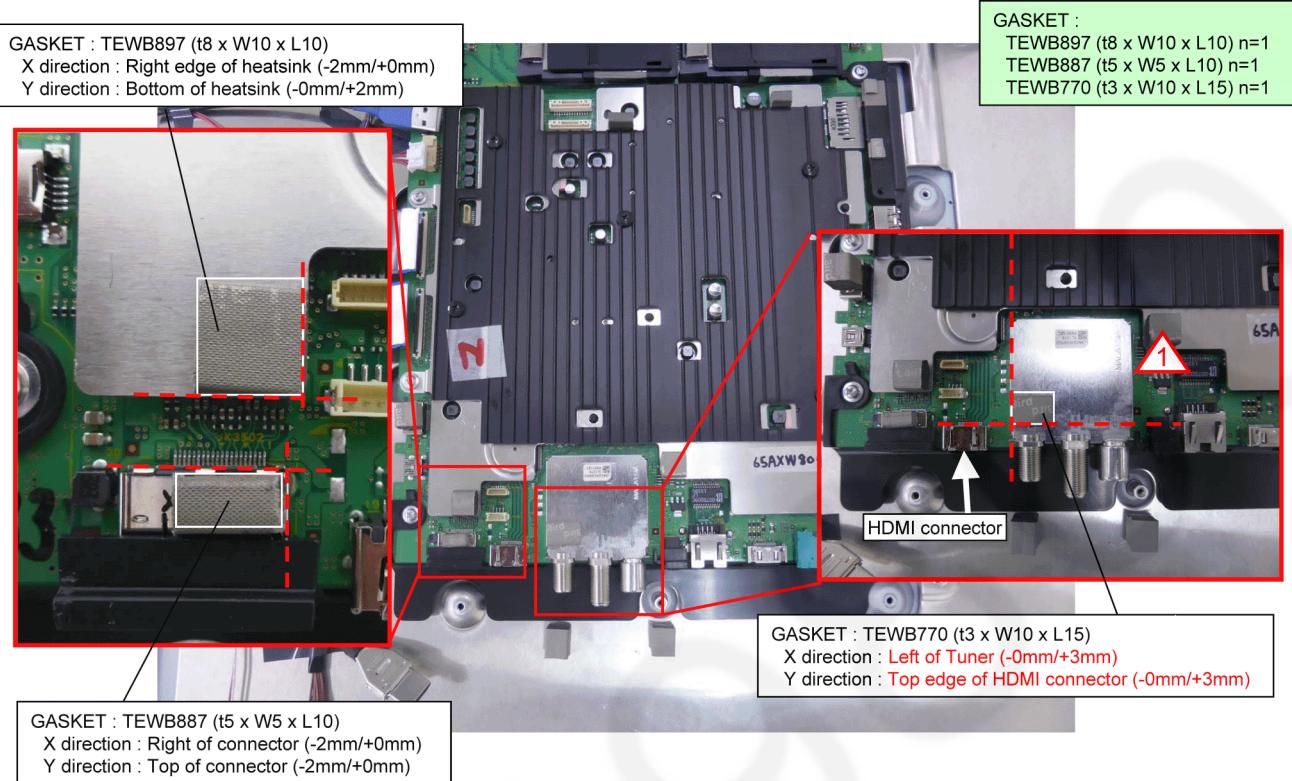

8.2.29. LCD Panel, Heatsink-A-Rear and Heatsink-P-Rear

1. Remove the 17 screws.
2. Remove the LCD Panel, the Heatsink-A-Rear and the Heatsink-P-Rear.

8.3. Specification of EMI countermeasures

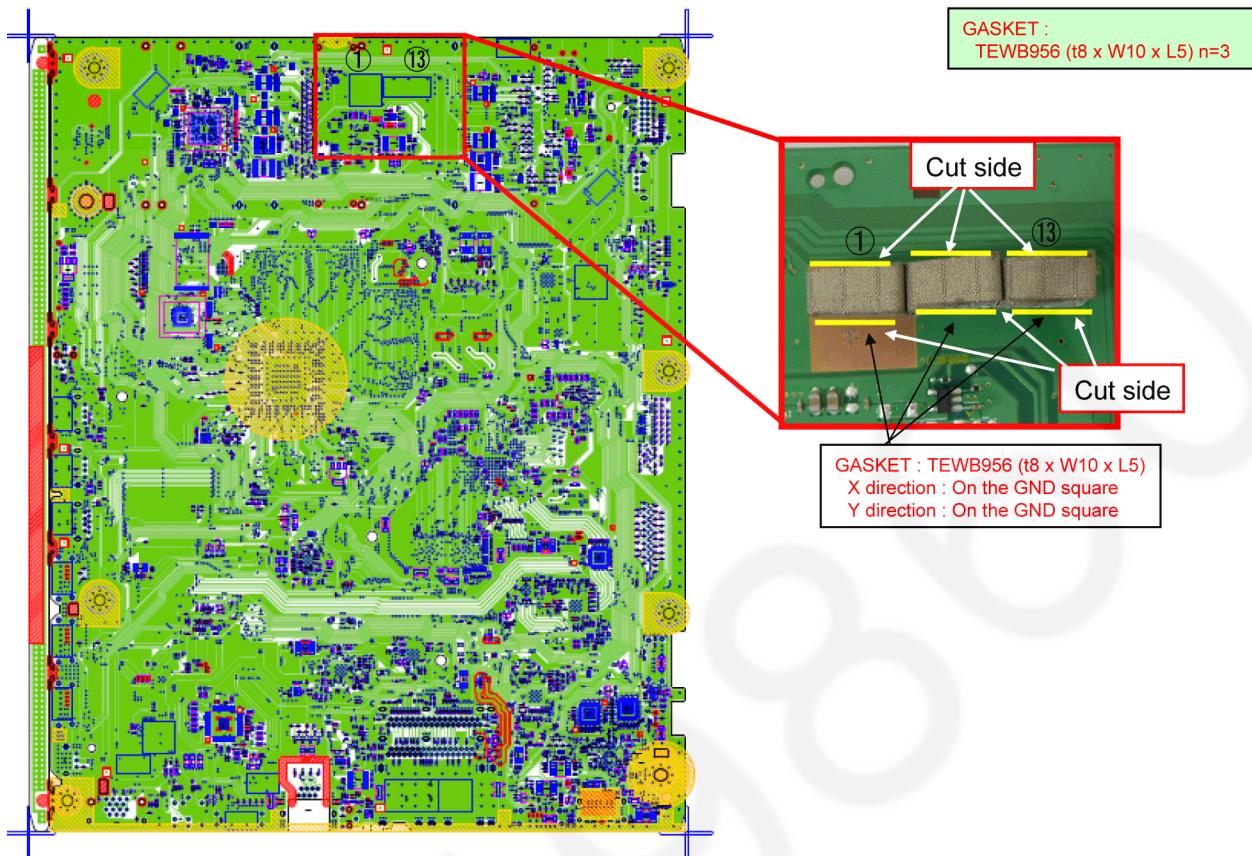

8.3.1. Specification of sticking the gasket (Front side of A-board 1)

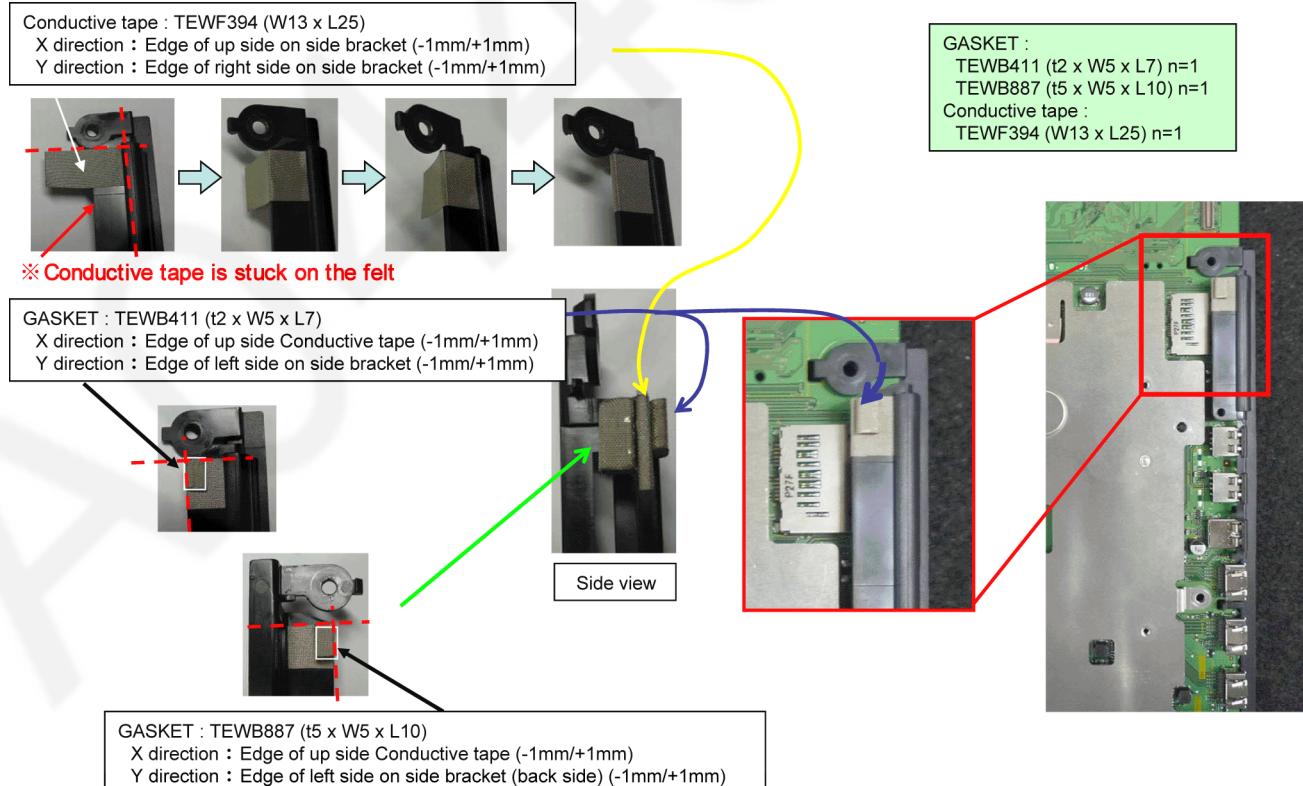

8.3.2. Specification of sticking the gasket (Back side of A-board 1)

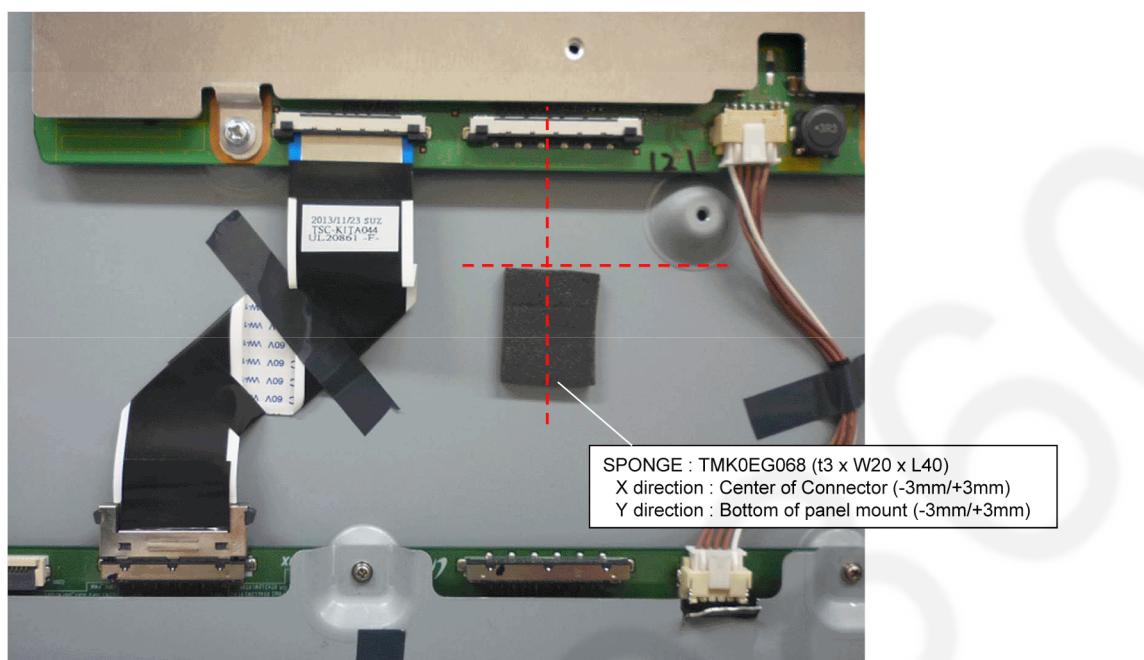

8.3.3. Specification of sticking the gasket (Back side of A-board 2)

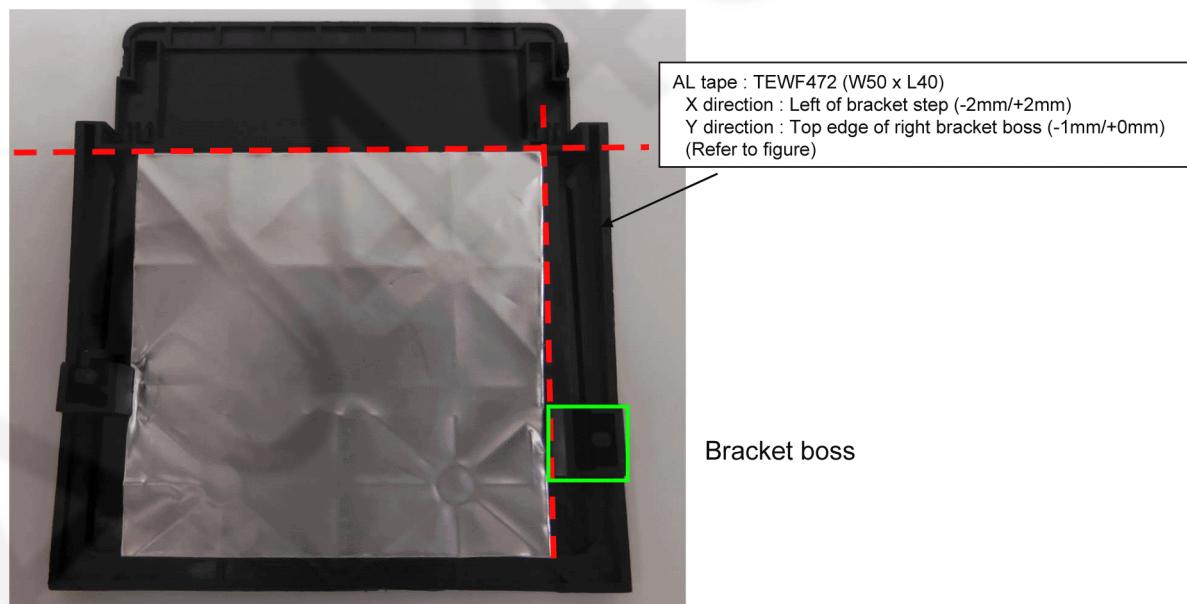

8.3.4. Specification of sticking the gasket and the tape

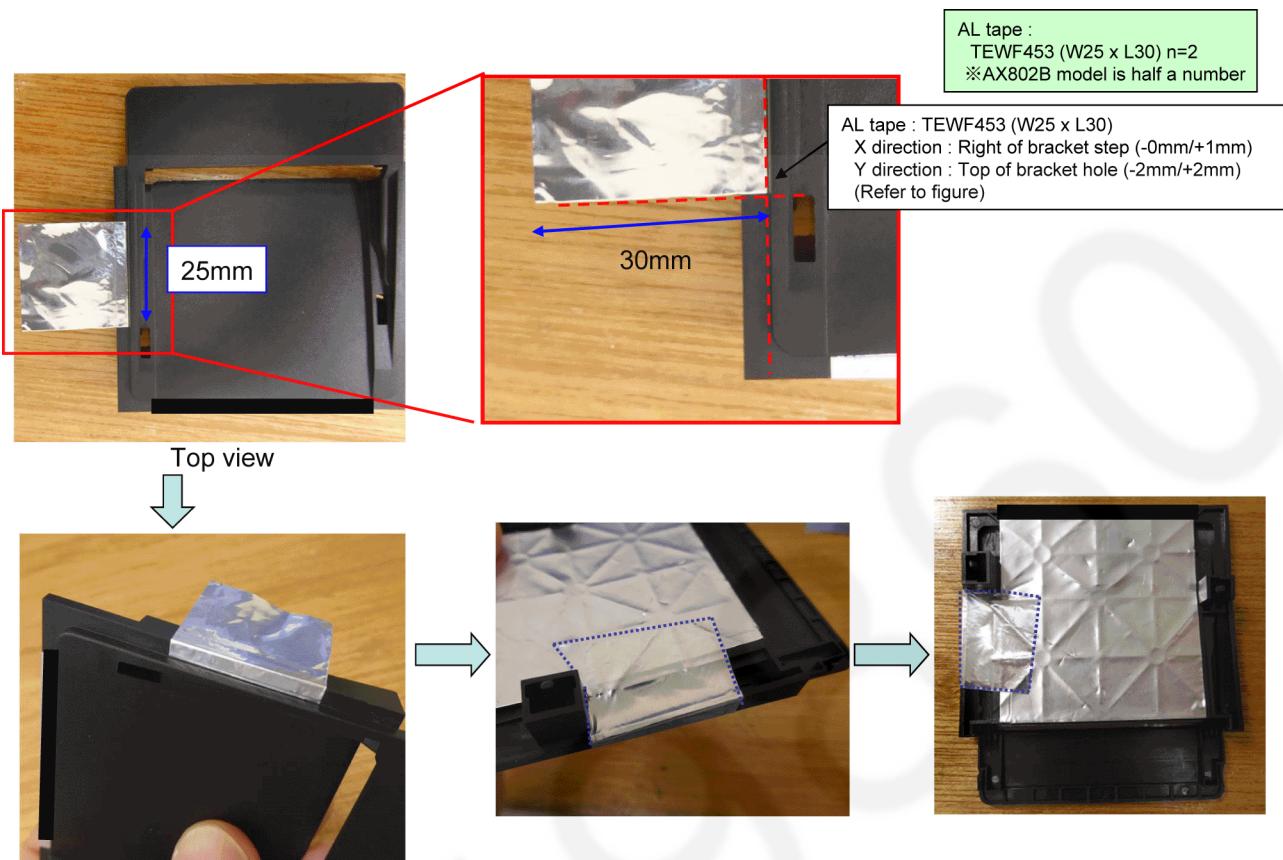

8.3.5. Specification of sticking the sponge

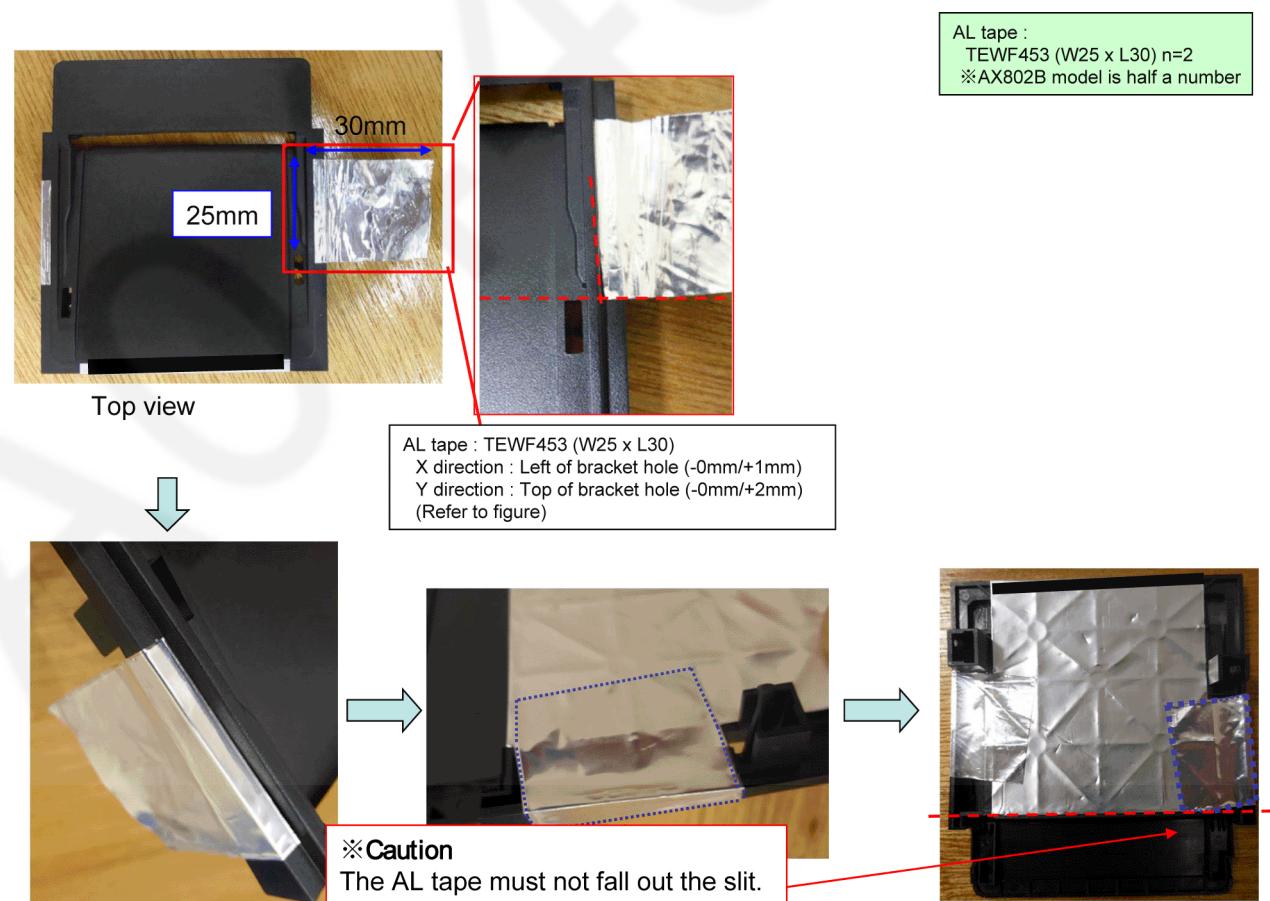

