# Service Manual

Microwave Oven

- NN-MX21WF  
NN-MX26WF

QPQ(Australia, New Zealand)

HNE(Hong Kong)

YNQ(Singapore)

MNQ(Malaysia)

TNE(Thailand, Indonesia)

LNK(Philippines)

YKE(Others)

KKE(UAE, Egypt, Iran)

KNQ(Kuwait, Doha, Qatar, Oman, Bahrain, Pakistan)

SNM(Saudi Arabia)

ZPE(CIS Countries)

Please file and use this manual together with the service manual for Model NN-MX20/25WF (ORDER NO. SIMMC0203003C3 or SIMMC0203004C3)

# Specification

Model	NN-MX21WF	NN-MX26WF
Power Source:	240V AC Single Phase, 50Hz - - - - For KNQ, MNQ, YNQ Models 230V~240V AC Single Phase, 50Hz - - For QPQ Models 220V AC Single Phase, 50Hz - - - - For KKE, ZPE, HNE, TNE YKE Models 220V AC Single Phase, 50Hz/60Hz - - For SNM Models 220V~230V AC Single Phase, 60Hz - - For LNK Models	
Power Requirement:	1250W	1250W
Output(IEC705-88):	800W	800W
Microwave Frequency:	2450MHz	
Timer:	30min	29min.90sec (HIGH POWER)/99min.90sec
Outside Dimensions:	354mm(W) x 482mm(D) x 282mm(H)	
Oven Cavity Dimensions:	330mm(W) x 325mm(D) x 218mm(H)	
Weight:	14kg	
PbF	This product with PbF	
Output power:IEC705-88 Test Procedure		
Specifications subject to change without notice.

## WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

## WARNING

1. This product should be serviced only by trained, qualified personnel.
2. Check for radiation leakage before and after every servicing according to the "procedure for measuring radiation leakage."
3. If the unit cannot be repaired on site, advise the customer not to use until unit is repaired.
4. There are special components used in the microwave oven which are important for safety. These parts are marked with a □ on the replacement parts list. It is essential that these critical parts be replaced only with the manufacturer's specified parts to prevent microwave leakage, shock, fire, or other hazards. Do not modify the original design.

This service manual covers products for following markets.

When troubleshooting or replacing parts, please refer to the country identifications shown below for your applicable product specification.

QPQ .....	For Australia, New Zealand	KKE .....	For UAE, Egypt, Iran
HNE .....	For Hongkong	KNQ .....	For Kuwait, Doha, Qatar,
TNE .....	For Thailand, Indonesia		Cman, Bahrain, Pakistan
YNQ .....	For Singapore	SNM .....	For Saudi Arabia
MNQ .....	For Malaysia	ZPE .....	For CIS Countries
LNK .....	For Philippines		
YKE .....	For Others		

## PRECAUTIONS TO BE OBSERVED BEFORE AND DURING SERVICING TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY

- (A) Do not operate or allow the oven to be operated with the door open.
- (B) Make the following safety checks on all ovens to be serviced before activating the magnetron or other microwave source, and make repairs as necessary:
- (1) Interlock operation
  - (2) Proper door closing
  - (3) Seal and sealing surfaces (arcing, wear, and other damage)
  - (4) Damage to or loosening of hinges and latches.
  - (5) Evidence of dropping or abuse.
- (C) Before turning on microwave power for any service test or
- inspection within the microwave generating compartments, check the magnetron, waveguide or transmission line, and cavity for proper alignment, integrity and connections.
- (D) Any defective or misadjusted components in the interlock, magnetron, door seal, and microwave generation and transmission systems shall be repaired, replaced, or adjusted by procedures described in this manual before the oven is released to the owner.
- (E) A microwave leakage check to verify compliance with the Federal Performance Standard should be performed on each oven prior to release to the owner.

## CAUTION

About lead free solder (PbF)

Distinction of PbF PCB: PCBs (manufactured) using lead free solder will have a PbF stamp on the PCB.

Caution: • Pb free solder has a higher melting point than standard solder; Typically the melting point is 30 - 40°C higher.  
Please use a high temperature soldering iron. In case of the soldering iron with temperature control, please set it to  $370 \pm 10^\circ\text{C}$ .

• Pb free solder will tend to splash when heated too high (about 600°C).