8.3.6. Specification of sticking the AL tape (CI SLOT)

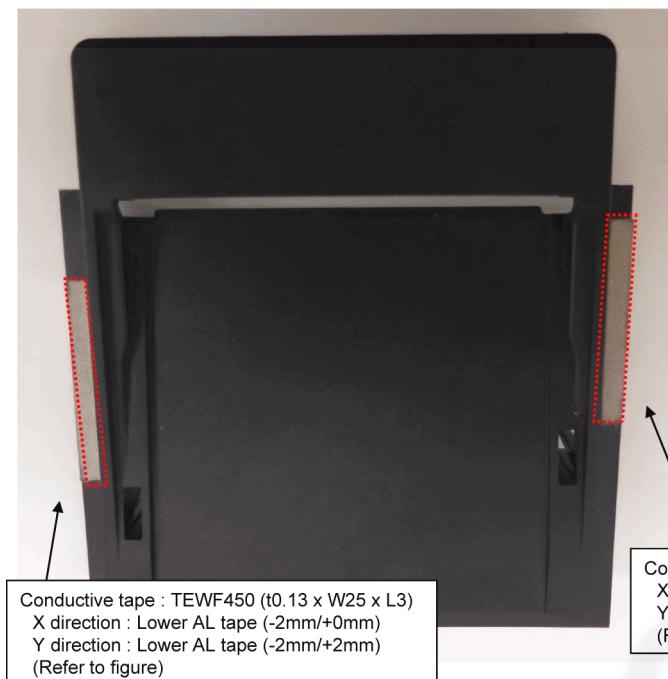

8.3.7. Specification of sticking the AL tape (CI SLOT)

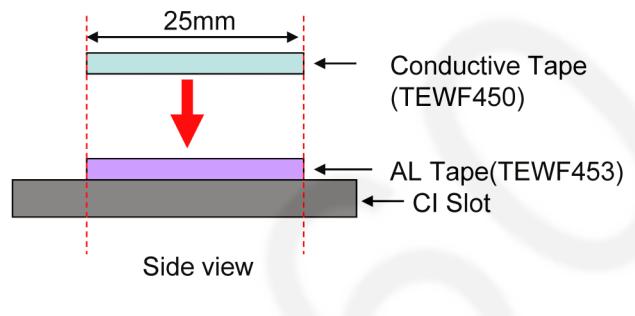

8.3.8. Specification of sticking the AL tape (CI SLOT)

8.3.9. Specification of sticking the Conductive tape (CI SLOT)

Conductive tape :
TEWF450 (W25 x L3) n=4
※AX802B model is half a number

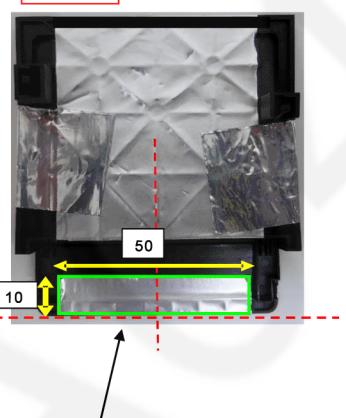

Conductive tape : TEWF450 (t0.13 x W25 x L3)
X direction : Lower AL tape (-0mm/+2mm)
Y direction : Lower AL tape (-2mm/+2mm)
(Refer to figure)

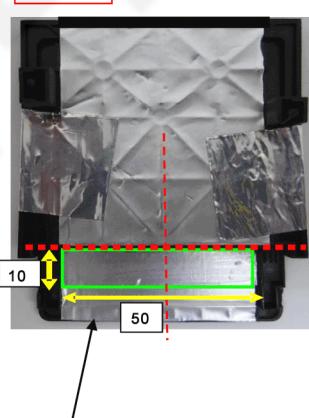

8.3.10. Specification of sticking the AL tape (CI SLOT)

AL tape :
TEWF153 (W10 x L50) n=4
※AX802B model is half a number

Step1

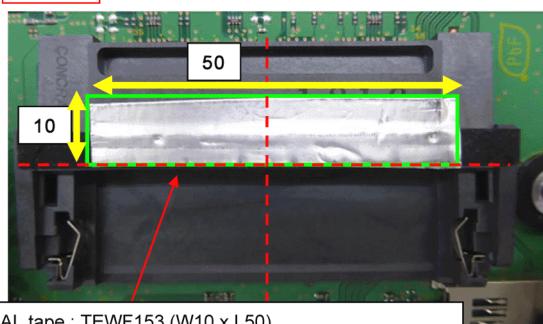

Step2