National/Panasonic®

# 4 SCHEMATIC DIAGRAM (NN-MX26WF (QPQ&ZPE))

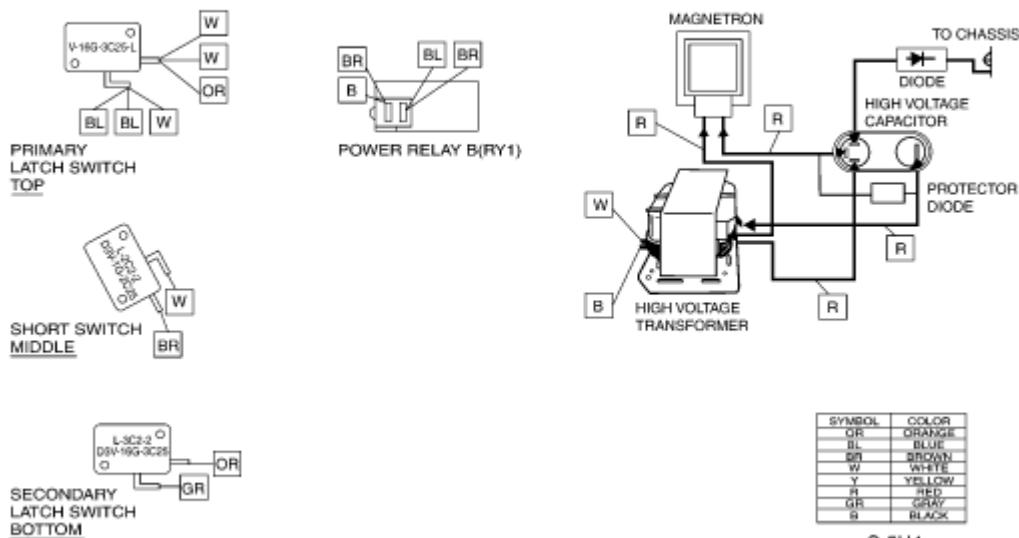

[TOP](#) [PREVIOUS](#) [NEXT](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

**WIRING DIAGRAM**

NOTE: \* When replacing, check the lead wire colour as shown.  
\* Colours shown by ( ) indicate colours of lead wire connector housing.

# 5 CAUTIONS TO BE OBSERVED WHEN TROUBLESHOOTING

[TOP](#) [PREVIOUS](#) [NEXT](#)

Unlike many other appliances, the microwave oven is high-voltage, high-current equipment. Though it is free from danger in ordinary use, extreme care should be taken during repair.

**CAUTION**

Servicemen should remove their watches whenever working close to or replacing the magnetron.

[5.1 Check the grounding](#)

[5.2 Warning about the electric charge in the high voltage capacitor](#)

[5.3 When parts must be replaced, remove the power plug from the outlet.](#)

[5.4 When the 8 Amp fuse is blown due to the operation of short switch:](#)

[5.5 Avoid inserting nails, wire, etc. through any holes in the unit during operation.](#)

[5.6 Confirm after repair](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

# 5.1 Check the grounding

[TOP](#) [PREVIOUS](#) [NEXT](#)

Do not operate on a 2-wire extension cord. The microwave oven is designed to be used when grounded. It is imperative, therefore, to make sure it is grounded properly before beginning repair work.

[TOP](#) [PREVIOUS](#) [NEXT](#)

## 5.2 Warning about the electric charge in the high voltage capacitor

[TOP](#) [PREVIOUS](#) [NEXT](#)

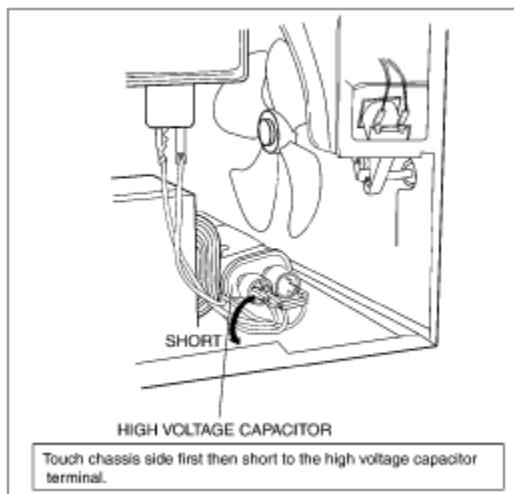

For about 30 seconds after the oven is turned off, an electric charge remains in the high voltage capacitor. When replacing or checking parts, remove the power plug from the outlet and short the terminal of the high voltage capacitor (terminal of lead wire from diode) to chassis ground with an insulated handle screwdriver to discharge.

**WARNING**

There is high-voltage present, with high-current capabilities in the circuits of the high voltage winding and filament winding of the high voltage transformer. It is extremely dangerous to work on or near these circuitswith oven energized.  
DO NOT measure the voltage in the high voltage circuit including filament voltage of magnetron.

**WARNING**

Never touch any circuit wiring with your hand nor with an insulated tool during operation.