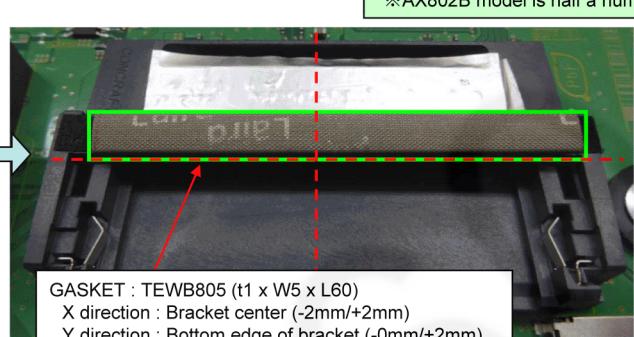

8.3.11. Specification of sticking the AL tape & Gasket (CI SLOT)

Step1

AL tape : TEWF153 (W10 x L50)
X direction : Bracket center (-2mm/+2mm)
Y direction : Bottom edge of bracket (-0mm/+2mm)
(Refer to figure)

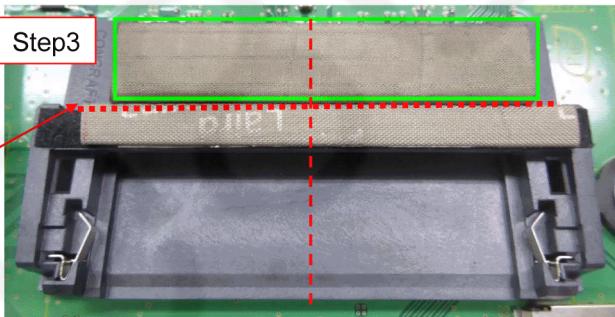

Step2

GASKET : TEWB805 (t1 x W5 x L60)
X direction : Bracket center (-2mm/+2mm)
Y direction : Bottom edge of bracket (-0mm/+2mm)
(Refer to figure)

AL tape :
TEWF153 (W50 x L10) n=2
GASKET :
TEWB805 (t1 x W5 x L60) n=2
TEWB716 (t3 x W10 x L50) n=2
※AX802B model is half a number

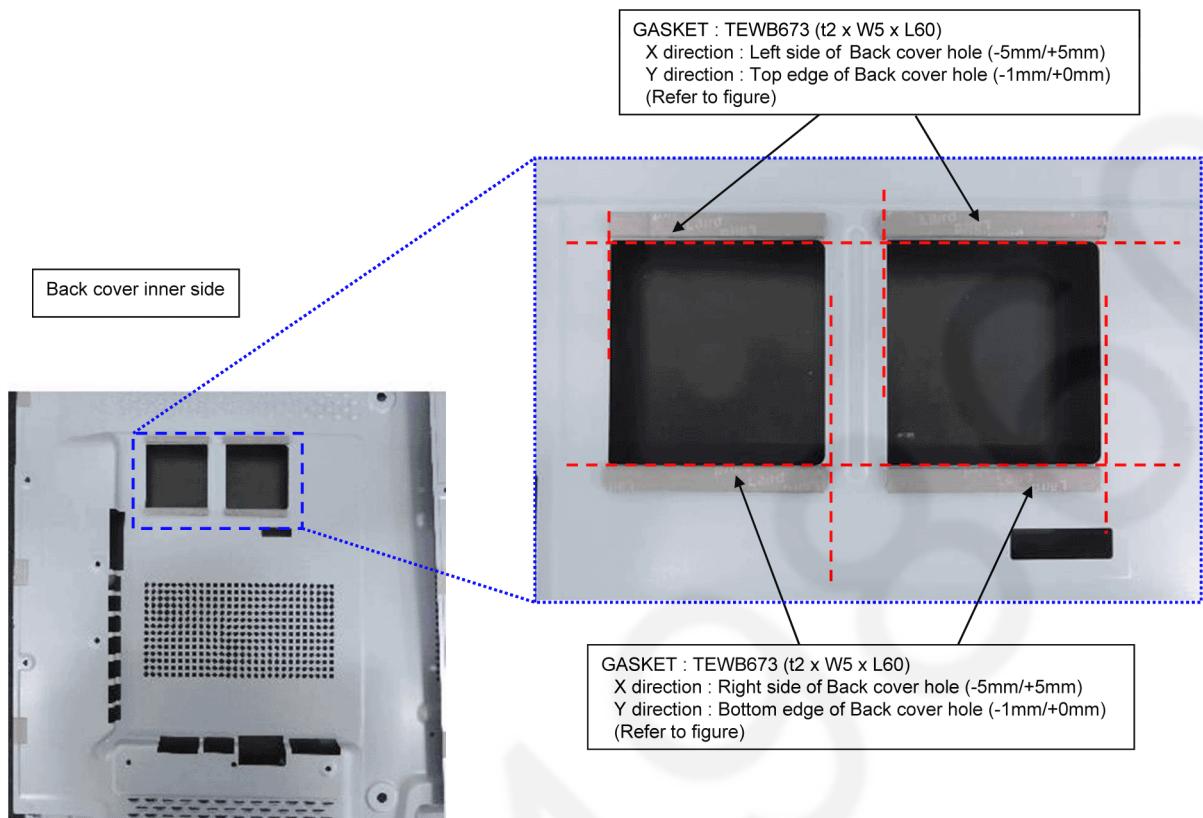

Step3

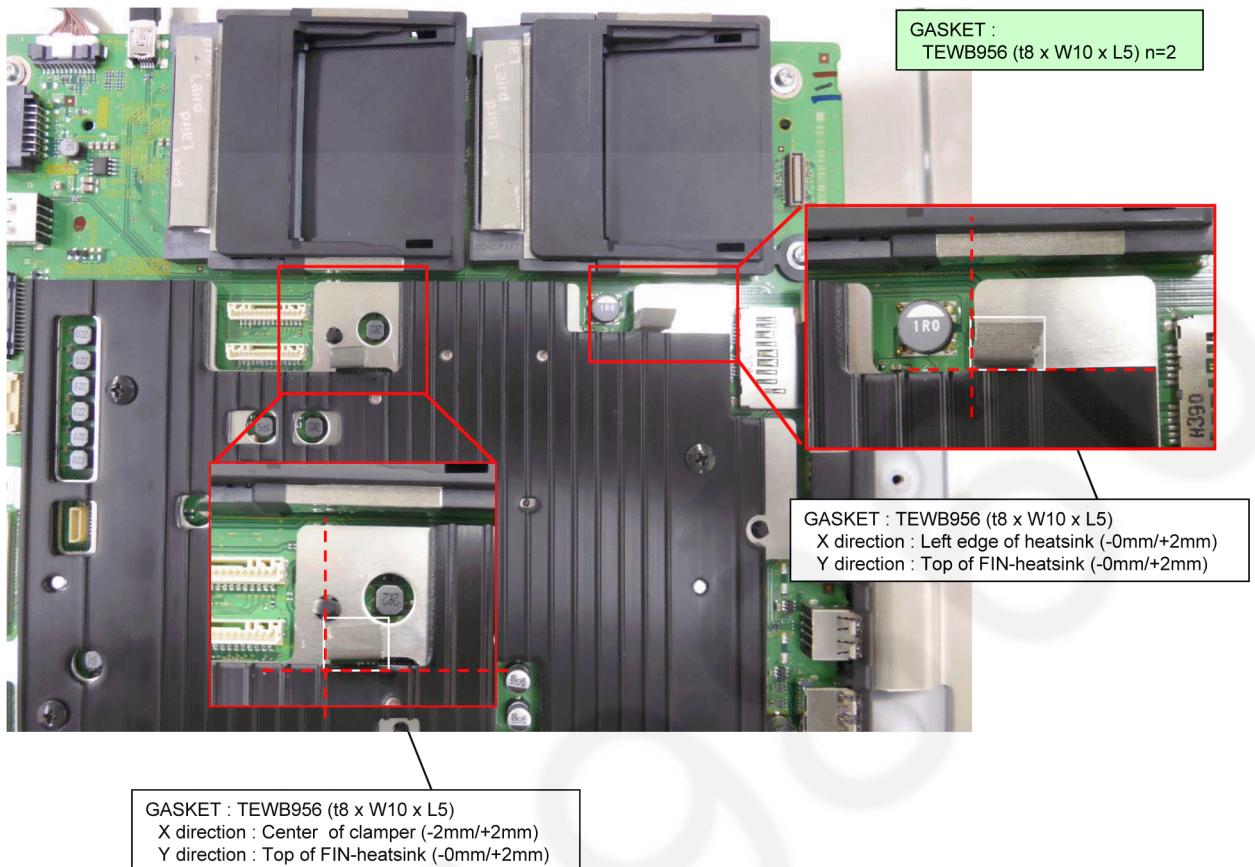

GASKET : TEWB716 (t3 x W10 x L50)
X direction : Bracket center (-2mm/+2mm)
Y direction : Top edge of TEWB805 (-0mm/+2mm)
(Refer to figure)