[TOP](#) [PREVIOUS](#) [NEXT](#)

## **5.3 When parts must be replaced, remove the power plug from the outlet.**

[TOP](#) [PREVIOUS](#) [NEXT](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

## 5.4 When the 8 Amp fuse is blown due to the operation of short switch:

[TOP](#) [PREVIOUS](#) [NEXT](#)

### WARNING

When the 15 Amp fuse is blown due to the operation of short switch, you must replace Primary latch switch and short switch. Also replace power relay B (RY1) when the continuity check reads shorted contacts(1-2).

1. This is mandatory. Refer to "Adjustments and Measurement" for these switches.
2. When replacing the fuse, confirm that it has the appropriate rating for these models.
3. When replacing faulty switches, be sure mounting tabs are not bent, broken or otherwise deficient in their ability to hold the switches.

[TOP](#) [PREVIOUS](#) [NEXT](#)

## 5.5 Avoid inserting nails, wire, etc. through any holes in the unit during operation.

[TOP](#) [PREVIOUS](#) [NEXT](#)

Never insert a wire, nail or any other metal object through the lamp holes on the cavity or any other holes or gaps, because such objects may work as an antenna and cause microwave leakage.

[TOP](#) [PREVIOUS](#) [NEXT](#)

## 5.6 Confirm after repair

[TOP](#) [PREVIOUS](#) [NEXT](#)

1. After repair or replacement of parts, make sure that the screws of the oven, etc. are neither loose nor missing.  
Microwaves might leak if screws are not properly tightened.
2. Make sure that all electrical connections are tight before inserting the plug into the wall outlet.
3. Check for microwave energy leakage. (Refer to procedure for measuring microwave energy leakage.)

**CAUTION**

**MICROWAVE RADIATION**

DO NOT BECOME EXPOSED TO RADIATION FROM THE MICROWAVE GENERATOR OR OTHER PARTS CONDUCTING MICROWAVE ENERGY.

**IMPORTANT NOTICE**

1.The following components have potentials above 2000V while the appliance is operated.

- \* Magnetron
- \* High voltage transformer
- \* High voltagediode
- \* High voltage capacitor

Pay special attention to these components.

2.When the appliance is operated with the door hinge or magnetron fixed incorrectly, the microwave leakage can reach more than 5mW/cm<sup>2</sup>.After repair or exchange, it is very important to check if magnetron and the door hinge is correctly installed.

[TOP](#) [PREVIOUS](#) [NEXT](#)

# 6 MEASUREMENTS AND ADJUSTMENTS

[TOP](#) [PREVIOUS](#) [NEXT](#)

[6.1 Adjustment of Primary latch switch, Secondary latch switch and Short switch.](#)

[6.2 Measurement of microwave output](#)

[TOP](#) [PREVIOUS](#) [NEXT](#)

# 6.1 Adjustment of Primary latch switch, Secondary latch switch and Short switch.

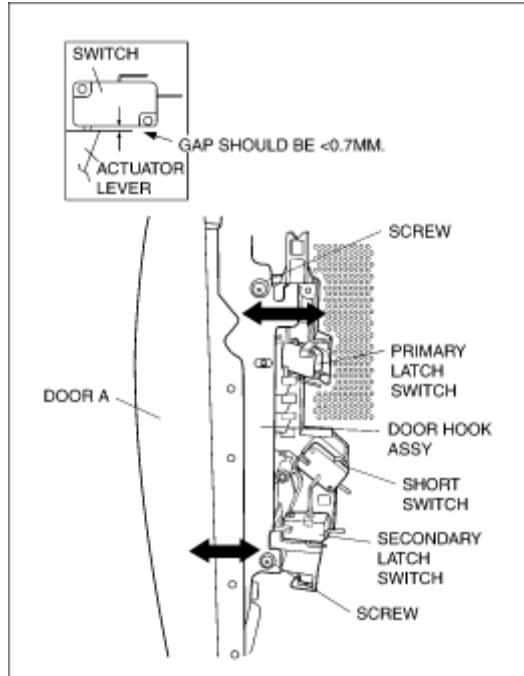

[TOP](#) [PREVIOUS](#) [NEXT](#)

1. Mount the Primary latch switch, the Secondary latch switch and the short switch to the door hook assembly as shown in ILL.

**NOTE:**

No specific individual adjustment during installation of the Primary latch switch, Secondary latch switch and short switch to the door hook are required.

2. When mounting the door hook assembly to the oven assembly, adjust the door hook assembly by moving it in the direction of the arrows in the illustration so that the oven door will not have any play in it. Check for play in the door by pulling the door assembly. Make sure that the latch keys move smoothly after adjustment is completed. Completely tighten the screws holding the door hook assembly to the oven assembly.
3. Reconnect the short switch and check the continuity of the monitor circuit and all latch switches again by following the component test procedures.