8.3.12. Specification of sticking Gasket (CI SLOT/Back cover side)

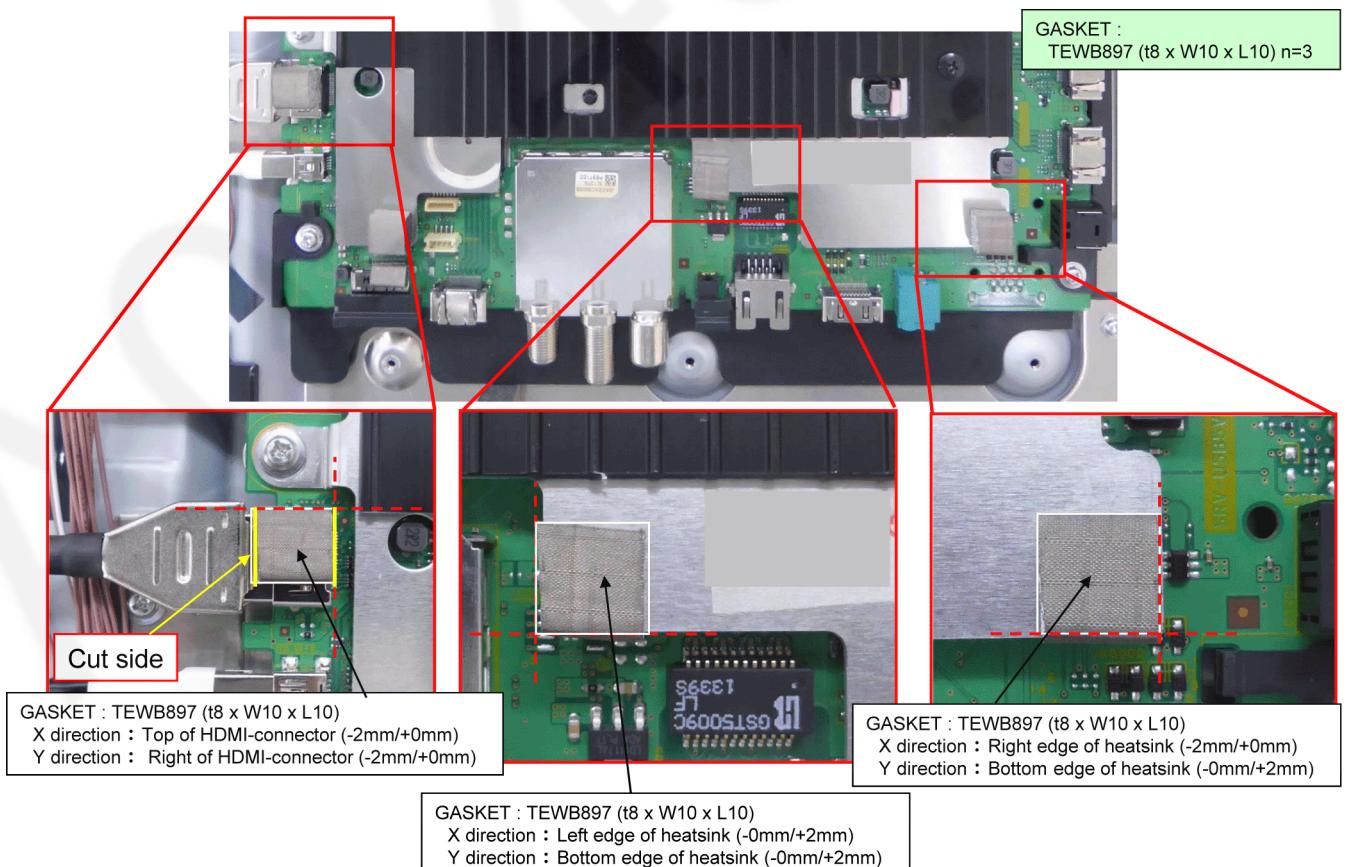

GASKET :
TEWB673 (t2 x W5 x L60) n=4
※AX802B model is half a number

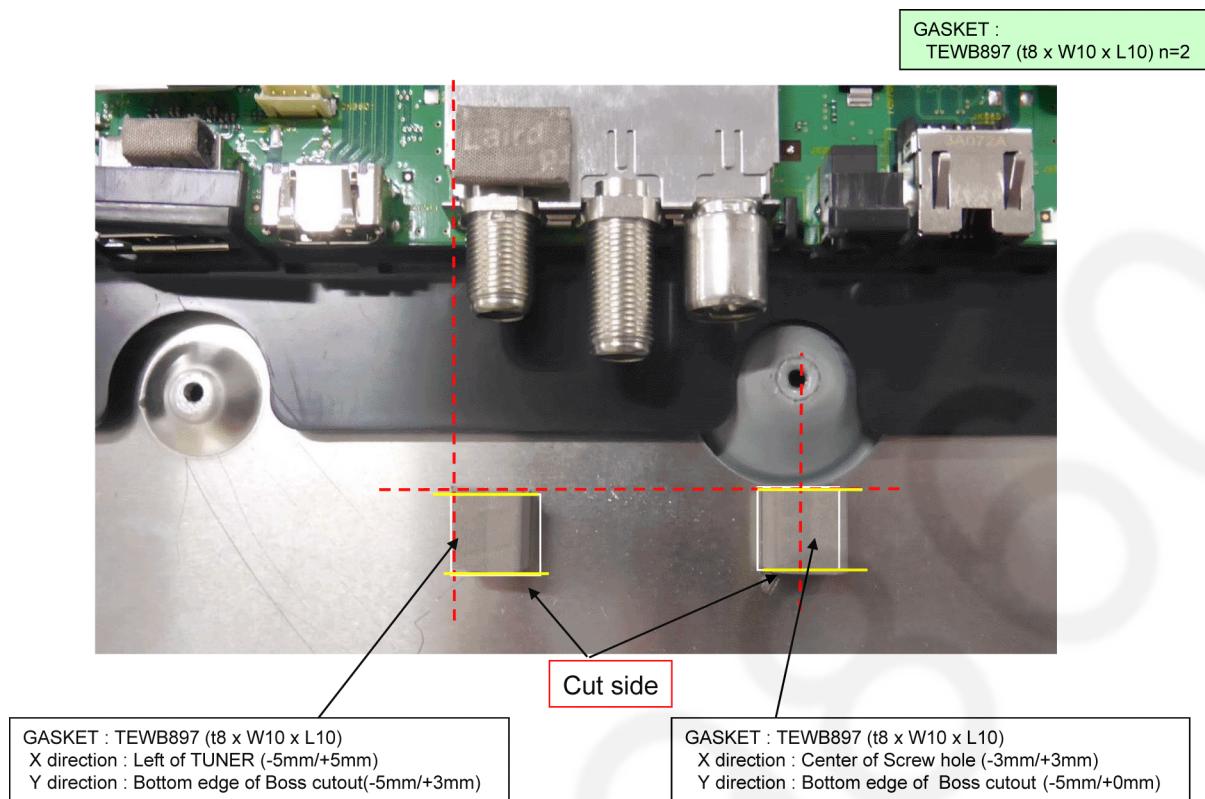

8.3.13. Specification of sticking the gasket (Front side of A-board 3)

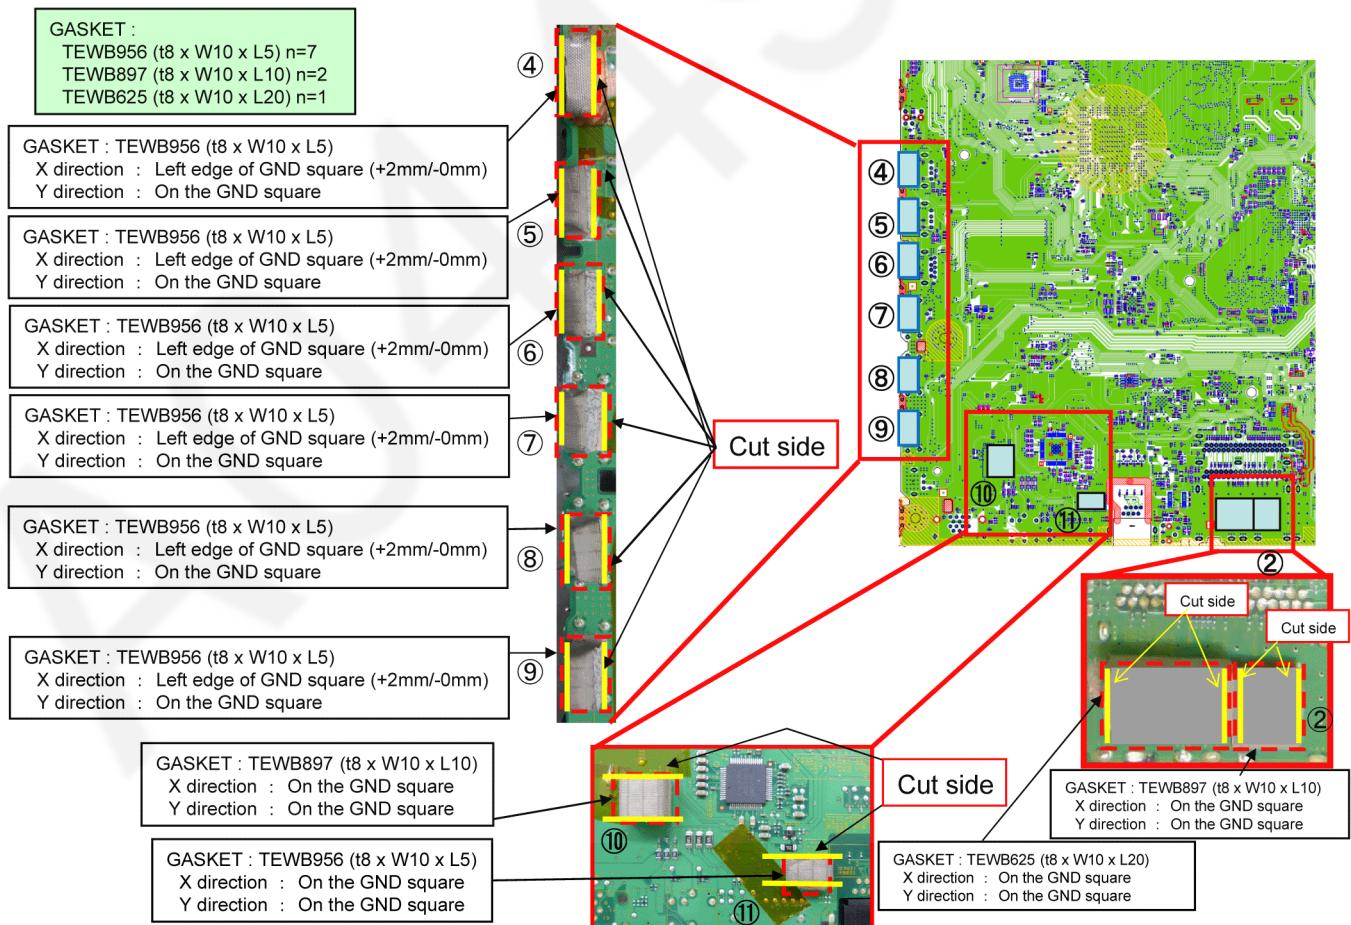

8.3.14. Specification of sticking the gasket (Front side of A-board 4)

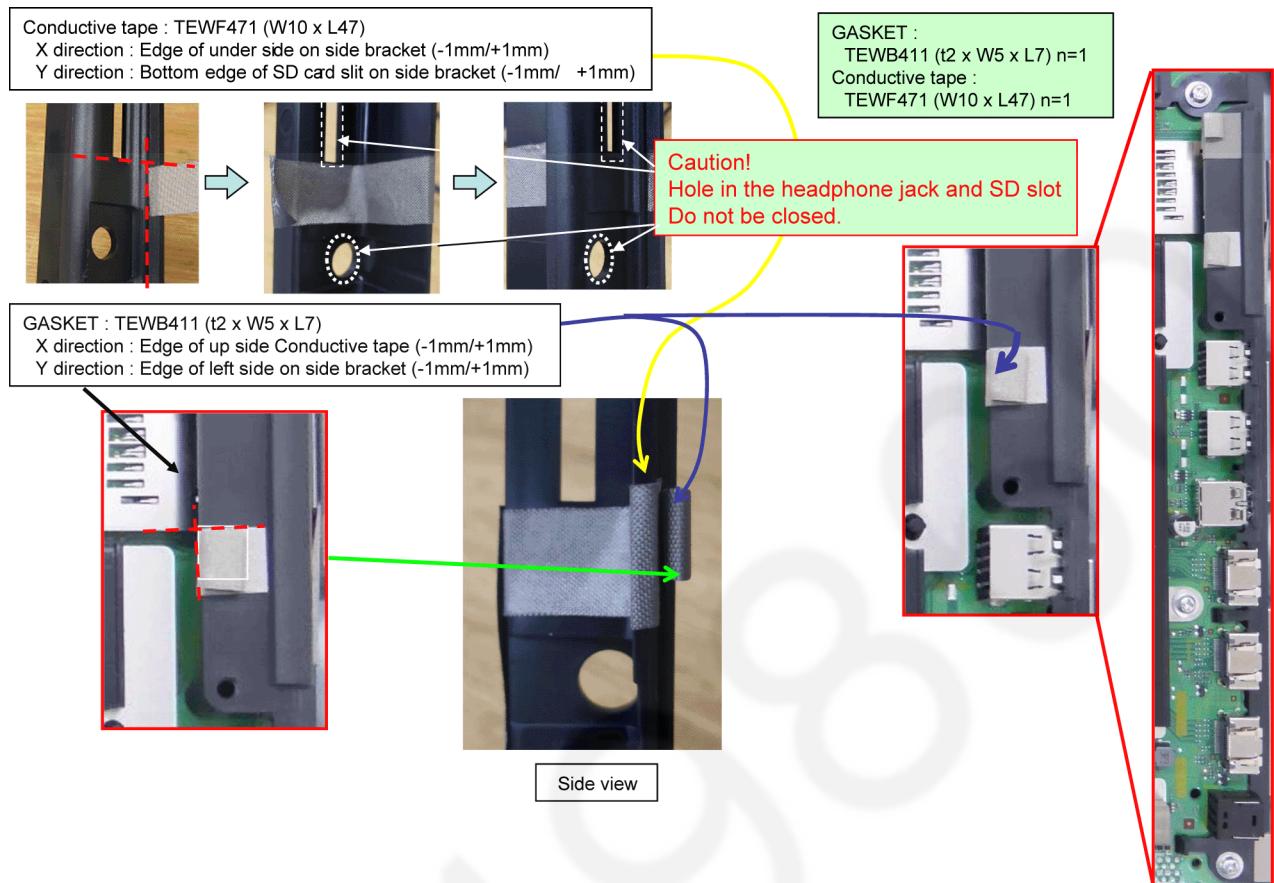

8.3.15. Specification of sticking the gasket (near A-board)

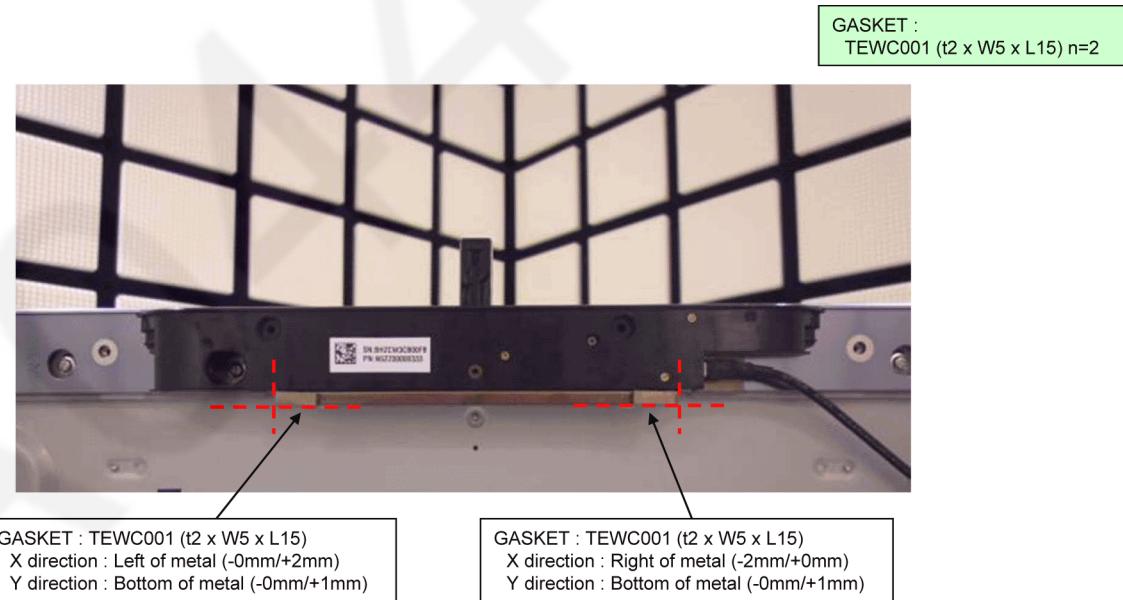