[TOP](#) [PREVIOUS](#) [NEXT](#)

## 6.2 Measurement of microwave output

[TOP](#) [PREVIOUS](#) [NEXT](#)

The output power of the magnetron can be determined by performing IEC standard test procedures. However, due to the complexity of IEC test procedures, it is recommended to test the magnetron using the simple method outlined below.

Necessary Equipment:

- 1 liter beaker
- Glass thermometer
- Wrist watch or stopwatch

**NOTE:**

Check the line voltage under load. Low voltage will lower the magnetron output. Take the temperature readings and heating time as accurately as possible.

1. Fill the beaker with exactly one liter of tap water. Stir the water using the thermometer and record the water's temperature. (recorded as T1).
2. Place the beaker on the center of glass tray.  
Set the oven for High power and heat it for exactly one minute.
3. Stir the water again and read the temperature of the water. (recorded as T2).
4. The normal temperature rise at High power level for each model is as shown in table.

TABLE (1L-1min.test)

RATED OUTPUT	TEMPERATURE RISE
800W(IEC705-88)	Min.8.0°C

[TOP](#) [PREVIOUS](#) [NEXT](#)

**NOTE:**

- When ordering replacement part(s), please use part number(s) shown in this part list.

Do not use description of the part.

- Important safety notice:

Components identified by mark have special characteristics important for safety.

When replacing any of these components, use only manufacture's specified parts.

## PARTS LIST

Ref. No.	Part No.	Part Name & Description	Pcs/Set	Remarks
BZ310	AEFBTFM571	BUZZER	1	2.0KHz
C10	AECETK1V471B	AL CHEM CAPACITOR	1	470μF/35V
C221	AECUU06F103Z	CHIP CAPACITOR	1	0.01μF/50V
C12, C350	AECUT06F104Z	CHIP CAPACITOR	2	0.1μF/25V
CN1	AEEMXF01505W	CONNECTOR	1	
CN4	F03535G40XN	CONNECTOR	1	4 Pin
CX320	AEFOS800MG06	CERAMIC RESONATOR	1	8.00MHz
D10	AEDNERA1502	DIODE	1	
D40, D41, D220, D221, D223	AESS133T-77	DIODE	5	
D180-D183	AESQSQL210M	LED	4	(QPQ)
D25	AERZ511KD10A	VARISTOR	1	
D26, D27	AERZ102KD10A	VARISTOR	2	
IC1	MN101C589DK	L.S.I	1	
Q11	2SD1859TV2Q	TRANSISTOR	1	
Q180	2SD1859TV2Q	TRANSISTOR	1	(QPQ)
Q40, Q220, Q225	2SC2412KT146	CHIP TRANSISTOR	3	
Q181	2SC2412KT146	CHIP TRANSISTOR	1	(QPQ)
Q210, Q223	AESC23JKE	CHIP DIGI-TRANSISTOR	2	
Q182	AESC23JKE	CHIP DIGI-TRANSISTOR	1	(QPQ)
Q226	AESA14EKE	CHIP DIGI-TRANSISTOR	1	
R211	AERJ06J102R	CHIP RESISTOR	1	1KΩ, 1/16W, 5%
R226	AERJ06J103R	CHIP RESISTOR	1	10KΩ, 1/16W, 5%
R221, R228, R229, R350, R351	AERJ06J104R	CHIP RESISTOR	5	100KΩ, 1/16W, 5%
R40-R47	AERJ06J154R	CHIP RESISTOR	8	150KΩ, 1/16W, 5%
R320, R352	AERJ06J220R	CHIP RESISTOR	2	22Ω, 1/16W, 5%
R220, R222, R223	AERJ06J222R	CHIP RESISTOR	3	2.2KΩ, 1/16W, 5%
R210	AERJ06J332R	CHIP RESISTOR	1	3.3KΩ, 1/16W, 5%
R440, C440	AERJ06J333R	CHIP RESISTOR	2	33KΩ, 1/16W, 5%
R182	AERJ06J360R	CHIP RESISTOR	1	36Ω, 1/16W, 5% (QPQ)

R441	AERJ06J471R	CHIP RESISTOR	1	470Ω, 1/16W, 5%
R180, R181	AERJ06J472R	CHIP RESISTOR	2	4.7KΩ, 1/4W, 5% (QPQ)
R10, R11	AERDY2TJ102T	CARBON FILM RESISTOR	2	1KΩ, 1/4W, 5%
R290	AERDY2TJ103T	CARBON FILM RESISTOR	1	10KΩ, 1/4W, 5%
RY1	AEGG5G1A12	POWER RELAY	1	
RY2	AEBJQ1A18	POWER RELAY	1	
T10	AEFP4T00QP	LOW VOLTAGE TRANSFORMER	1	
ZD11	AESZMTZJ5R6B	ZENER DIODE	1