8.3.16. Specification of sticking the gasket (Back side of A-board 3)

8.3.17. Specification of sticking the gasket and the tape

8.3.18. Specification of sticking the gasket

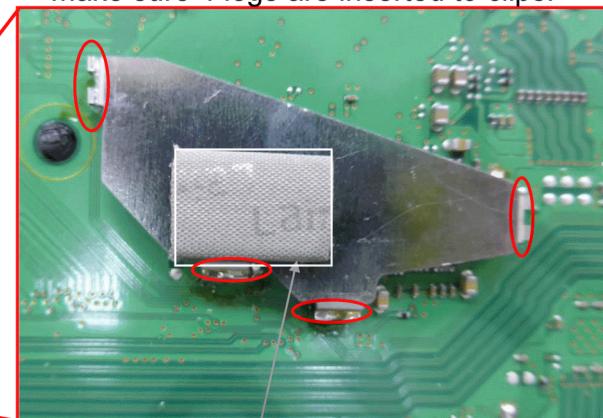

8.3.19. Specification of fixing the shield-case

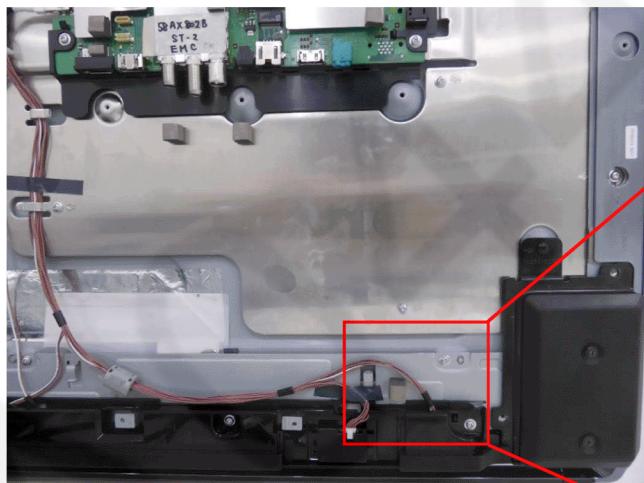

Shield-case :
TUC5ZC50301 n=1
GASKET :
TEWB770 (t3 x W10 x L15) n=1

There are 4 shield-clips.
Make sure 4 legs are inserted to clips.

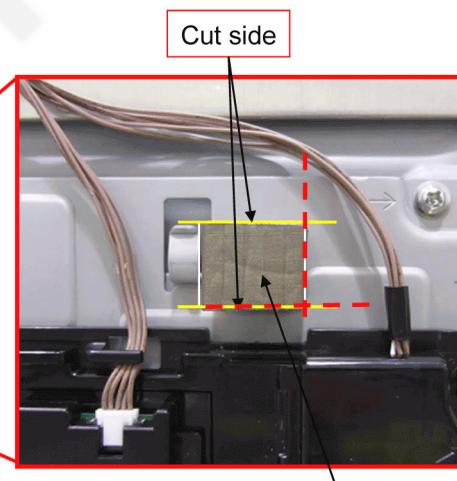

GASKET : TEWB770 (t3 x W10 x L15)
That you have placed on the shield case
(Refer to figure)

8.3.20. Specification of sticking the gasket (near Bluetooth)

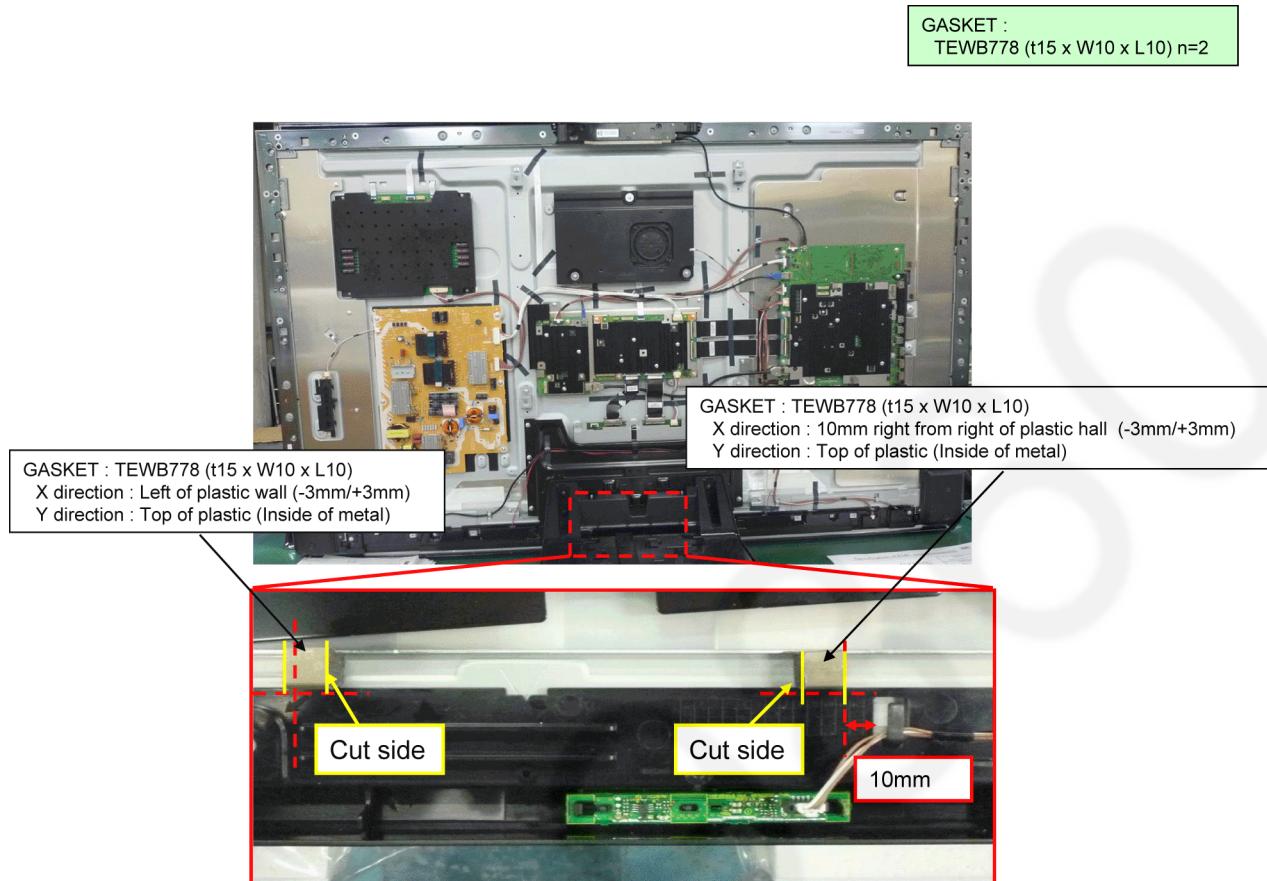

GASKET :
TEWB644 (t18 x W18 x L15) n=1

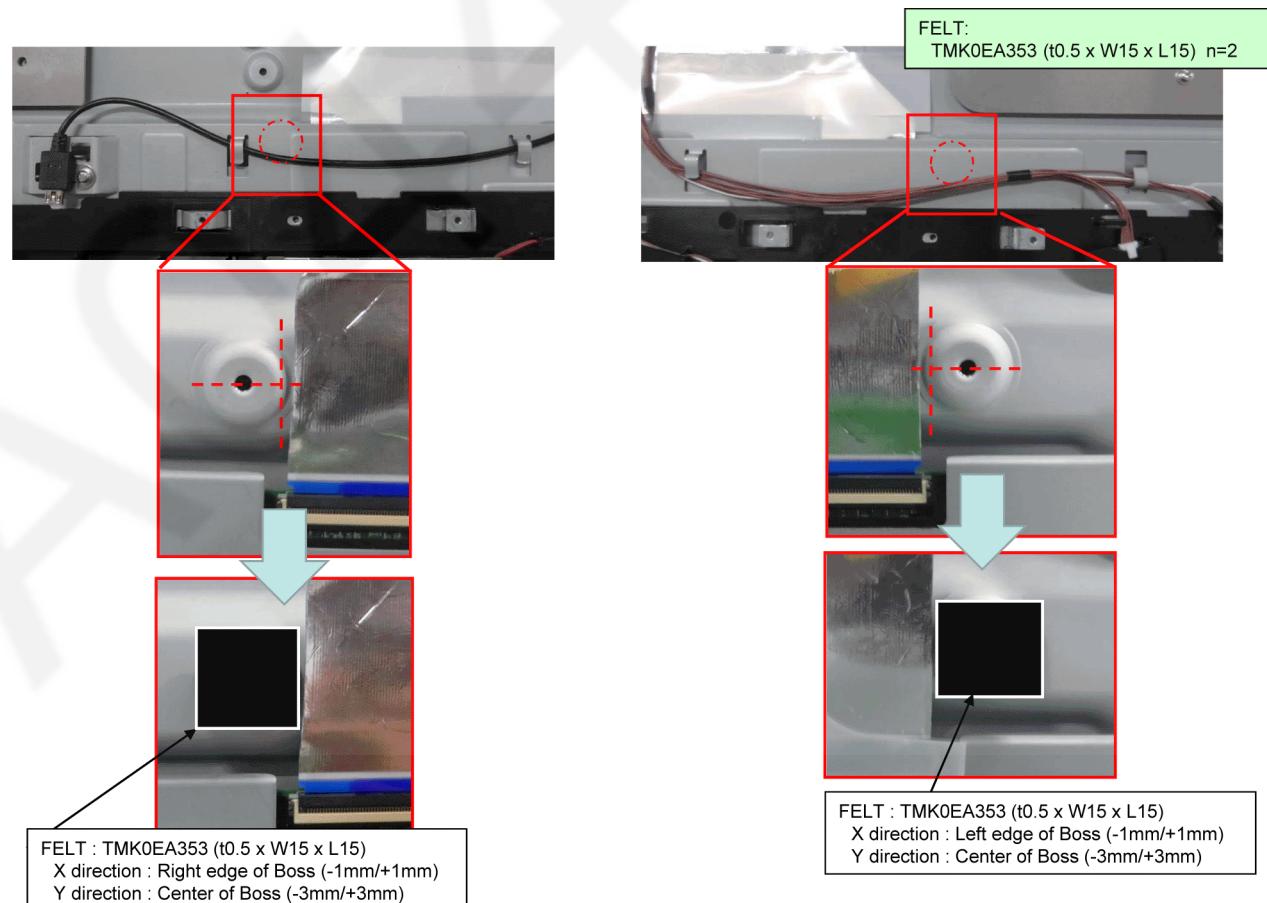

GASKET : TEWB644 (t18 x W18 x L15)
X direction : Step line of metal (-2mm/+0mm)
Y direction : Step line of metal (-0mm/+2mm)

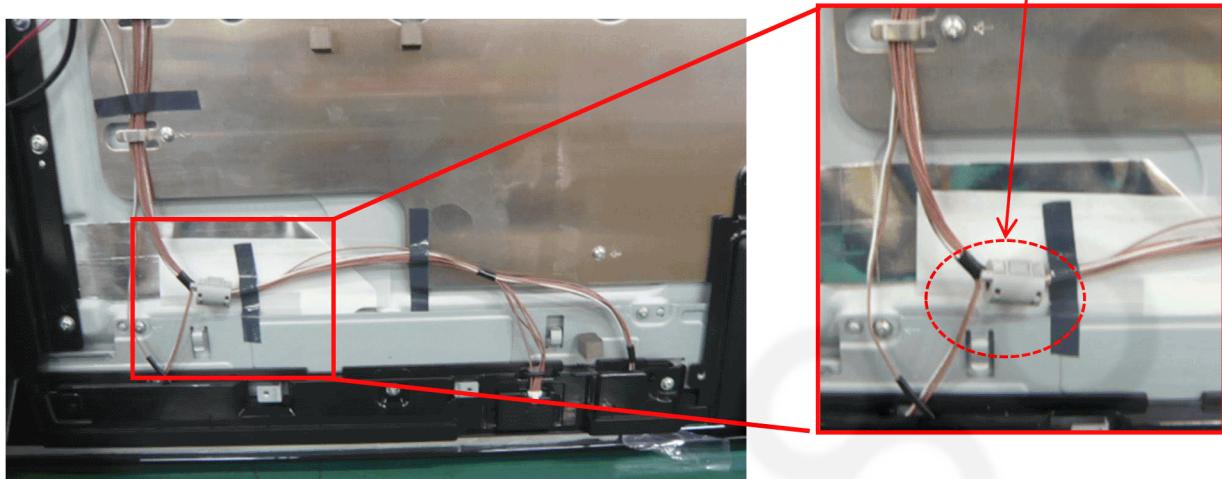

8.3.21. Specification of sticking the gasket

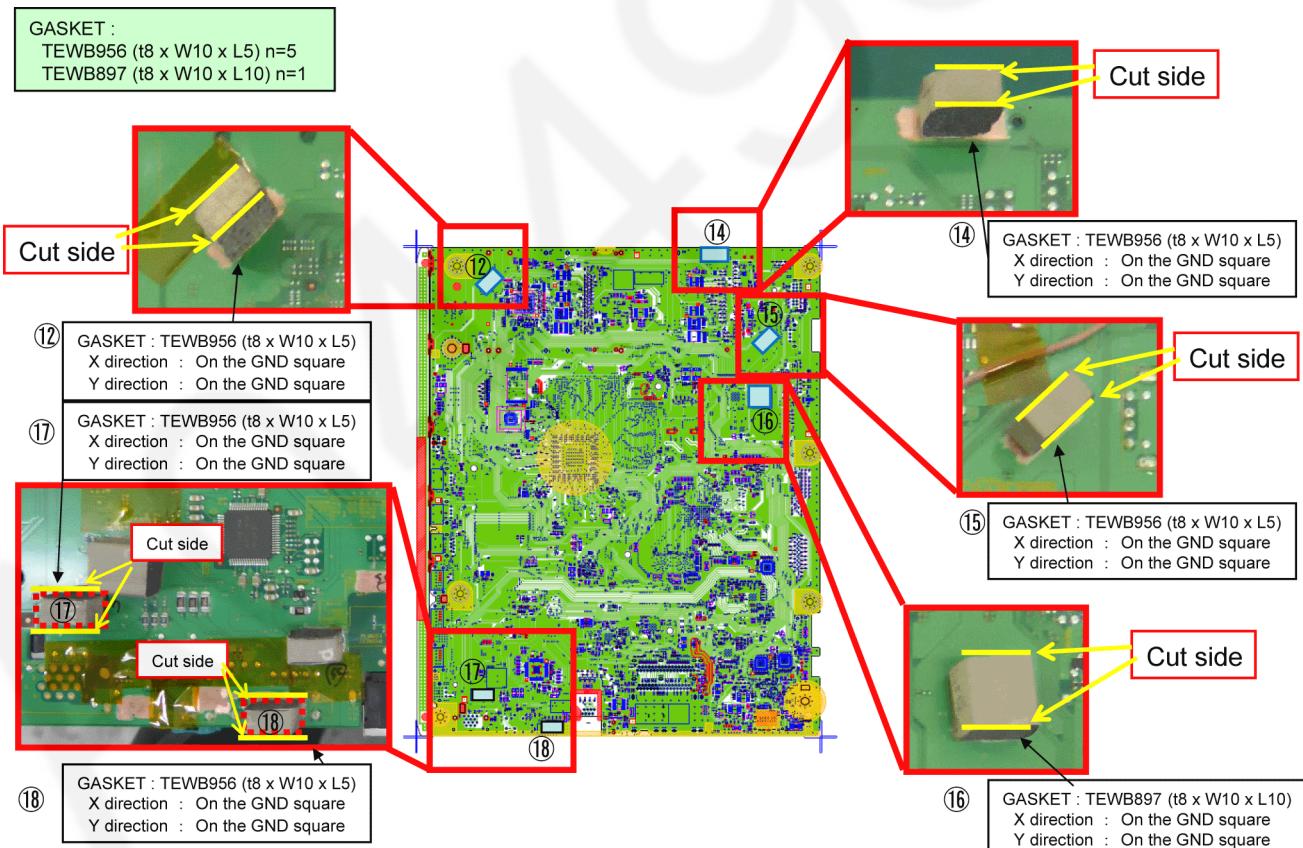

8.3.22. Specification of sticking the FELT (Source-PCB TOP Cover)

8.3.23. Specification of attaching the clamp-core

8.3.24. Specification of sticking the gasket (Back side of A-board 4)

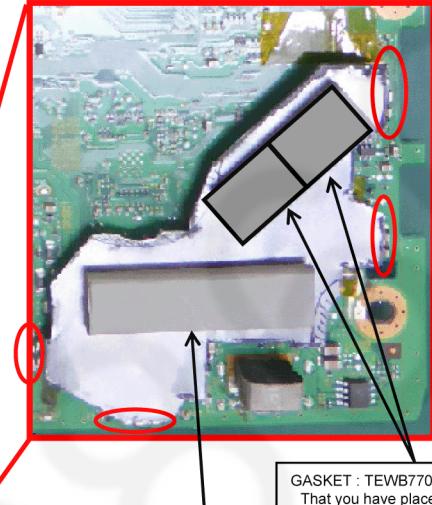

8.3.25. Specification of fixing the shield-case

Shield-case :
TUC5ZC50311 n=1
GASKET :
TEWB770 (t3 x W10 x L15) n=2
TEWB717 (t3 x W10 x L40) n=1

There are 4 shield-clips.
Make sure 4 legs are inserted to clips.

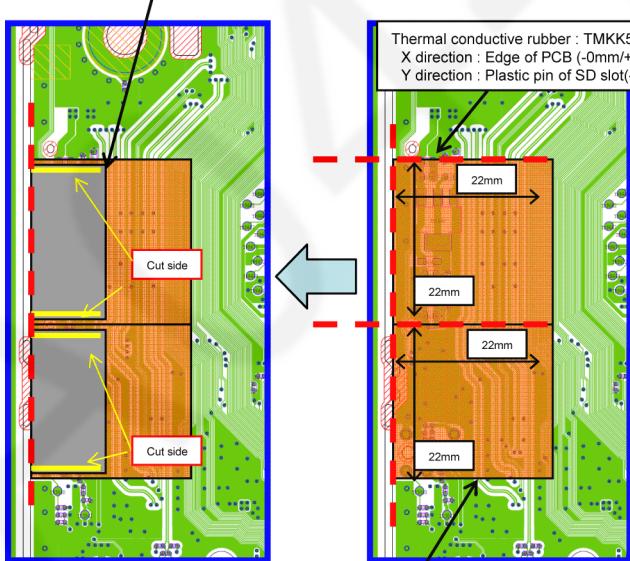

GASKET : TEWB770 (t3 x W10 x L15)
That you have placed on the shield case
(Refer to figure)

GASKET : TEWB717 (t3 x W10 x L40)
That you have placed on the shield case
(Refer to figure)

8.3.26. Specification of sticking the rubber and gasket

GASKET : TEWB720 (t7 x W10 x L20) n=2
X direction : Left Edge of thermal conductive rubber (-0mm/+3mm)
Y direction : On each thermal conductive rubber (Refer to figure)

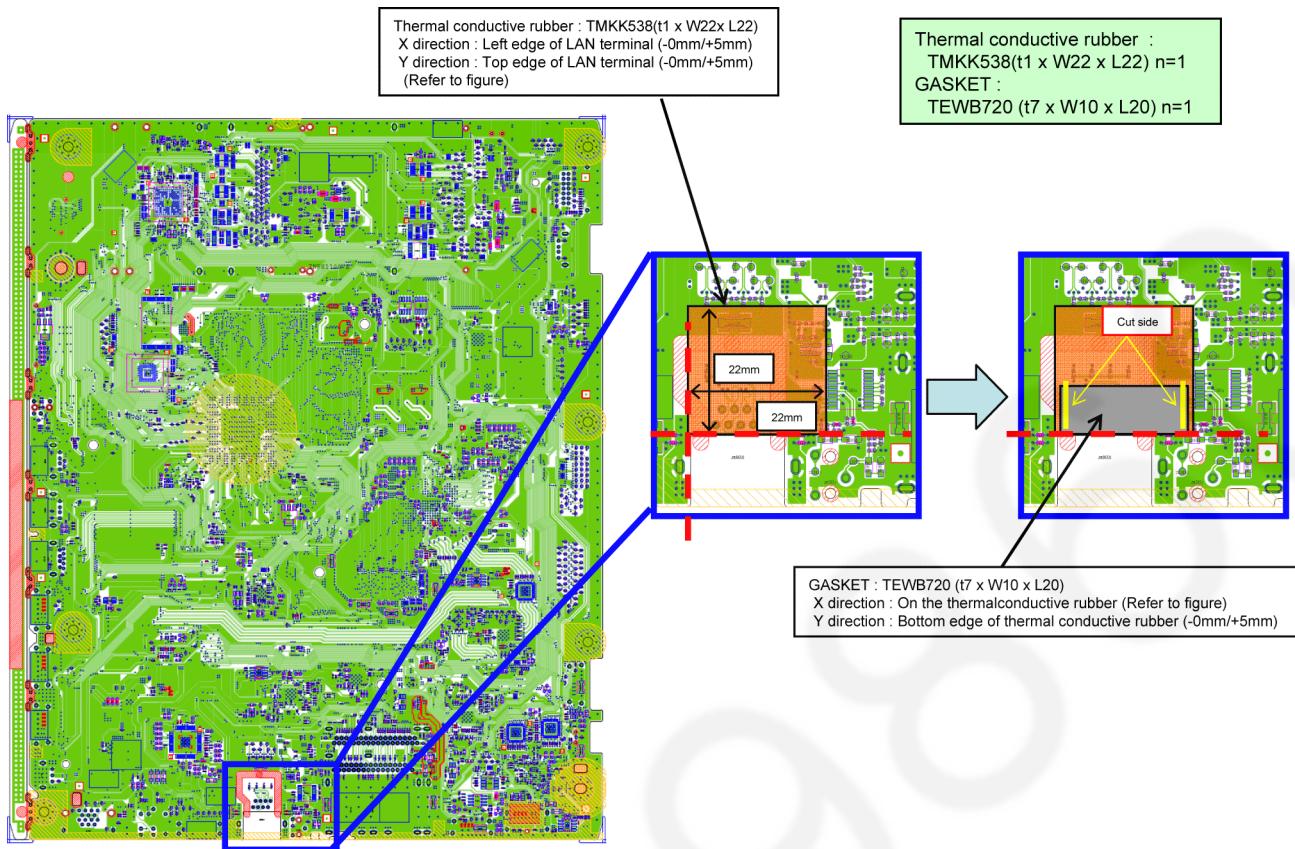

Thermal conductive rubber:
TMKK538 (t1 x W22 x L22) n=2
GASKET :
TEWB720 (t7 x W10 x L20) n=2

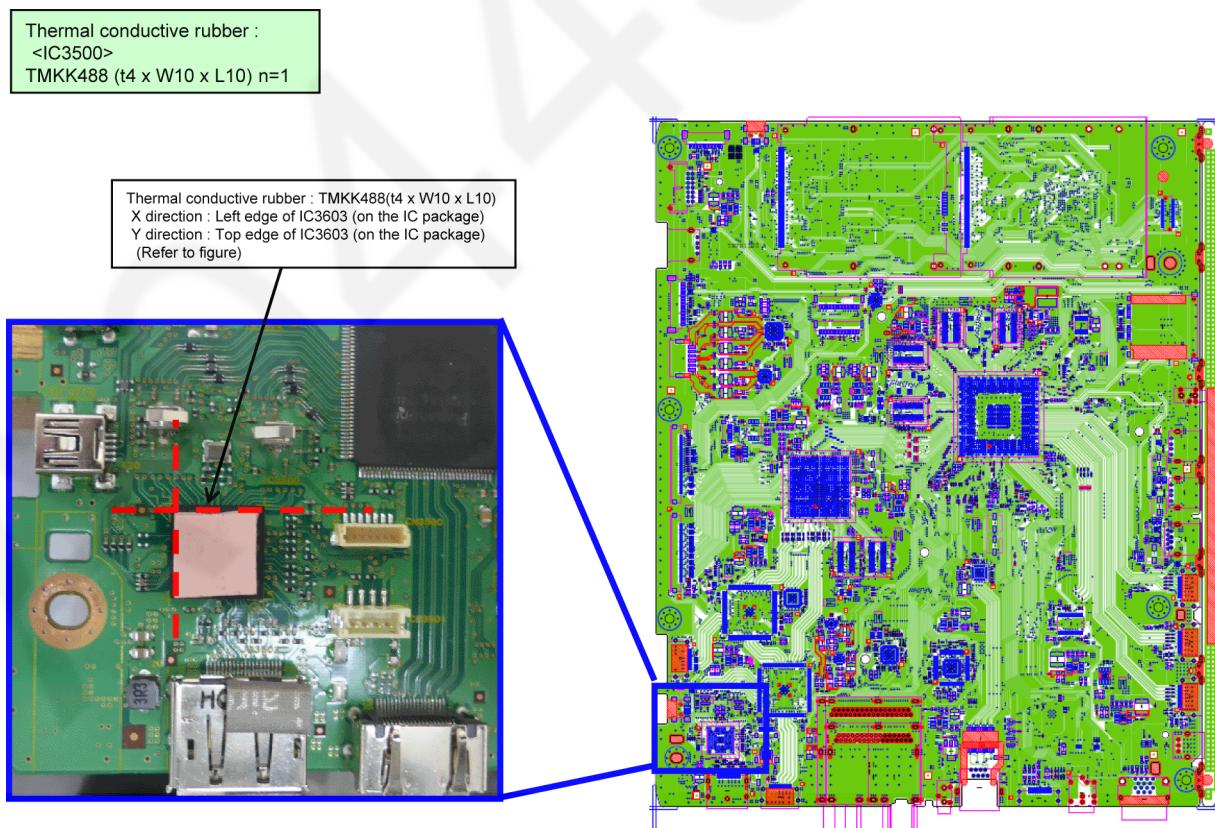

Thermal conductive rubber : TMKK538 (t1 x W22 x L22)
X direction : Edge of PCB (-0mm/+5mm)
Y direction : Edge of thermal conductive rubber(-3mm/+0mm)
(Refer to figure)

8.3.27. Specification of sticking the rubber and gasket

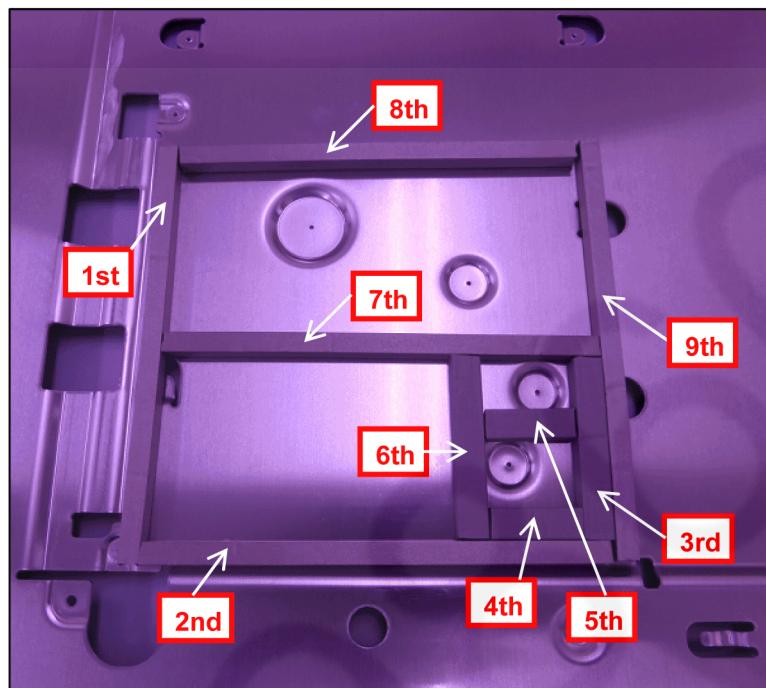

8.3.28. Specification of sticking the rubber

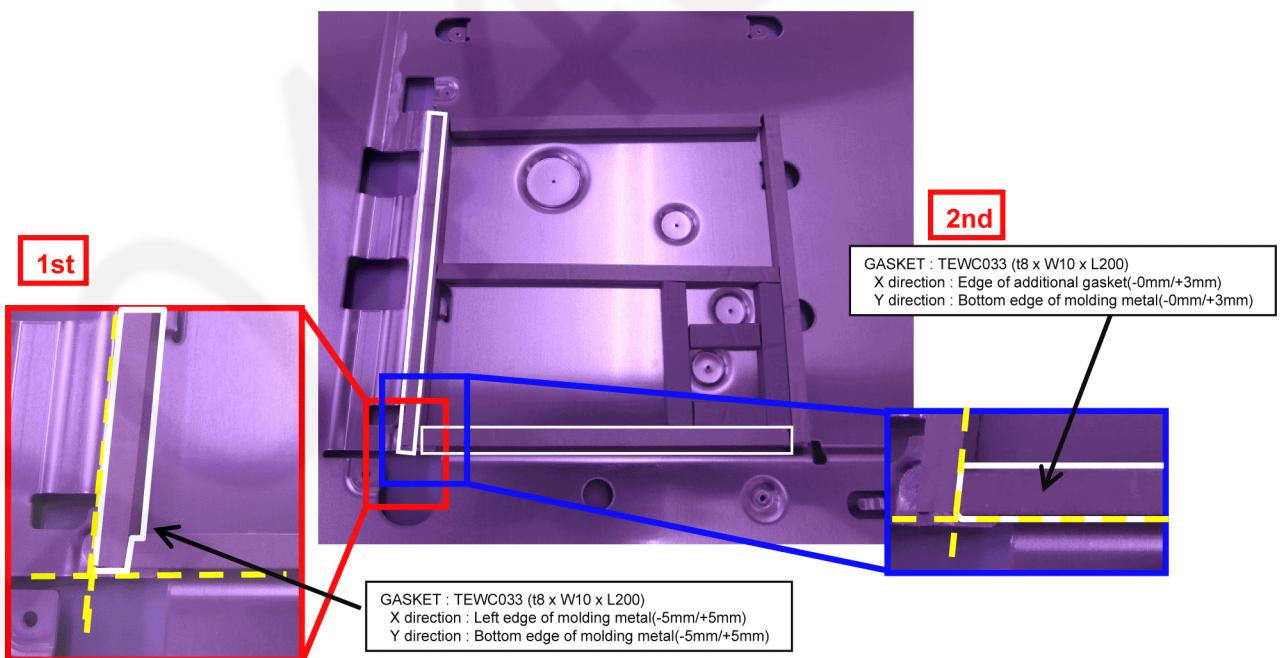

8.3.29. Specification of sticking the gasket

Turn to sticking the gaskets

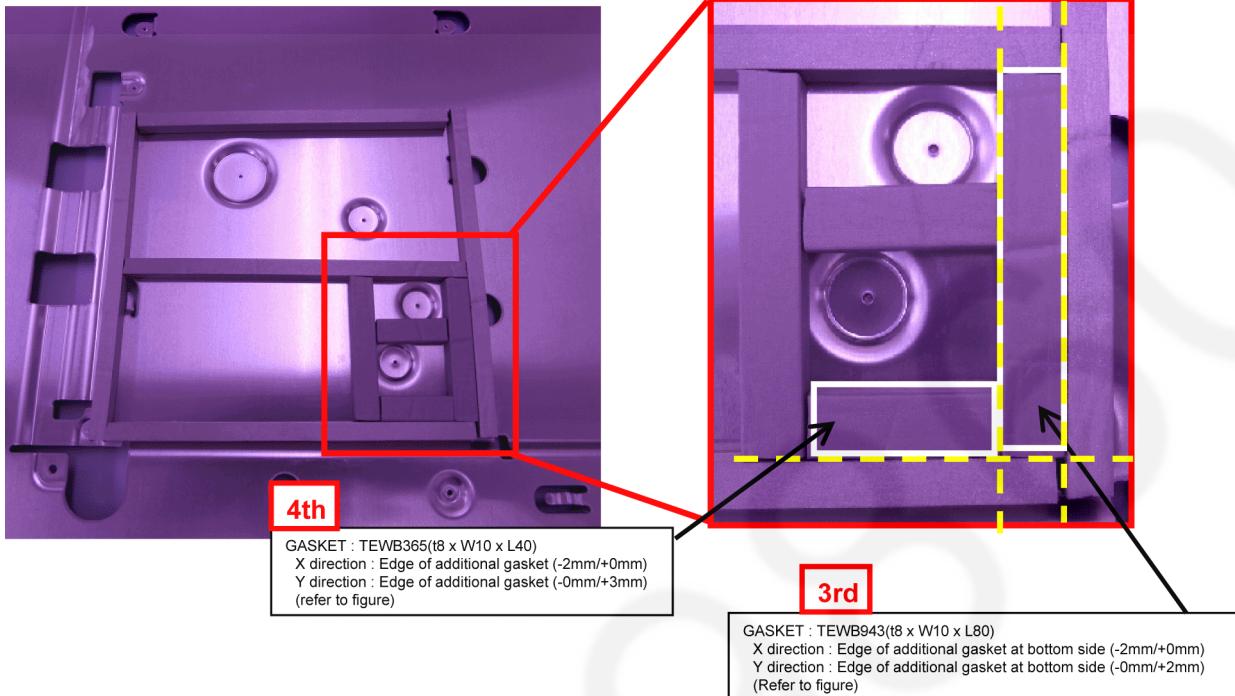

8.3.30. Specification of sticking the gasket

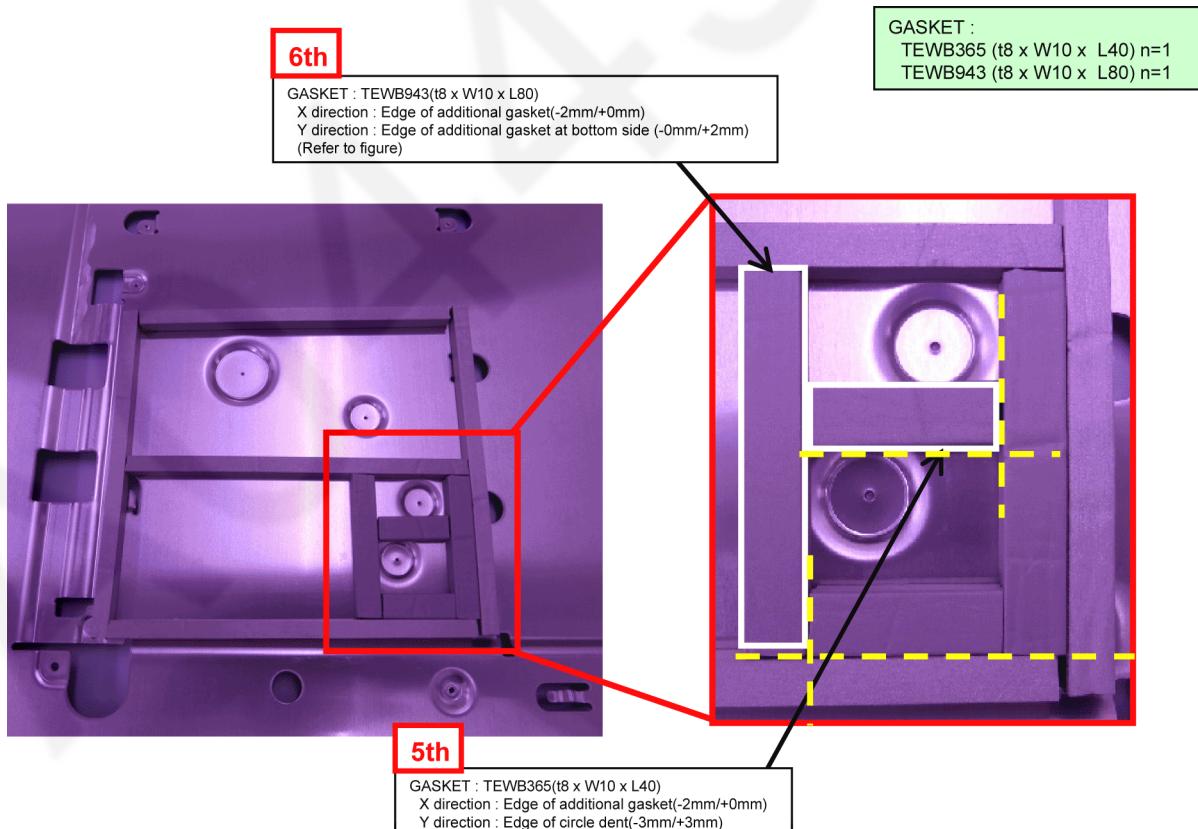

GASKET :
TEWC033 (t8 x W10 x L200) n=2

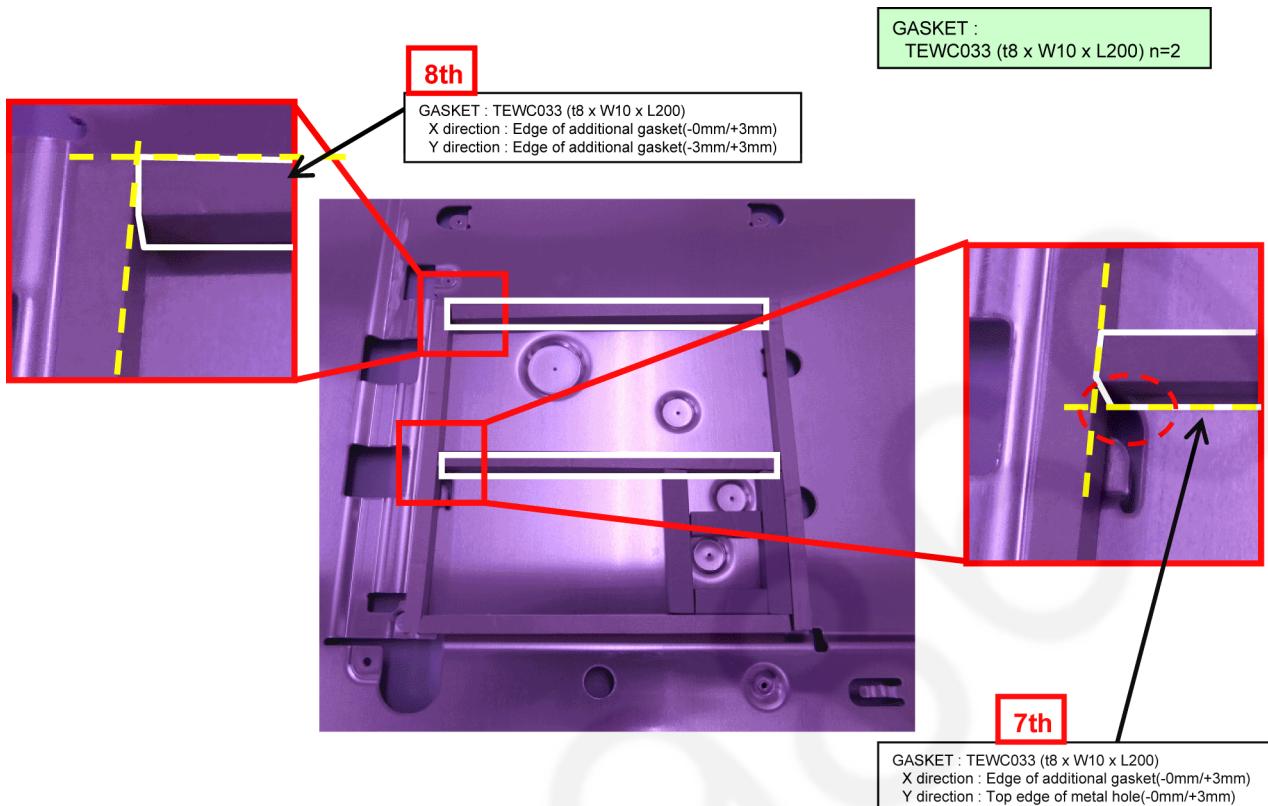

8.3.31. Specification of sticking the gasket
